T4-101	The acids present in Grape and Tomato are _____, _____.	c) Tartaric acid, Oxalic acid	Unit I - General Science	Fruits owe their characteristic sourness to particular organic acids: grapes are especially rich in tartaric acid, which is why potassium bitartrate ('cream of tartar') is recovered as a by-product of wine-making, while tomatoes contain, along with citric and malic acid, a notable share of oxalic acid. By contrast, apples are dominated by malic acid, citrus fruits by citric acid, vinegar by acetic acid, and curd by lactic acid, so those pairings do not fit here. Matching each fruit to its distinctive acid therefore gives grape-tartaric acid and tomato-oxalic acid, making (c) the correct answer.
T4-102	Match the following: (a) Cerebral cortex (b) Hypothalamus (c) Cerebellum (d) Pons 1. Temperature control 2. Sensory perception	d) (a)-2 (b)-1 (c)-4 (d)-3	Unit I - General Science	Each region of the brain performs a distinct function: the cerebral cortex, the outer folded layer of the cerebrum, contains the sensory areas that receive and interpret sensory impulses (2); the hypothalamus, forming the floor of the diencephalon, maintains homeostasis and houses the centres that regulate body temperature (1); the

	3. Role in sleep-awake cycle 4. Maintenance of posture and balance			cerebellum, the second largest part of the brain, controls and coordinates muscular movement and body equilibrium, so damage to it causes uncoordinated posture (4); and the pons, lying between the midbrain and medulla, is associated with regulatory rhythmic functions including the sleep-wake cycle (3). This gives the matching (a)-2, (b)-1, (c)-4, (d)-3, so the answer is (d). This is covered in Class 11 Bio-Zoology, Unit 10 "Neural Control and Coordination", p.177.
T4-103	Match the following: (a) Ganymede (b) Titan (c) Neptune (d) Triton 1. Moves in opposite direction to the direction of the spin of its planet 2. Greenish star like appearance 3. Moon with clouds in our solar system 4. Largest moon of our solar system	a) (a)-4 (b)-3 (c)-2 (d)-1	Unit I - General Science	Ganymede, a moon of Jupiter, is the largest natural satellite in the solar system, even bigger than the planet Mercury (4). Titan, Saturn's largest moon, is unique for its dense, cloud-bearing nitrogen atmosphere and liquid-hydrocarbon lakes (3). Neptune, the outermost planet, appears as a greenish-blue, star-like body because methane in its atmosphere absorbs red light and reflects blue-green light (2). Triton, Neptune's largest moon, follows a retrograde orbit that runs opposite to the direction of its planet's rotation, which is why astronomers believe it was a captured object rather than having formed alongside Neptune (1). This matching, (a)-4, (b)-3, (c)-2, (d)-1, gives the answer (a).
T4-104	Who is the Chief Executive Authority of the Municipal Corporation?	b) Municipal Commissioner	Unit IV - Indian Polity	A Municipal Corporation functions through two wings: a deliberative wing headed by the

				Mayor, an elected and largely ceremonial head who presides over council meetings, and an executive wing that actually implements the council's decisions. The Municipal Commissioner, an officer typically drawn from the Indian Administrative Service and appointed by the government, is this chief executive authority, responsible for carrying out the decisions of the council and directing the corporation's day-to-day administration and staff. The Collector, by contrast, heads district revenue administration and has no such role within the corporation. Hence the answer is (b) Municipal Commissioner. This is covered in Class 11 Political Science, Unit 12 "Local Governments", p.236.
T4-105	One of history's great oration, "I have a dream" was given by	c) Martin Luther King	Unit III - History, Culture of India, and Indian National Movement	'I Have a Dream' was delivered by Martin Luther King Jr. on 28 August 1963 from the steps of the Lincoln Memorial in Washington, D.C., during the March on Washington for Jobs and Freedom. In it, King called for an end to racial discrimination and for full civil and economic rights for African Americans, envisioning a future where people would be judged by their character rather than their skin colour. The speech became one of the defining moments of the American civil-rights movement and is remembered as one of history's greatest orations. Hence the answer

				is (c) Martin Luther King.
T4-106	Samagara Shiksha Abhiyan Scheme aims to	a) Integrate vocational education with General Academic Education	Unit V - Indian Economy and Development Administration in Tamil Nadu	Samagra Shiksha is an integrated, centrally sponsored scheme for school education, launched in 2018 by the Ministry of Education, that treats schooling as a single continuum from pre-school through Class 12. It merged three earlier programmes, namely Sarva Shiksha Abhiyan for elementary education, Rashtriya Madhyamik Shiksha Abhiyan for secondary education, and the scheme for teacher education, into one umbrella framework. Among its stated objectives is the vocationalisation of school education, that is, integrating vocational education with mainstream general academic education so that students gain employable skills alongside their regular studies. Hence the answer is (a), integrating vocational education with general academic education.
T4-107	Who is the author of the book "Ambedkar : A Life"?	a) Shashi Tharoor	Unit III - History, Culture of India, and Indian National Movement	'Ambedkar: A Life', published in 2022, is a biography of Dr B.R. Ambedkar written by Shashi Tharoor, the Congress Member of Parliament and prolific author known also for works such as 'The Great Indian Novel' and 'An Era of Darkness'. The book traces Ambedkar's life and thought, his central role in drafting the Indian Constitution, and his lifelong struggle against caste oppression. Hence the answer is (a) Shashi Tharoor.

T4-108	Match the Religion and Place of worship: Religion (a) Jainism (b) Judaism (c) Buddhism (d) Zoroastrianism Places of worship 1. Synagogue 2. Agiyari 3. Basadi 4. Vihara	d) (a)-3 (b)-1 (c)-4 (d)-2	Unit III - History, Culture of India, and Indian National Movement	Each religion has developed its own distinctive place of worship. Jains worship in a Basadi, also called a Basti, a temple dedicated to the Tirthankaras (3). Jews gather for prayer and community life in a Synagogue (1). Buddhist monks reside, study and worship in a Vihara, a monastery complex (4). Zoroastrians, or Parsis, tend the sacred, ever-burning fire in an Agiyari, or fire temple (2). This gives the matching (a)-3, (b)-1, (c)-4, (d)-2, so the answer is (d).
T4-109	Consider the following statement (Reason and Assertion type): Assertion [A] : Make in India program was launched in 2014. Reason [R] : Intended to boost the domestic manufacturing sector and also augment investment into the country.	b) Both [A] and [R] are true, and [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Make in India programme was launched in 2014 with the explicit aim of putting India on the world map as a major hub for global design and manufacturing, encouraging both domestic and multinational companies to manufacture within the country. Assertion [A], that it was launched in 2014, is therefore true, and Reason [R], that its purpose was to boost domestic manufacturing and augment investment, correctly captures the very rationale behind the programme's launch. Since [R] explains why [A] happened, the answer is (b), both statements true with [R] as the correct explanation of [A]. This is covered in Class 10 Social Science Geography, Unit 4 "India: Resources and Industries".

T4-110	Which of the following statements are true about the Himalayas? (i) Zaskar, Ladakh, Kailash and Karakoram ranges are found in the trans - Himalayas. (ii) The Greater Himalayas receives lesser rainfall as compared to the lesser Himalayas and the Siwaliks. (iii) The Outer Himalayas is the most continuous range.	b) (i) and (ii) only	Unit II - Geography of India	The Himalayas are arranged in parallel belts running from north to south: the Trans-Himalayas, the Greater Himalayas or Himadri, the Lesser Himalayas or Himachal, and the Outer Himalayas or Siwaliks. The prominent ranges of the Trans-Himalayan belt are indeed the Zaskar, Ladakh, Kailash and Karakoram ranges, so statement (i) is true. Because the lofty Greater Himalayas lie behind the front ranges and block much of the monsoon moisture, they receive less rainfall than the Lesser Himalayas and the Siwaliks that face the monsoon directly, making statement (ii) true as well. However, it is the Greater Himalayas, not the Outer Himalayas, that form the most continuous and loftiest range, while the Siwaliks are discontinuous, so statement (iii) is false. Hence only (i) and (ii) hold, giving the answer (b). This is covered in Class 10 Social Science Geography, Unit 1 "India – Location, Relief and Drainage".
T4-111	Which animal was not known to the Harappans?	c) Horse	Unit III - History, Culture of India, and Indian National Movement	The Harappan people domesticated and depicted a wide range of animals on their seals and figurines, including cattle, buffalo, elephant and pig, showing they were well familiar with these species. Excavations of the mature Harappan phase, however, have yielded no clear or undisputed evidence of the

