				12, 0, 1, (C)
T4-100	‘ , ?	C)	General Tamil Ilakkiyam (Literature)	576- : () (C)
T4-101	Match the following: (a) Financial Assistance to Dependent children (b) Maintenance of Orphan and Destitute Girls (c) Foster Care Services Scheme (d) State After-Care Home for Boys 1. Between the age group of 18 and 21 years 2. Providing destitute, orphan and unattached children 3. Children below the age of 16 years 4. Children between the age of 6 and 16 years	C) (a)-3 (b)-4 (c)-2 (d)-1	Unit V - Indian Economy and Development Administration in Tamil Nadu	These four items name distinct child-welfare schemes administered by Tamil Nadu's Department of Social Defence within its child-protection network, each defined by the age group and circumstance of the children it serves. Financial Assistance to Dependent Children supports children below 16 who have lost the family's breadwinner, letting them stay with a guardian rather than enter an institution. Maintenance of Orphan and Destitute Girls cares for orphaned or abandoned girls aged 6 to 16 in government homes, while the Foster Care Services Scheme places destitute, orphaned or unattached children in a substitute family setting instead of an institution. The State After-Care Home for Boys, by contrast, rehabilitates boys aged 18 to 21 who have

				outgrown children's homes, helping them transition into independent adult life. Matching each scheme to its target age group in this way gives (a)-3, (b)-4, (c)-2, (d)-1, so the correct answer is (C).
T4-102	As per the Tamilnadu Economic Survey of 2024-2025. Arrange the following in the ascending order based on the productivity. (1) Paddy productivity (2) Maize productivity (3) Oil seeds, Groundnut and Sugarcane productivity	A) (1) (2) (3)	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Economic Survey 2024-25 records the state's comparative rank among Indian states for different crops rather than a single uniform standing: Tamil Nadu is placed 3rd in paddy productivity, 2nd in maize productivity, and 1st in the combined productivity of oilseeds, groundnut and sugarcane. Since the question asks for the ascending order of productivity performance, the sequence runs from the crop where Tamil Nadu's relative standing is weakest to where it is strongest, i.e. paddy (3rd) before maize (2nd) before the oilseeds-groundnut-sugarcane group (1st). This gives the order (1) then (2) then (3), so the answer is (A).
T4-103	Find out the Incorrect statement(s) about the Tamilnadu Health System Reform Program (TNHSRP) (i) This program was supported by World Bank. (ii) This program is sponsored by the Central and State Government in the ratio of 60 : 40.	C) (ii) and (iv) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Health System Reform Programme (TNHSRP) is a roughly US\$287-million project financed with World Bank assistance and structured on a 'Program-for-Results' basis, under which the state releases funds against independently verified health outcomes rather than fixed inputs; it is carried out by the state's own Department of Health and Family Welfare. Its stated goals

	(iii) It is implemented by the Department of Health and Family Welfare of Tamilnadu on Program for Results basis. (iv) This program aims to achieve the goal of SDG 9.			are to improve the quality of care, reduce the burden of non-communicable diseases and narrow health inequities across the state, which places it under SDG 3 (Good Health and Well-being) rather than SDG 9 (Industry, Innovation and Infrastructure). It is therefore a World Bank-supported programme rather than one jointly sponsored by the Centre and State in a fixed 60:40 funding ratio. Since the World Bank support and the Program-for-Results implementation by the Health Department are both accurate, while the 60:40 funding claim and the SDG 9 goal are not, the incorrect statements are (ii) and (iv), making (C) the answer.
T4-104	Assertion [A] : In 1892, Tremenhreere report was accepted by the Government for increasing the income of the Government, to allot the poramboke land to down trodden community. Reason [R] : In Chengalpet, the Panchamer Schools were run by the Philanthropic individuals in Panchami Land for promoting Education for downtrodden community people.	A) [A] is true [R] is false	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	J.H.A. Tremenhreere, the Collector of Chengalpet, submitted a report on the depressed communities of his district, documenting their landlessness, exclusion from education and reduced circumstances, and recommending that government waste (poramboke) land be assigned to them; the Government accepted this recommendation in 1892 and distributed some 12 lakh acres of such land, which came to be called "Panchami" land, with associated "Panchamer" schools set up for the same communities. Though the surviving excerpts of the report do frame the proposal partly as a