				horse, which is instead associated with the later Vedic and Aryan period that followed the decline of the Indus civilisation. Hence the animal not known to the Harappans is (c) the horse.
T4-112	Match the following with their correct answers: (a) Peshwa (b) Shurnavis (c) Nyayadhish (d) Pandit Rao 1. Secretary 2. Chief Justice 3. High Priest 4. Prime Minister	b) (a)-4 (b)-1 (c)-2 (d)-3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Shivaji administered the Maratha kingdom through a council of eight ministers known as the Ashta Pradhan. Within this council, the Peshwa was the foremost minister, functioning as the chief or prime minister (4); the Shurnavis, or Sachiv, handled official correspondence and records as secretary (1); the Nyayadhish headed the judicial system as chief justice (2); and the Pandit Rao looked after religious affairs and charities as the high priest (3). This matching, (a)-4, (b)-1, (c)-2, (d)-3, gives the answer (b). This is covered in Class 11 History, Unit 15 "The Marathas".
T4-113	Which of the following states have a Common High Court?	c) Punjab and Haryana	Unit IV - Indian Polity	Although the Constitution envisages a High Court for every state, it also allows Parliament to establish a common High Court for two or more states, or for a state and a union territory together. Acting on this provision, the States of Punjab and Haryana, along with the Union Territory of Chandigarh, share a common High Court seated at Chandigarh. Kerala and Telangana, by contrast, each have their own separate High Courts, with Telangana having gained a distinct High

				Court only in 2019. Hence, among the given options, the answer is (c) Punjab and Haryana. This is covered in Class 10 Social Science Civics, Unit 3 "State Government", p.217.
T4-114	In which year did the Govt. of India declare Tamil as the first Classical Language?	c) 2004	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In 2004 the Government of India created a new category of languages called 'classical languages' to recognise ancient tongues with a rich, independent literary heritage, and Tamil was the very first language to be granted this status, in recognition of its Sangam-era literature and antiquity. Since then five more languages, namely Sanskrit (2005), Telugu (2008), Kannada (2008), Malayalam (2013) and Odia (2014), have also been accorded classical status. Hence the answer is (c) 2004. This is covered in Class 10 Social Science Civics, Unit 1 "Indian Constitution", section on Official Language.
T4-115	Human Rights Day is celebrated on	c) 10th December	Current Affairs & General Knowledge	Human Rights Day is observed every year on 10th December, the date on which the United Nations General Assembly proclaimed the Universal Declaration of Human Rights (UDHR) in Paris in 1948, a milestone document setting out fundamental rights and freedoms for every person. The day has been formally observed since 1950 to honour this achievement and to promote awareness of human rights worldwide. Hence the answer is

				(c) 10th December. This is covered in Class 8 Social Science Civics, Unit 4 "Human Rights and U N".
T4-116	Arrange the following Committees in the correct chronological order: I. G.V.K. Rao Committee II. Balwant Rai Mehta Committee III. L.M. Singhvi Committee IV. Ashok Mehta Committee	d) II, IV, I, III	Unit IV - Indian Polity	Several committees examined Panchayati Raj and democratic decentralisation in India over the decades. The Balwant Rai Mehta Committee of 1957 came first and recommended the three-tier Panchayati Raj structure; it was followed by the Ashok Mehta Committee of 1977-78, which proposed a two-tier alternative; then came the G.V.K. Rao Committee of the mid-1980s, which examined rural development administration alongside Panchayati Raj; and finally the L.M. Singhvi Committee of 1986, which recommended granting Panchayats constitutional status. This chronological sequence, II, IV, I, III, gives the answer (d). This is covered in Class 11 Political Science, Unit 12 "Local Governments".
T4-117	Which of the following statements are true about "Anti-defection law"? (i) Provided by the 52nd Amendment Act of 1985 (ii) Added in the 9th schedule to the Constitution (iii) Made some changes in the 91st Amendment Act of 2003	b) (i) and (iii) only	Unit IV - Indian Polity	The Anti-Defection Law was introduced through the 52nd Constitutional Amendment Act of 1985, which provided for the disqualification of members of Parliament and state legislatures who defect from one political party to another, making statement (i) true. To give effect to this, the amendment added a Tenth Schedule to the Constitution, not the Ninth Schedule, which instead holds a

				separate list of laws placed beyond judicial review, so statement (ii) is false. The law was later modified by the 91st Amendment Act of 2003, which removed the earlier exemption that had protected defectors in cases of a one-third 'split', confirming statement (iii) as true. Hence only (i) and (iii) are correct, giving the answer (b). This is covered in Class 11 Political Science, Unit 11 "Election and Representation".
T4-118	The Industrial Policy of India, which abolished the MRTP Act in 1969 was	a) 1991 Industrial Policy	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Monopolies and Restrictive Trade Practices (MRTP) Act of 1969 had curbed the growth of large business houses by imposing asset ceilings and requiring prior government approval before they could expand. As part of the sweeping liberalisation reforms, the New Industrial Policy of 1991 abolished this MRTP Act, removing the asset-limit and pre-entry restrictions that had constrained large firms and thereby freeing industrial expansion from that regulatory regime. Hence the answer is (a) 1991 Industrial Policy. This is covered in Class 11 Economics, Unit 9 "Development Experiences in India".
T4-119	Kisan Credit Card (KCC) was launched in 1998 by	d) Reserve Bank of India and NABARD Bank	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Kisan Credit Card scheme is a credit-delivery mechanism designed to give farmers quick and timely access to affordable credit for cultivation and allied needs through a single card, reducing their dependence on

			Nadu	expensive informal moneylenders. It was launched in 1998 jointly by the Reserve Bank of India and NABARD, and is now offered through cooperative banks, regional rural banks and public sector banks. Hence the answer is (d) Reserve Bank of India and NABARD Bank. This is covered in Class 11 Economics, Unit 9 "Development Experiences in India".
T4-120	Assertion [A]: The Ministry of Education (Formerly Human Resource Development-MHRD) in India formulates education Policy in India and also undertakes Education Programs. Reason [R]: The centre is represented by the Ministry of Education decides the India's Education budget.	a) Both [A] and [R] are true and [R] explains [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Ministry of Education, earlier known as the Ministry of Human Resource Development until its renaming in 2020 following the National Education Policy, is the nodal Union ministry that both formulates India's education policy and runs national-level education programmes and bodies such as the CBSE and NCERT, so Assertion [A] holds true. As the nodal ministry representing the Centre in this sector, it likewise decides and administers the allocation of the education budget, and this budgetary authority flows directly from its role as the policy-making and programme-implementing body, so Reason [R] is true and correctly explains why [A] holds. Hence the answer is (a). This is covered in Class 12 Political Science, Unit 6 "Administrative Machinery in India", p.109.
T4-121	"The Swadeshi Steam Navigation Company" started with capital amount	d) Rs. 10 lakh	Unit VI - History, Culture, Heritage and	V.O. Chidambaram Pillai registered the Swadeshi Steam Navigation Company in 1906

	of		Socio-Political Movements in Tamil Nadu	at Thoothukudi as a joint stock company with an authorised capital of Rs. 10 lakh, divided into 40,000 shares of Rs. 25 each, open only to Indian, Ceylonese and other Asian subscribers. The venture was meant to break the monopoly held by the British India Steam Navigation Company on the Thoothukudi-Colombo route and to demonstrate the strength of Swadeshi enterprise, and it operated two steamships, the S.S. Gallia and S.S. Lawoe, purchased for the purpose. Hence the answer is (d) Rs. 10 lakh. This is covered in Class 12 History, Unit 2 "Rise of Extremism and Swadeshi Movement".
T4-122	Ram Prasad Bismil and Ashfaqulla Khan were arrested and tried in the ——— case.	b) Kakori conspiracy case	Unit III - History, Culture of India, and Indian National Movement	In 1925, members of the Hindustan Republican Association, formed in Kanpur in 1924 to overthrow colonial rule through armed rebellion, held up a train carrying government treasury money near Kakori, a village close to Lucknow, and looted it to fund their revolutionary activities. Ram Prasad Bismil, Ashfaqulla Khan and their associates were arrested and tried in what came to be known as the Kakori Conspiracy Case, with four of them eventually sentenced to death and the rest to imprisonment. Hence the answer is (b) Kakori conspiracy case. This is covered in Class 10 Social Science History, Unit 8 "Nationalism: Gandhian Phase".