				way of raising the government's own revenue from otherwise barren land, the better-attested underlying motive was the socio-economic upliftment of the depressed classes, so the assertion's revenue framing is best read as an incidental detail rather than the central historical fact. The reason, however, does not correctly describe the Panchami-land measure: the land grants were meant for cultivation and livelihood, not as sites where philanthropists ran the Panchamer schools, so [R] does not explain [A]. Hence [A] is true and [R] is false, giving answer (A). This is covered in Class 11 Political Science, Unit 13 "Social Justice", p.254.
T4-105	Identify the incorrectly paired matches : (1) Lokpal and Lokayuktas Act came into force – January 16th, 2014 (2) Tamil declared as Classical Language – Oct 10, 2004 (3) Election Commission of India – Article 324 (4) National Integration Council in India – 1960	B) (2) and (4)	Unit IV - Indian Polity	Checking each pairing: the Lokpal and Lokayuktas Act, 2013 received presidential assent on 1 January 2014 and came into force on 16 January 2014, so pairing (1) is correct, and the Election Commission of India is indeed established under Article 324 of the Constitution, so pairing (3) is correct. Tamil was granted classical-language status in 2004, but the notification date was 12 October 2004, not 10 October as stated, so pairing (2) is wrong; and the National Integration Council was set up in 1961, following the National Integration Conference convened by Prime Minister Nehru, not in

				1960, so pairing (4) is also wrong. The incorrectly paired items are therefore (2) and (4), making (B) the answer. This is covered in Class 10 Social Science Civics, Unit 1 "Indian Constitution", which records Tamil's classical-language recognition in 2004.
T4-106	The purpose of "Surya Ghar Muft Bijli Yojana" is	A) Installing roof top solar	Current Affairs & General Knowledge	PM Surya Ghar: Muft Bijli Yojana is a central scheme launched in February 2024 to promote solar power generation in Indian homes by subsidising the installation of rooftop solar panels. Its aim is to give around one crore households up to 300 units of free electricity every month, which lowers household power bills while expanding the country's renewable-energy capacity. Since the scheme's entire purpose centres on rooftop solar installation rather than housing, insurance or industrial finance, the answer is (A).
T4-107	Assertion [A] : Zamindari system was created by the East India Company when in 1793. Lord Cornwallis entered into permanent settlement. Reason [R] : Under the settlement, the landlords were declared full properties large areas of land.	D) Both [A] and [R] are true, but [R] is the correct explanation of [A]	Unit III - History, Culture of India, and Indian National Movement	The Permanent Settlement was introduced in Bengal in 1793 by Governor-General Lord Cornwallis, changing what had earlier been an annual or five-yearly land-revenue arrangement into one fixed in perpetuity. Under it the East India Company recognised the zamindars as the owners of the land so long as they paid a fixed revenue regularly, letting them keep any surplus collected beyond that amount while risking forfeiture if

				they defaulted. This is exactly how the zamindari system came into being, so the assertion that the Company created the zamindari system through Cornwallis's 1793 settlement is true, and the reason, that landlords were declared full proprietors of large tracts of land, is not just true but is precisely the mechanism that produced the system described in the assertion. Since both statements are true and the reason correctly explains the assertion, the answer is (D). This is covered in Class 8 Social Science History, Unit 3 "Rural Life and Society".
T4-108	Assertion [A] : Goods and Services Tax in India is a comprehensive, multistage, destination-based tax that is levied on every value addition. Reason [R] : The moto is 'One Tax, One Market, One Nation'.	B) Both [A] and [R] are true; and [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	India's Goods and Services Tax, rolled out on 1 July 2017, is multi-stage because it is levied at every stage of the supply chain, value-added because tax applies only to the value added at each stage (with credit for tax already paid earlier), and destination-based because revenue accrues to the state where goods or services are finally consumed, so the assertion accurately describes it. Its guiding slogan, "One Nation, One Tax, One Market", captures the idea of a single unified national market that GST was designed to create, so the reason is also a true statement about GST. Strictly speaking, the slogan is more a description of GST's political and economic purpose than a technical explanation of why