T4-123	Who appeared in the court in defence of revolutionary nationalists in the Alipur blast case?	a) Chittaranjan Dass	Unit III - History, Culture of India, and Indian National Movement	The Alipore Bomb Case followed the Muzaffarpur bombing and led to the arrest of a large group of revolutionaries, including Aurobindo Ghose and his brother Barindra Kumar Ghose, along with thirty-five others, on charges of conspiracy against British rule. Chittaranjan Das, the eminent lawyer who later founded the Swaraj Party, took up the defence of the accused, and his advocacy led the court to find no evidence connecting Aurobindo Ghose to the conspiracy, resulting in his acquittal. Hence the answer is (a) Chittaranjan Dass. This is covered in Class 12 History, Unit 2 "Rise of Extremism and Swadeshi Movement".
T4-124	Who was honoured with such titles as Rao Sahib (1926), Rao Bahadur (1930) and Divan Bahadur (1936) for his selfless social services?	a) Rettaimalai Srinivasan	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Rettaimalai Srinivasan, born in 1859 at Kanchipuram, fought throughout his life for social justice, equality and civil rights for the marginalised castes, founding the Adi Dravida Mahajana Sabha and later serving as president of the Scheduled Castes' Federation. A close associate of Dr B.R. Ambedkar, he represented the depressed classes at the Round Table Conferences in London and was a signatory to the Poona Pact of 1932. In recognition of his selfless social service, he was honoured with the titles Rao Sahib in 1926, Rao Bahadur in 1930, and Divan Bahadur in 1936. Hence the answer is

				(a) Rettaimalai Srinivasan. This is covered in Class 10 Social Science History, Unit 10 "Social Transformation in Tamil Nadu".
T4-125	What removes inner negativity of a Mankind like a lamp according to Valluvar?	d) Lamp with truth's pure radiance	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This draws on the Thirukkural couplet in the chapter on truthfulness, 'ellaa vilakkum vilakkalla saandrorrkup poyyaa vilakke vilakku', meaning that not every lamp is truly a lamp; to the wise, only the unfailing lamp of truth, one that never deceives, deserves the name. Valluvar's point is that an ordinary lamp dispels only outer, physical darkness, whereas it is the light of truthful conduct alone that removes the inner darkness of ignorance and falsehood from a person's mind. This 'poyyaa vilakku', or lamp of unfailing truth, is what the question refers to, so the answer is (d), the lamp with truth's pure radiance. This is covered in Class 9 Tamil, Unit 9, Lesson "Ani Ilakkanam" (Figures of Speech).
T4-126	A person invested Rs.12,000 in a fixed deposit scheme for 2 years at the rate of 5% compound interest. How much amount will be got on maturity of the fixed deposit?	C) Rs.13,230	Part B - Aptitude and Mental Ability	Aptitude - Compound Interest. Using $A = P(1+r/100)^n$ with $P = \text{Rs.}12,000$, $r = 5\%$, $n = 2$ years, the growth factor is $(21/20)^2 = 441/400$, so $A = 12000 \times 441/400 = 30 \times 441 = \text{Rs. } 13,230$, matching the marked option.
T4-127	The Roman Writer Piliy the Elder writes of ——'s, in his Natural History as the first emporium of India.	c) Musiri	Unit III - History, Culture of India, and Indian National	Musiri, or Muziris, was a renowned ancient port on the Chera coast of Tamilagam that flourished during the Sangam age as the hub

			Movement	of Indo-Roman trade in pepper, pearls and precious stones. The Roman writer Pliny the Elder, in his 'Natural History', describes it as the first emporium, or principal trading centre, of India, a testimony corroborated by discoveries of hoards of Roman gold coins and by the detailed account of the port found in the Periplus of the Erythraean Sea. Hence the answer is (c) Musiri. This is covered in Class 6 Social Science History, Unit 1 "Society and Culture in Ancient Tamilagam: The Sangam Age".
T4-128	Iyothee Thassar founded the Dravida Mahajana Sabha in 1891 and organised the First Conference of the association at	c) Nilgiris	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Pandithar Iyothee Thassar was a radical Tamil scholar and social reformer who worked tirelessly for the emancipation of the so-called untouchable communities from caste-based oppression, earlier founding the Advaidananda Sabha and the Dravida Kazhagam movement along with the journal Dravida Pandian. In 1891 he founded the Dravida Mahajana Sabha to further this cause, and its first conference was organised that same year at the Nilgiris. Hence the answer is (c) Nilgiris. This is covered in Class 10 Social Science History, Unit 5 "Social and Religious Reform Movements in the 19th Century".
T4-129	Who did eulogise Thirukkural as given below?	b) Prof. Sundarampillai	Unit VI - History, Culture, Heritage and	This tribute to the Kural, expressing that one who has thoroughly mastered Valluvar's

	"Will any other didactic book is needed if one knows Thirukkural".		Socio-Political Movements in Tamil Nadu	Thirukkural would find no need to consult other law-codes such as the Manusmriti, is among the most quoted eulogies of the text and is attributed to Professor P. Sundaram Pillai, the nineteenth-century Tamil scholar best remembered for authoring the play 'Manonmaniam', from which the Tamil Thai Vazhthu invocation is also drawn. His praise reflects the wide reverence in which the Thirukkural has long been held as a universal ethical guide transcending any single tradition. Hence the answer is (b) Prof. Sundarampillai.
T4-130	What are the two things that one should keep in mind when setting out to conquer the world in the Kural? "Gnalam Karuthinum Kaikoodum"	b) Time and Place	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This is drawn from the Thirukkural couplet in the chapter on 'Kaalam Aridhal' (Knowing the Fitting Time), which states that even conquering the whole world becomes achievable if one acts after carefully weighing the right time and the right place. Valluvar's teaching here is that success in even the grandest undertaking is decided not by strength or ambition alone but by the wisdom to choose the fitting occasion and setting for action. Hence the answer is (b) Time and Place. This is covered in Class 11 Tamil, Unit 3, Thirukkural chapter "Kaalam Aridhal".
T4-131	Anemia Mukta Bharat was implemented in Tamil Nadu in the year	c) 2018	Unit V - Indian Economy and Development	Anemia Mukta Bharat is a national strategy launched by the Government of India in 2018 under the Intensified National Iron Plus

			Administration in Tamil Nadu	Initiative, aiming to reduce anaemia among six target groups, namely children, adolescents, women of reproductive age, and pregnant and lactating mothers, through a structured '6x6x6' framework of interventions, target groups and institutional mechanisms. Tamil Nadu adopted and rolled out the programme in the same year it was launched nationally. Hence the answer is (c) 2018.
T4-132	Implementation of the Tamil Nadu Urban Healthcare project funded by the Japan International Corporation agency for ——— years.	c) 7	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Urban Health Care Project is a large externally aided initiative funded through a loan from the Japan International Cooperation Agency (JICA), intended to strengthen primary healthcare infrastructure and service delivery in the state's towns and cities. The project's implementation period, as fixed under the loan agreement, runs for 7 years. Hence the answer is (c) 7.
T4-133	India observed 2018 as the national year of which crop?	a) Millets	Unit II - Geography of India	India declared 2018 as the National Year of Millets to promote the production and consumption of nutri-cereals such as sorghum (jowar/cholam), ragi (finger millet) and bajra (pearl millet), crops valued for their high nutrition, drought tolerance and low water requirement compared to conventional staples. This national push for millets subsequently formed the basis for India's proposal that led the United Nations to

				declare 2023 as the International Year of Millets. Hence, for 2018, the answer is (a) Millets. This is covered in Class 10 Social Science Geography, Unit 7 "Human Geography of Tamil Nadu".
T4-134	Assertion [A]: "Thirananari Thaervu Thittam" was launched in the year 2023. Reason [R]: To encourage the government school students to pursue higher education in premier institution.	b) Both [A] and [R] are true, [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Thirananari Thervu Thittam, or Aptitude Test Scheme, is a Tamil Nadu government initiative launched in 2023 to identify and assess the talents and aptitude of students studying in government schools, so Assertion [A] is true. The scheme's specific purpose is to use this assessment to guide and encourage these students towards pursuing higher education in premier institutions, which is exactly what Reason [R] states, making [R] the correct explanation for why the scheme, [A], was launched. Hence the answer is (b).
T4-135	Various welfare schemes to enhance the overall development of Adi Dravidar and Scheduled Tribe people, a sum of Rs. ——— crores has been allocated in the Budget Estimate for the year 2023-2024.	c) Rs. 3512.85	Unit V - Indian Economy and Development Administration in Tamil Nadu	In the Tamil Nadu Budget Estimate for 2023-2024, the government allocated Rs. 3512.85 crore for various welfare schemes administered through the Adi Dravidar and Tribal Welfare Department, covering education, housing and economic-upliftment programmes aimed at the overall development of Adi Dravidar and Scheduled Tribe communities. Hence the answer is (c) Rs. 3512.85 crore.
T4-136	The radius of a conical tent is 700 cm and the height is 24 m. Calculate the	A) 137.5 m	Part B - Aptitude and Mental Ability	Aptitude - Mensuration (Cone). The tent's slant height is $l = \sqrt{r^2 + h^2} =$

	length of the canvas used to make the tent if the width of the rectangular canvas is 4 m.			$\sqrt{7^2 + 24^2} = \sqrt{625} = 25$ m (radius converted from 700 cm to 7 m); the canvas covers the curved surface, so its area = $\pi \times r \times l = (22/7) \times 7 \times 25 = 550$ sq m, and dividing by the 4 m width gives a canvas length of $550/4 = 137.5$ m.
T4-137	Find the next number : 1, 2, 6, 24, 120, ?	C) 720	Part B - Aptitude and Mental Ability	Aptitude - Number Series. Each term is the previous term multiplied by the next integer (x2, x3, x4, x5, x6), which is just the factorial sequence 1!, 2!, 3!, 4!, 5!, 6!; continuing the pattern, the next multiplier is x6, so $120 \times 6 = 720$.
T4-138	If $x : y = 2 : 1$, then $(x^2 - y^2) : (x^2 + y^2)$ is	D) 3 : 5	Part B - Aptitude and Mental Ability	Aptitude - Ratio and Proportion. Taking $x = 2$ and $y = 1$ (any pair matching the 2:1 ratio gives the same result), $x^2 - y^2 = 4 - 1 = 3$ and $x^2 + y^2 = 4 + 1 = 5$, so the required ratio is 3:5.
T4-139	Kumaran bought a raincoat and saved Rs. 25 with discount of 20%. What was the original price of the raincoat?	A) Rs. 125	Part B - Aptitude and Mental Ability	Aptitude - Percentage / Discount. The Rs.25 saved is itself the 20% discount, so the original price P satisfies $0.20 \times P = 25$, giving $P = 25/0.20 = \text{Rs. } 125$.
T4-140	If $A = 1, B = 2, C = 3, \dots, Z = 26$ then L.C.M. of H,C,F is not equal to	C) A + C + H	Part B - Aptitude and Mental Ability	Aptitude - LCM. With $H=8, C=3, F=6$, $\text{LCM}(8,3,6) = 24$. Checking each option against 24: X (the 24th letter) = 24, $E+S = 5+19 = 24$, and $A \times C \times H = 1 \times 3 \times 8 = 24$ all match, but $A+C+H = 1+3+8 = 12$ does not, so that option is the one not equal to the LCM.
T4-141	Find the value of $\sqrt{5\sqrt{5\sqrt{5} \dots}}$	D) 5	Part B - Aptitude and Mental Ability	Aptitude - Surds and Indices. Let x denote the infinite nested radical; since the same pattern

				repeats inside, $x = \sqrt{5x}$. Squaring gives $x^2 = 5x$, and dividing by x (x is not 0) gives $x = 5$, i.e. 5^1 .
T4-142	How many great circles can a hemisphere have?	A) 1	Part B - Aptitude and Mental Ability	Aptitude - Geometry (Great Circles). A great circle shares the sphere's centre and radius; a full sphere has infinitely many such circles, but cutting it into a hemisphere leaves only the one that forms the flat circular base, so a hemisphere has exactly 1 great circle.
T4-143	Find the volume of a cylinder whose height is 4 m and whose base area is 500 m ² .	A) 2000 m³	Part B - Aptitude and Mental Ability	Aptitude - Volume (Cylinder). Since the given base area already equals πr^2 , the cylinder's volume is simply base area $\times$ height = $500 \times 4 = 2000$ cubic metres.
T4-144	If $3x + 4y : 4x + 6y = 22 : 32$ then $x : y$ is	A) 1 : 2	Part B - Aptitude and Mental Ability	Aptitude - Ratio. Simplifying 22:32 to 11:16 and cross-multiplying the proportion $(3x+4y)/(4x+6y) = 11/16$ gives $16(3x+4y) = 11(4x+6y)$, i.e. $48x+64y = 44x+66y$, so $4x = 2y$ and $x:y = 2:4 = 1:2$.
T4-145	If the two numbers a and b are in the ratio $m : n$. Then the LCM of a and b is	C) mb	Part B - Aptitude and Mental Ability	Aptitude - LCM / Ratio. Writing $a = mk$ and $b = nk$ where k is the HCF, the identity $\text{LCM} \times \text{HCF} = a \times b$ gives $\text{LCM} = (mk \times nk)/k = mnk$, which regroups as $m \times (nk) = m \times b = mb$.
T4-146	An intelligent man carries 3 sacks with 30 mangoes each. As he crosses each toll, he has to give 1 mango for each sack. He crosses 30 tolls. How many mangoes he will have at the end?	D) 25	Part B - Aptitude and Mental Ability	Aptitude - Logical Reasoning (Optimization). Starting with 90 mangoes in 3 sacks (capacity 30 each), he pays 3 mangoes per toll until the total falls to 60 mangoes, i.e. 30 paid at 3 each = 10 tolls; he then consolidates into 2 sacks and pays 2 per toll until the total falls to 30, i.e. another 30 paid at 2 each = 15 tolls

				(25 tolls used so far); with 30 mangoes left in a single sack, the remaining 5 tolls cost 1 mango each, leaving $30 - 5 = 25$ mangoes.
T4-147	Find the length of the longest pole that can be placed in a room 24 m long, 18 m broad and 16 m high.	C) 34 m	Part B - Aptitude and Mental Ability	Aptitude - Mensuration (Space Diagonal). The longest pole that fits in a cuboid room lies along its space diagonal: $\sqrt{l^2+b^2+h^2} = \sqrt{24^2+18^2+16^2} = \sqrt{576+324+256} = \sqrt{1156} = 34$ m.
T4-148	Identify the teeth absent in milk dentition in mammals.	B) Molars	Unit I - General Science	Mammals are diphyodont, meaning they develop two successive sets of teeth over their lifetime: an initial milk (deciduous) set and a later permanent set. The milk dentition is made up only of incisors, canines and premolars; the molars have no deciduous predecessors at all and erupt directly as part of the permanent set once the jaw has grown large enough to accommodate them. This is why the molars are the teeth missing from the milk dentition. Hence the answer is (B) Molars. This is covered in Class 9 Science, Unit 20 "Organ Systems in Animals".
T4-149	Which of the following food material is translocated by phloem loading?	D) Sucrose	Unit I - General Science	Phloem loading is the energy-driven process by which sugar manufactured in photosynthesising source cells is actively pumped into the sieve tube-companion cell complex so that it can be transported over long distances within the plant. The sugar that is loaded and translocated in this way is overwhelmingly the non-reducing

				disaccharide sucrose, formed from glucose and fructose, because its chemical stability suits it for long-distance transport, unlike free glucose, free fructose or the insoluble storage carbohydrate starch. Hence the answer is (D) Sucrose. This is covered in Class 11 Bio-Botany, Unit 11 "Transport in Plants", section 11.7.5 "Phloem Loading".
T4-150	Which of the following statements are false about "conditions for no Doppler effect"? 1. Listener at rest and Source moves towards the Listener 2. S and L move in such a way that distance between them remains constant 3. S and L are moving in mutually perpendicular directions 4. The Source is situated at the centre of the circle along which the Listener is moving	A) 1 only	Unit I - General Science	The Doppler effect is the apparent change in the frequency of sound heard by a listener whenever the distance between the source (S) and the listener (L) is changing, that is, whenever there is relative motion along the line joining them. No such shift occurs when that separation stays constant: this happens when S and L move so that the distance between them remains fixed, when they move in mutually perpendicular directions, or when the source sits at the centre of the circular path along which the listener travels. Statement 1, where the listener is at rest while the source moves towards it, actually changes the separation and therefore does produce a Doppler effect, so it is wrongly listed as a no-Doppler condition, while statements 2, 3 and 4 correctly describe situations with no Doppler shift. Hence the false statement is (A) 1 only. This is covered in Class 10 Science, Unit 5 "Acoustics",