				the tax is multi-stage, value-added and destination-based, so treating it as the full explanation is arguable; but the key pairs the two together as cause and description, giving answer (B). This is covered in Class 7 Social Science Economics, Term 3, Unit 1 "Tax and its Importance", which records the same 'One Tax, One Market, One Nation' slogan for the 2017 GST rollout.
T4-109	Arrange the following Finance Ministers of Tamil Nadu according to the Budget Year (Chronological Order) 1. Mr. Paneerselvam 2. Dr. Nedunchezhiyan 3. Mr. Palanivel Thiagarajan 4. Mr. Thangam Thennarasu	C) 2 1 3 4	Unit V - Indian Economy and Development Administration in Tamil Nadu	Ordering these leaders by the years in which they actually presented Tamil Nadu's budget: Dr V.R. Nedunchezhiyan served as Finance Minister in the DMK governments of the 1970s and 1980s (and again around 1989-91), making him the earliest of the four. O. Panneerselvam presented budgets for the AIADMK government across stints in the 2000s and 2010s, followed chronologically by Palanivel Thiagarajan (PTR), who held the post from 2021 and presented the 2021-2023 budgets, and finally Thangam Thennarasu, who took charge in 2023 and has presented the budgets from 2024 onward. Arranged this way the sequence is Nedunchezhiyan, Panneerselvam, Thiagarajan, Thennarasu, i.e. 2-1-3-4, so the answer is (C).
T4-110	Assertion [A] : The plan period 1966 - 69 were called as "Annual plans or plan holiday".	C) Both [A] and [R] are true, but [R] is the correct explanation of	Unit V - Indian Economy and Development	After the Third Five-Year Plan (1961-66) fell short of its targets, India did not immediately launch a Fourth Plan; instead the three years

	Reason [R] : Because of the two major conflicts with China and Pakistan.	[A]	Administration in Tamil Nadu	from 1966-67 to 1968-69 were run as Annual Plans, a period remembered as the "Plan Holiday", so the assertion is true. This pause was driven directly by the resource strain of the wars with China in 1962 and Pakistan in 1965, compounded by successive monsoon failures, drought and the 1966 rupee devaluation, leaving too little fiscal room to commit to a fresh five-year plan. Because the two wars are the specific cause of the resource diversion that forced the Annual Plans, the reason correctly explains the assertion, giving answer (C). This is covered in Class 11 Economics, Unit 8 "Indian Economy Before and After Independence", which attributes the Plan Holiday to the Indo-Pakistan war and the failure of the Third Plan.
T4-111	Statement : Thiruvalluvar has captured certain features like pride and administration of the Three Great Kings (Moovendhar) in his couplets. Reason : Thiruvalluvar wanted to portray the administrative skills of Kings.	D) Statement is incorrect but Reason is correct	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Thirukkural is deliberately written as a universal text: Thiruvalluvar sets out virtue, statecraft and love in general terms that hold for all people at all times, which is precisely why it is honoured as the "Ulaga Pothumarai" (universal scripture), and he pointedly avoids naming any specific king, dynasty or place, including the Tamil Moovendhar (the Chera, Chola and Pandya). The statement that he recorded the pride and administrative skill of these three specific kings in his couplets is