				section 5.5.1 "Conditions for no Doppler effect".
T4-151	Identify the correctly matched Fossil:	B) Bryophyte – Naiadita	Unit I - General Science	Naiadita is a well-documented fossil liverwort, and liverworts belong to the bryophytes, so the pairing Bryophyte-Naiadita is the correct match among the options given. The other pairings are mismatched: Rhynia is an early vascular land plant of pteridophyte grade, not a gymnosperm; Lepidocarpon is the seed-like reproductive structure of a lycopsid (a pteridophyte-grade plant), not a true pteridophyte fossil paired as stated; and Furcula is not a fossil alga. Hence the answer is (B) Bryophyte - Naiadita.
T4-152	Choose the correct pairs: 1. Phenolphthalein – Colourless in acidic medium and pink in basic medium 2. Methyl orange – Pink in basic medium and yellow in acid medium 3. Red litmus paper – Turns blue in basic medium 4. Blue litmus paper – Turns red in basic medium	B) 1 and 3 are correct	Unit I - General Science	Acid-base indicators change colour according to the pH of the surrounding medium. Phenolphthalein remains colourless in an acidic solution and turns pink in a basic solution, so statement 1 correctly describes its behaviour. Red litmus paper turns blue when placed in a basic medium, so statement 3 is also correct. The remaining two statements are wrong: methyl orange actually turns pink or red in acidic medium and yellow in basic medium, the reverse of what statement 2 claims, and blue litmus paper turns red in an acidic medium, not a basic one, the reverse of what statement 4 claims. Since only statements 1 and 3 hold true, the

				answer is (B). This is covered in Class 8 Science, Unit 14 "Acids and Bases".
T4-153	A fungus causing disease in plants is reported recently to cause infection in man is	B) Chondrostereum purpureum	Unit I - General Science	Chondrostereum purpureum is a fungus long known only as a plant pathogen, causing 'silver leaf' disease in trees such as rose and other rosaceous plants. It gained recent attention because a mycologist who worked closely with such fungal cultures developed a throat infection, and this species, previously never known to infect humans, was identified as the causative organism, making it the first recorded case of a plant-pathogenic fungus causing disease in a person. Hence the answer is (B) Chondrostereum purpureum.
T4-154	Which one of the state has swamp deer as its state animal?	D) Maharashtra	Current Affairs & General Knowledge	The swamp deer or barasingha (<i>Rucervus duvaucelii</i>) is a marsh-dwelling deer named for its many-tined antlers, and it is officially the state animal of Madhya Pradesh and Uttar Pradesh, not any of the four states listed in this question. Maharashtra's actual state animal is the Indian giant squirrel (shekru), Kerala's is the elephant, Nagaland's is the mithun, and Haryana's is the blackbuck, so strictly speaking none of the given options carries the swamp deer as its state animal. The official answer key nonetheless marks the answer as (D) Maharashtra, a factual slip in the key that this explanation notes rather than papers

				over.
T4-155	In which country the 49th G7 summit (2023) was held?	D) Japan	Current Affairs & General Knowledge	The Group of Seven (G7) - comprising the USA, UK, Canada, France, Germany, Italy and Japan - holds an annual summit hosted in rotation by its member states. The 49th G7 summit, held in 2023, was hosted by Japan in Hiroshima from 19 to 21 May, a venue chosen to highlight the cause of nuclear disarmament, and India attended as an invited guest country. Hence the answer is (D) Japan.
T4-156	Choose the correct statements: (i) The Government of India enacted Wildlife Protection Act in 1972. (ii) Project Tiger was launched in April 1974. (iii) The Indian Government has established 16 Biosphere Reserves.	A) (i) only	Unit I - General Science	The Wildlife (Protection) Act was indeed enacted in 1972 to protect wild animals, birds and plants and to establish protected areas, so statement (i) is correct. Project Tiger, India's flagship tiger-conservation programme, was actually launched on 1 April 1973, not 1974 as statement (ii) claims, so that statement is false. India's network of Biosphere Reserves has also grown well beyond 16 over the years as more reserves were notified, so the specific figure of 16 in statement (iii) does not hold either. Since only statement (i) is correct, the answer is (A). This is covered in Class 10 Science, Unit 22 "Environmental Management", which records the 1972 Wildlife Protection Act and the 1973 launch of Project Tiger.
T4-	Indian Railways has introduced a	C) Gajraj Suraksha	Current Affairs &	'Gajraj Suraksha' is an AI-based intrusion-

157	cutting-edge AI based technology called _____ to prevent elephant accidents on railway tracks.		General Knowledge	detection system introduced by Indian Railways to prevent elephant deaths on railway tracks. Optical-fibre sensors laid along vulnerable stretches detect the ground vibrations caused by approaching elephants and send an early alert to the loco pilot and station staff, allowing trains to slow down in known elephant corridors. Hence the answer is (C) Gajraj Suraksha.
T4-158	Which one of the following is the wrong option for the rock-cut cave temple of Gupta period?	C) Elephanta Cave (Maharashtra)	Unit III - History, Culture of India, and Indian National Movement	Rock-cut cave temples of the Gupta age include the caves at Ajanta and Ellora in Maharashtra, the Bagh caves in Madhya Pradesh, and the Udayagiri caves near Vidisha in Odisha, famed for its Varaha sculpture. The Elephanta caves, on an island near Mumbai, are Shaiva in character, built around the celebrated Trimurti sculpture, and belong to the post-Gupta period under later dynasties such as the Kalachuris and Rashtrakutas, so they are not a Gupta-period creation. Since the question asks which option does not belong to the Gupta period, the answer is (C) Elephanta Cave (Maharashtra). This is covered in Class 11 History, Unit 7 "The Guptas", whose review exercise poses this exact question with Elephanta as the answer.
T4-159	_____ started a mass Raksha Bandan festival during Partition of	D) Rabindranath Tagore	Unit III - History, Culture of India, and	During Lord Curzon's 1905 Partition of Bengal, which divided the province along

	Bengal.		Indian National Movement	communal lines and provoked the Swadeshi movement, Rabindranath Tagore turned the traditional festival of Raksha Bandhan into a public gesture of unity. He called on Hindus and Muslims to tie rakhis on each other's wrists as brothers, using the festival to counter British attempts to create a communal divide between the two communities. Hence the answer is (D) Rabindranath Tagore. This is covered in Class 7 History, Unit 2 "Emergence of New Kingdoms in North India", in a box item on the Raksha Bandhan tradition.
T4-160	A king who emerged victorious in all his expeditions and engraved the title Second Alexander on his coins	A) Bahman Shah	Unit III - History, Culture of India, and Indian National Movement	Alauddin Hasan Bahman Shah, also known as Hasan Gangu, revolted against Muhammad bin Tughlaq and founded the Bahmani Sultanate in the Deccan in 1347. Victorious in his campaigns, including securing tribute from Warangal, he adopted the boastful title 'Second Alexander' and had it inscribed on his coins to commemorate his conquests. Hence the answer is (A) Bahman Shah. This is covered in Class 11 History, Unit 12 "Bahmani and Vijayanagar Kingdoms", whose review questions ask students to identify who assumed this title and why.
T4-161	Which among the following inscriptions mention the trade contacts between	C) Cuneiform	Unit III - History, Culture of India, and	Cuneiform, the wedge-shaped script written on clay tablets by the Sumerians and other

	Mesopotamia and Harappan civilisation?		Indian National Movement	Mesopotamian peoples, is the source that records early trade contacts between Mesopotamia and the Harappan world. Mesopotamian cuneiform texts refer to a distant trading region called Meluhha, which historians identify with the Indus (Harappan) civilisation, alongside the lands of Dilmun and Magan, confirming close commercial links between the two civilisations. Devanagari and Kharoshthi are later Indian scripts and hieroglyphics is the Egyptian writing system, so none of them fits the description. Hence the answer is (C) Cuneiform. This is covered in Class 9 History, Unit 2 "Ancient Civilisations", which discusses cuneiform and the Harappan trade links with Mesopotamia through Meluhha.
T4-162	Which of the following statements are true about Directive Principles of state policy? (i) Article 36 to 51 deals with directive principles of state policy. (ii) Dr. B.R. Ambedkar described it as “novel features” of the Indian Constitution. (iii) These principles are enforceable by the courts.	C) (i) and (ii) only	Unit IV - Indian Polity	The Directive Principles of State Policy are laid out in Part IV of the Constitution, spanning Articles 36 to 51, and set out social and economic goals for the state to pursue, so statement (i) is correct. Dr B.R. Ambedkar himself described these principles, borrowed in spirit from the Irish Constitution, as a novel feature of the Indian Constitution, making statement (ii) correct as well. However, under Article 37 the Directive Principles are expressly non-justiciable, meaning courts cannot compel their

				enforcement, so statement (iii) is false. Since only (i) and (ii) hold, the answer is (C). This is covered in Class 10 Social Science Civics, Unit 1 "Indian Constitution", which states that these principles run from Articles 36 to 51 and were called a novel feature by Ambedkar.
T4-163	Arrange the three tier Panchayat Raj system as per the constitutional provisions.	A) Village Panchayat – Intermediate Panchayat – District Panchayat	Unit IV - Indian Polity	The 73rd Constitutional Amendment established a three-tier structure for rural local self-government in India. Moving from the base upward, the structure runs from the Village Panchayat at the village level, through the Intermediate Panchayat at the block level, up to the District Panchayat at the top, which is exactly the order given in option (a). Hence the answer is (A). This is covered in Class 11 Political Science, Unit 12 "Local Governments", p.242, whose review exercise poses this identical question on arranging the three-tier Panchayati Raj system.
T4-164	Assertion [A]: Article 249 of the constitution enables the Parliament to transfer a subject from the state list to the union list. Reason [R]: It is for the purpose of legislation by parliament on grounds of national interest	B) Both [A] and [R] are true; and [R] is the correct explanation of [A]	Unit IV - Indian Polity	Article 249 of the Constitution empowers Parliament to legislate on a subject that ordinarily falls in the State List, but only when the Rajya Sabha first passes a resolution, supported by at least two-thirds of the members present and voting, declaring that such legislation is necessary in the national interest; any law made this way remains in force only for a limited period. This

				confirms that the Assertion is true, since Article 249 does allow Parliament to take up a State List subject, and the Reason is also true and is precisely why this provision exists, so it correctly explains the Assertion. Hence the answer is (B). This is covered in Class 12 Political Science, Unit 5 "Federalism in India", p.88, which describes Article 249 in almost the same words as the Reason given here.
T4-165	Which day is celebrated as overseas Indian's day?	C) January-9	Current Affairs & General Knowledge	Pravasi Bharatiya Divas, or Overseas Indians' Day, is observed on 9 January each year to mark the contribution of the Indian diaspora to the country's development. The date commemorates 9 January 1915, when Mahatma Gandhi, the most celebrated of all overseas Indians, returned to India from South Africa. Hence the answer is (C) January-9. This is covered in Class 8 Social Science Civics, Unit 2 "Citizens and Citizenship", in a box item on Overseas Indians' Day.
T4-166	Who is considered to be the Architect of the Constitution of India?	A) Dr. B.R. Ambedkar	Unit IV - Indian Polity	Dr B.R. Ambedkar is regarded as the chief architect of the Indian Constitution because he chaired the Drafting Committee of the Constituent Assembly and steered the draft Constitution through debate and revision until its adoption. Dr Rajendra Prasad, by contrast, served as President of the Constituent Assembly, while H.C. Mukherjee

				served as its Vice-President, so neither of them held the drafting role that earns Ambedkar this title. Hence the answer is (A) Dr. B.R. Ambedkar. This is covered in Class 6 Social Science Civics, Unit 2 "The Constitution of India", which states that the Chairman of the Drafting Committee, Dr B.R. Ambedkar, was considered the chief architect.
T4-167	The first modernised Jute Industrial Unit was established at _____ in West Bengal in 1855.	D) Rishra	Unit III - History, Culture of India, and Indian National Movement	India's first modern, mechanised jute mill was established in 1855 at Rishra in the Hooghly valley near Calcutta, marking the beginning of organised jute manufacturing in Bengal, an industry that later grew into a major export sector under British capital. Hence the answer is (D) Rishra. This is covered in Class 8 Social Science History, Unit 6 "Development of Industries in India", which states that jute industry was started in 1855 in the Hooghly valley at Rishra near Calcutta.
T4-168	Arrange the chronological order. Following countries got highest point in the human development index in descending order (As on 2016) 1. Norway 2. Switzerland 3. India 4. Australia	A) 1 4 2 3	Unit V - Indian Economy and Development Administration in Tamil Nadu	According to the Human Development Report of 2016, which used 2015 data, Norway held the top position on the Human Development Index, followed by Australia and then Switzerland among very-high-HDI countries, while India ranked far lower, around 130th in the world. Arranging the four countries named from highest to lowest HDI gives Norway, Australia, Switzerland, India, that is, the sequence 1 4 2 3. Hence the answer is (A).

T4-169	Which of the following is incorrectly paired? (i) Taxes on Agricultural income – State (ii) Taxes on land and buildings – State (iii) Taxes on the consumption or sale of Electricity – Centre (iv) Land Revenue – Centre	C) (iii) and (iv)	Unit IV - Indian Polity	Under the Seventh Schedule's State List, taxes on agricultural income and taxes on land and buildings are indeed State subjects, so pairings (i) and (ii) are correctly matched. However, taxes on the consumption or sale of electricity are also a State List subject and not a Central one, so pairing (iii) is wrong, and Land Revenue is likewise a State subject rather than a Central one, so pairing (iv) is wrong too. Since the incorrectly paired items are (iii) and (iv), the answer is (C). This is covered in Class 12 Economics, Unit 9 "Fiscal Economics", which lists Land Revenue, taxes on agricultural income, and taxes on the consumption or sale of electricity together under State sources of revenue.
T4-170	The functional head of NITI Aayog	C) Vice-Chairman	Unit IV - Indian Polity	In NITI Aayog, the body that replaced the Planning Commission in 2015, the Prime Minister holds the position of ex-officio Chairperson while Union Ministers serve as ex-officio members, but the day-to-day functional head of the organisation is the Vice-Chairman, who is appointed by the Prime Minister. Hence the answer is (C) Vice-Chairman. This is covered in Class 12 Economics, Unit 11 "Economics of Development and Planning", which states that the Vice-Chairman of NITI Aayog is its functional head.

T4-171	A woman reformer who was instrumental in Dr. Muthulakshmi's introduction of the Devadasi Abolition Act	A) Moovalur Ramamirtham Ammaiyar	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The devadasi system, under which girls were dedicated to temple service, had degenerated by the early twentieth century into institutionalised exploitation, and Dr Muthulakshmi Reddy, India's first woman legislator, led the movement that culminated in the Madras Devadasis (Prevention of Dedication) Act of 1947. Her closest ally in this reform was Moovalur Ramamirtham Ammaiyar, herself born into a devadasi family, whose novel exposing the cruelty of the system helped build the public support needed for its abolition. Hence the answer is (A) Moovalur Ramamirtham Ammaiyar. This is covered in Class 8 Social Science History, Unit 8 "Status of Women in India through the ages", which names Moovalur Ramamirdham as the woman who fought alongside Dr Muthulakshmi Ammaiyar for the emancipation of devadasis.
T4-172	The author of the book "Why I am an Atheist"?	C) Bhagat Singh	Unit III - History, Culture of India, and Indian National Movement	'Why I Am an Atheist' is a well-known essay written by the revolutionary Bhagat Singh in 1930 while he was imprisoned in Lahore Central Jail awaiting execution in the Lahore Conspiracy Case. In it he reasoned through, without any display of bravado, why his rationalism led him to reject belief in God, arguing that faith may soften suffering but reason should not surrender to it merely for

				comfort. Hence the answer is (C) Bhagat Singh. This is covered in Class 12 History, Unit 5 "Period of Radicalism in Anti-imperialist Struggles", which lists Bhagat Singh's 'Why I am an Atheist' among its cited sources.
T4-173	Name the author of book "Poverty and Un-British Rule in India".	C) Dadabhai Naoroji	Unit III - History, Culture of India, and Indian National Movement	'Poverty and Un-British Rule in India', published in 1901, is the classic work of Dadabhai Naoroji, revered as the 'Grand Old Man of India' and the first Indian elected to the British House of Commons. In it he set out his famous Drain of Wealth theory, arguing that Britain was systematically siphoning off India's resources through home charges and one-sided trade, keeping the country impoverished while claiming to rule it under liberal, 'British' principles that this exploitation actually contradicted. Hence the answer is (C) Dadabhai Naoroji. This is covered in Class 12 Economics, Unit 11 "Economics of Development and Planning", which cites Naoroji's classic work by this title.
T4-174	Which of the following statements are true about Theeran Chinnamalai? (i) Theeran Chinnamalai was a Palayakkarar of Kongu country who fought against the British East India Company.	C) (i) and (ii) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Theeran Chinnamalai was the Palayakkarar of the Kongu region who resisted the English East India Company, so statement (i) is true. He allied with Tipu Sultan of Mysore and received military training from both the French and Tipu's own forces, making statement (ii) true as well. Statement (iii) is

	(ii) He was trained by the French and Tipu. (iii) From 1800 to July 31, 1805 (ie) the day of his hanging, Theeran Chinnamalai ceaselessly fought against the French.			false, however, since his lifelong struggle was directed against the British, not the French, and he was captured and hanged at Sankagiri fort on 31 July 1805. As only (i) and (ii) hold, the answer is (C). This is covered in Class 11 History, Unit 18 "Early Resistance to British Rule", which lists Theeran Chinnamalai among the Palayakkarars of the Kongu region who resisted British rule.
T4-175	Who published the Tamil newspaper Thozhilalan (worker)?	A) M. Singaravelar	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	M. Singaravelar, a pioneering figure in the labour and communist movement in the Madras Presidency, published the Tamil newspaper 'Thozhilalan' (The Worker) to address the problems faced by the working class. He also organised India's first May Day celebration on the Madras beach in 1923 and was closely associated with Periyar and the Self-Respect Movement. Hence the answer is (A) M. Singaravelar. This is covered in Class 10 Social Science History, Unit 10 "Social Transformation in Tamil Nadu", which states that Singaravelar published the Tamil newspaper Thozhilalan to address working-class problems.
T4-176	The LCM of two numbers is 6 times their HCF. If the HCF is 12 and one of the numbers is 36, then find the other number.	A) 24	Part B - Aptitude and Mental Ability	Aptitude - LCM and HCF. The LCM is 6 times the HCF of 12, i.e. 72; since the product of two numbers equals LCM x HCF, the other number is $(72 \times 12)/36 = 864/36 = 24$ (and LCM(36,24) does indeed work out to 72,

				confirming the answer).
T4-177	Pagoda was a ——— coin of Vijayanagar descent.	D) Gold	Unit III - History, Culture of India, and Indian National Movement	The 'Pagoda' was the name given by European traders to the gold coin of the Vijayanagara empire, known in Indian usage as the Varaha or Hun, typically stamped with a deity or the boar emblem of the dynasty. It served as the standard high-value gold currency of South India and was later adopted for trade by European companies operating on the coast. Hence the answer is (D) Gold.
T4-178	Which of the following statements are true about V.O. Chidambaram Pillai? (i) He was a follower of Gopalakrishna Gokhale. (ii) He was known as Chekkiluththa Chemmal. (iii) He founded the servants of India Society. (iv) He was a lawyer.	C) (ii) and (iv) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	V.O. Chidambaram Pillai was a lawyer and Swadeshi leader who founded the Swadeshi Steam Navigation Company at Thoothukudi to break the British shipping monopoly, so statement (iv) is true. He was jailed for sedition after organising a strike and a public meeting, and while in prison he was made to work the heavy oil press, the ordeal that earned him the title 'Chekkiluththa Chemmal', making statement (ii) true as well. He was in fact a follower of the extremist Bal Gangadhar Tilak rather than the moderate Gopalakrishna Gokhale, so statement (i) is false, and the Servants of India Society was founded by Gokhale himself in 1905, not by V.O.C., so statement (iii) is also false. Since only (ii) and (iv) are correct, the answer is (C). This is covered in Class 10 Social Science History, Unit 9 "Freedom Struggle in Tamil

				Nadu", which records V.O.C.'s founding of the Swadeshi Steam Navigation Company and his being made to pull the oil press in prison.
T4-179	The term "Satyaputra" found in the Ashokan Inscription refers to	A) Adiyaman	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Ashoka's third-century BCE inscriptions name the peoples on the southern frontier of his empire as the Cholas, Cheras, Pandyas and the Satiyaputras, alongside the three crowned Tamil dynasties known as the muvendar. The Satiyaputra mentioned here is identified as being the same as the Athiyaman chieftain, a Velir chief celebrated in Sangam poetry and famously patronised by the poetess Avvaiyar, rather than referring to a Chola, Chera or Pandya king. Hence the answer is (A) Adiyaman. This is covered in Class 11 History, Unit 5 "Evolution of Society in South India", which states explicitly that the Satiyaputra of the Ashokan inscription is the same as Athiyaman.
T4-180	What is the meaning of the word "Extinguish" when Valluvar tries to compare lust to "Pouring Ghee to Fire"?	A) Put out	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This line comes from a Thirukkural in the chapter on the announcement of rumour, where Valluvar says that claiming one can quell love through public scandal is as absurd as claiming one can put out a fire by pouring ghee on it, since scandal only inflames passion further rather than extinguishing it. The verb in question, 'nudhuppem', means 'we shall put out' or 'extinguish', so among the given options the sense of 'Extinguish'

				corresponds to 'put out' rather than to a system, a lifespan, or an expertise. Hence the answer is (A) Put out.
T4-181	Which of the traits differentiates all living things from human beings as according to Thiruvalluvar?	A) Actions	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Thiruvalluvar declares in this Kural that by birth all living beings are equal, and what actually sets them apart in distinction and greatness is not caste, lineage, food, dress or place but the nature and quality of the deeds or occupation they pursue. The differentiating factor named in the Kural is therefore action or occupation. Hence the answer is (A) Actions. This is covered in Class 7 Tamil, Term 3, Unit 2 "Thirukkural", which teaches this Kural on the equality of all living beings by birth.
T4-182	Aksai Chin remains a disputed area between China and ——.	B) India	Unit II - Geography of India	Aksai Chin is a high-altitude plateau in the eastern Ladakh sector that is administered by China, forming part of its Xinjiang-Tibet highway link, while India claims it as part of the Union Territory of Ladakh. It is therefore one of the two principal disputed sectors of the Sino-Indian border, the other being Arunachal Pradesh in the east, and the dispute over it lies specifically between China and India. Hence the answer is (B) India. This is covered in Class 12 Political Science, Unit 9 "India and the World", whose glossary describes Aksai Chin as Indian territory in the Ladakh region claimed by China.

T4-183	Assertion [A] : Cement production and consumption continue to grow despite the general recession in the economy. Reason [R] : India is one of the largest cement producers and ranked first in the world.	A) [A] is true but [R] is false	Unit V - Indian Economy and Development Administration in Tamil Nadu	Cement demand in India is driven by long-run infrastructure and housing needs that continue even through cyclical economic slowdowns, so the Assertion that cement production and consumption keep growing despite a general recession is true. The Reason, however, overstates India's position: India is one of the largest cement producers in the world, but it ranks second, after China, not first as the Reason claims. Since the Reason is factually incorrect while the Assertion is true, the pairing cannot be 'both true', so the answer is (A) Assertion is true but Reason is false. This is covered in Class 10 Social Science Geography, Unit 7 "Human Geography of Tamil Nadu", which states in almost identical words that India is one of the largest cement producers and ranks second in the world.
T4-184	Tamil Nadu Government declares ——— as Education Development Day.	C) 15th July	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Government has declared 15 July as 'Education Development Day' (Kalvi Valarchi Naal), marking the birth anniversary of former Chief Minister K. Kamaraj, who is remembered for expanding free and compulsory schooling, opening thousands of new schools, and introducing the mid-day meal scheme that dramatically boosted enrolment among poor children. Commemorating his birthday on this day

				honours his lasting contribution to mass education in the state. Hence the answer is (C) 15th July.
T4-185	Tamil Nadu Gross State Domestic Product (GSDP) has grown at the rate of ——% for the year 2022-2023 as against India's GDP growth rate of 7.24% during the same period.	D) 8.19	Unit V - Indian Economy and Development Administration in Tamil Nadu	According to Tamil Nadu's official economic data for 2022-2023, the state's Gross State Domestic Product grew at 8.19 percent, outpacing the national GDP growth rate of 7.24 percent recorded for India in the same year. This stronger growth reflects the relative strength of Tamil Nadu's manufacturing, services and industrial base compared with the national average. Hence the answer is (D) 8.19.
T4-186	Assertion [A] : “Mangala Malai” scheme was introduced during 2012-2013. Reason [R] : To facilitate the orphan girls to get a suitable bridegroom.	B) Both [A] and [R] are true, [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Mangala Malai scheme is a Tamil Nadu government marriage-assistance scheme introduced in 2012-2013, so the Assertion is true. Its stated purpose, as the Reason explains, is to help orphan and destitute girls secure a suitable bridegroom by removing the financial burden that marriage would otherwise impose on them, which is exactly why such welfare marriage-assistance schemes exist in the first place, so the Reason correctly explains the Assertion. Hence the answer is (B) Both [A] and [R] are true, and [R] is the correct explanation of [A].
T4-187	Who said “Better Bullock carts and freedom than a train deluxe with subjection”?	D) Annie Besant	Unit III - History, Culture of India, and Indian National	The words 'Better bullock carts and freedom than a train deluxe with subjection' were spoken by Annie Besant, the Theosophist

			Movement	leader who founded the Home Rule League in 1916 and ran the newspaper 'New India' from Madras. The remark captures her Home Rule argument that self-government, however modest its immediate material comforts, is preferable to the conveniences enjoyed under foreign rule. Hence the answer is (D) Annie Besant. This is covered in Class 10 Social Science History, Unit 9 "Freedom Struggle in Tamil Nadu", whose review questions ask students to identify who made this exact statement.
T4-188	The H.C.F. of two numbers is 11 and their L.C.M is 693. If one of the number is 77, find the other	C) 99	Part B - Aptitude and Mental Ability	Aptitude - HCF and LCM. Using the identity product of two numbers = HCF x LCM, the other number is $(11 \times 693)/77 = 7623/77 = 99$.
T4-189	A merchant has 120 ltrs and 180 ltrs of two kinds of oil. He wants to sell oil by filling the two kinds of oil in tins of equal volumes. What is the greatest capacity of such a tin?	C) 60 ltrs	Part B - Aptitude and Mental Ability	Aptitude - HCF. The largest tin that can empty both quantities exactly must equal HCF(120,180); factorising, $120 = 2^3 \times 3 \times 5$ and $180 = 2^2 \times 3^2 \times 5$, so $HCF = 2^2 \times 3 \times 5 = 60$ litres.
T4-190	If $1^3 + 2^3 + 3^3 + \dots + K^3 = 72900$ then find $1 + 2 + 3 + \dots + K$.	C) 270	Part B - Aptitude and Mental Ability	Aptitude - Sum of Cubes / Series. Using the identity that the sum of the first K cubes equals the square of the sum of the first K natural numbers, $(\text{sum of } n)^2 = 72900$, so the sum of $n = \sqrt{72900} = 270$.
T4-191	In the series 2, 3, 5, 9, x, 33, y, what is the value of $x + y$?	D) 82	Part B - Aptitude and Mental Ability	Aptitude - Number Series. The gaps between consecutive terms double each time

				(1,2,4,8,...): $3-2=1$, $5-3=2$, $9-5=4$, so $x = 9+8 = 17$ (checked against $33 = 17+16$), and $y = 33+32 = 65$, giving $x+y = 17+65 = 82$.
T4-192	When we write AZBYCX YBZA how many consonants will appear to the left of the vowels?	C) 9	Part B - Aptitude and Mental Ability	Aptitude - Letter Series / Reasoning. Writing out the full 52-letter string (A Z B Y C X ... M N N M ... Y B Z A), every vowel except the very first letter A (which has no left neighbour) is immediately preceded by a consonant - E after W, U after F, I after S, O after L, O after M, I after R, U after G, E after V, and the closing A after Z - giving exactly 9 such consonants.
T4-193	If Rameela says, "Ragavi's father Raman is the only son of my father-in-law Ramanathan", then how is Ramani, who is the sister of Ragavi, related to Ramanathan?	D) Grand Daughter	Part B - Aptitude and Mental Ability	Aptitude - Blood Relations. Since Raman is Ramanathan's only son, Raman is Rameela's husband; as Raman is the father of both Ragavi and her sister Ramani, Ramani is Raman's daughter, which makes her Ramanathan's granddaughter.
T4-194	3 men and 4 women can earn Rs. 3,780 in 7 days. 11 men and 13 women earn Rs. 15,040 in 8 days. In what time will 7 men and 9 women earn Rs. 12,400?	C) 10 days	Part B - Aptitude and Mental Ability	Aptitude - Wages / Time and Work. From $3m+4w = 3780/7 = 540$ and $11m+13w = 15040/8 = 1880$, solving the two equations gives $m = \text{Rs.}100$ and $w = \text{Rs.}60$ per day; 7 men and 9 women then earn $7 \times 100 + 9 \times 60 = \text{Rs.}1,240$ per day, so earning Rs.12,400 takes $12400/1240 = 10$ days.
T4-195	For the principal Rs.10,000 the rate of interest is 15 p.a. for 3 years. Find the difference between C.I and S.I.	C) 708.75	Part B - Aptitude and Mental Ability	Aptitude - Compound & Simple Interest. For 3 years, $CI - SI = P(r/100)^2(3+r/100)$; with $P=10,000$ and $r=15\%$, this is $10000 \times 0.0225 \times 3.15 = 225 \times 3.15 = \text{Rs. } 708.75$.

T4-196	A person takes a loan of Rs.2,000 at 6% simple interest. He returns Rs.1,000 at the end of one year. In order to clear his dues at the end of 2 years how much he would pay?	B) Rs. 1,180	Part B - Aptitude and Mental Ability	Aptitude - Simple Interest. The full 2-year amount on the original loan would be $2000 + (2000 \times 2 \times 6)/100 = \text{Rs.}2,240$; the Rs.1,000 repaid a year early is credited with a further year's interest, $1000 + (1000 \times 1 \times 6)/100 = \text{Rs.}1,060$, so the balance still owed at the end of year 2 is $2240 - 1060 = \text{Rs. } 1,180$.
T4-197	Vignesh borrows Rs.10,000 for 2 years at 4% p.a. simple interest. He lends it to Sanjay at 6% p.a. for 2 years. Find his gain in this transaction per year.	A) 200	Part B - Aptitude and Mental Ability	Aptitude - Simple Interest / Gain. Vignesh earns interest at 6% but pays only 4% on the same Rs.10,000 principal, so his yearly gain is simply the rate difference applied to the principal: $10000 \times (6-4)/100 = \text{Rs. } 200$ per year.
T4-198	Find the ratio between HCF and LCM of the numbers 7 and 13.	A) 1 : 91	Part B - Aptitude and Mental Ability	Aptitude - HCF and LCM. Since 7 and 13 are both prime, they are co-prime, so $\text{HCF}(7,13) = 1$ and $\text{LCM}(7,13) = 7 \times 13 = 91$, giving the ratio $\text{HCF}:\text{LCM} = 1:91$.
T4-199	Kayal bought 5 dozen eggs. Out of that 45 eggs are good eggs. Express the number of rotten eggs in percentage.	C) 25%	Part B - Aptitude and Mental Ability	Aptitude - Percentage. Five dozen eggs total 60; with 45 good eggs, the rotten count is $60 - 45 = 15$, and expressing this as a percentage of the total gives $(15/60) \times 100 = 25\%$.
T4-200	If Sunday = 2, Tuesday = 3, Thursday = 2. What is the value of Monday?	B) 2	Part B - Aptitude and Mental Ability	Aptitude - Coding-Decoding. Each day's code equals the number of vowels in its name: Sunday (u,a) = 2, Tuesday (u,e,a) = 3, and Thursday (u,a) = 2 all confirm the rule; Monday contains the vowels o and a, so its value is 2.

TNPSC MENTORS

TNPSC Exam Preparation in Tamil & English

www.tnpscmentors.in

You've finished the answer key - keep the momentum going!

Everything you need to turn this practice into a rank is already waiting for you in the TNPSC Mentors app.

- Test Series - full-length mock exams (Group 1 Test Marathon and more)
- PYQ Practice - previous year papers with bilingual explanations
- Daily Current Affairs - daily quiz plus a monthly magazine
- Smart Revision - practice that adapts to your weak topics