				therefore incorrect. The reason, however, is sound: the Porutpaal section discusses kingship, ministership and governance at length, showing that Valluvar did mean to set out the qualities of good rulers in general, even without naming any of them. Since the statement is wrong but the reason is correct, the answer is (D). This is covered in Class 11 Tamil, Unit 3 " ".
T4-112	Give the chapter No. _____ in Thirukkural that talks about Ascetic Virtues.	B) 13	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Thirukkural's first book, Arathuppaal (Virtue), is divided into four iyals: Paayiraviyal, Illaraviyal (domestic virtue), Thuravaraviyal (ascetic virtue) and Ooziyal. The Thuravaraviyal section runs from the 25th chapter (Aruludaimai) to the 37th chapter (Avaavaruthal), covering thirteen chapters and 130 couplets that deal with the ethics of renunciation and asceticism. Since the number of chapters devoted to ascetic virtue is thirteen, the answer is (B). This is covered in Class 12 Tamil, Unit 3 " ", whose chapter table lists Thuravaraviyal as 13 chapters.
T4-113	Who is the author of "Valluvarum Kuralum"?	B) Ki.Aa.Pe. Vishwanatham	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	"Valluvarum Kuralum" ("Valluvar and the Kural") was written by Ki.Aa.Pe. Visuvanatham (K.A.P. Viswanatham, 1899-1994), a Tiruchi-based Tamil scholar honoured with the title "Muttamizh Kaavalar" for his lifelong studies of Thirukkural and

				Tamil literature. Since this well-known work of Kural scholarship is his, the answer is (B).
T4-114	Who was the first to draw the portrait of Thiruvalluvar?	B) Venugopala Sharma	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The now-familiar imaginary portrait of Thiruvalluvar, shown as a sage in white robes holding a palm-leaf manuscript, was first painted by the artist K.R. Venugopala Sharma. Commissioned around 1959 at the instance of the poet Bharathidasan and composed using clues drawn from the Kural itself, the image was formally accepted by Tamil scholars in 1960 and has remained the standard representation ever since. Since Venugopala Sharma was the artist who first drew this portrait, the answer is (B).
T4-115	Choose the right matches. (1) New India - Bharathi (2) Thesapakthan - V.V. Subramanian (3) Nava Sakthi - Thiru. V. Kalyanasundaram (4) The Hindu - G. Subramaniam	B) (2) and (3) are correct	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Checking each pairing: Navasakthi, the Tamil weekly, was founded in 1920 by Thiru.Vi. Kalyanasundaranar (Thiru.Vi.Ka), which makes pairing (3) correct, and Desabhaktan (1917-1921), a nationalist Tamil paper, counted V.V. Subramania Aiyar among its noted editors, which makes pairing (2) correct as well. Pairing (1) is wrong because New India was Annie Besant's English paper, not Bharathi's, who instead edited 'India' and Swadesamitran. Pairing (4) is more debatable than it looks: The Hindu was indeed founded in 1878 by G. Subramania Iyer, so that pairing is not really false on the facts either, but the key treats (2) and (3) as the intended

				correct matches rather than (4), so the answer taken is (B).
T4-116	Which of the following statements are true about the Theosophical Movement? (i) The Theosophical society was founded by Madam Blavatsky and Col. H.S. Olcott in New York. (ii) In 1888 Mrs. Annie Besant joined the society in India. (iii) The headquarters of the society in Adyar.	C) (i) and (iii)	Unit III - History, Culture of India, and Indian National Movement	The Theosophical Society was founded in New York in 1875 by Madame H.P. Blavatsky and Colonel H.S. Olcott, confirming statement (i), and it later shifted its headquarters to Adyar in Chennai in 1886, confirming statement (iii). Statement (ii) does not hold: Annie Besant became president of the Society only after Olcott's death in 1907, having herself joined the movement in England around 1889 rather than in India in 1888. The true statements are therefore (i) and (iii), giving answer (C). This is covered in Class 10 History, Unit 5 "Social and Religious Reform Movements in the 19th Century".
T4-117	Assertion [A] : E.V.R. Periyar started the Self-Respect Movement in 1925. Reason [R] : New India was the official Newspaper of the Self-Respect Movement.	A) [A] is true, but [R] is false	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Periyar E.V. Ramasamy founded the Self-Respect Movement in 1925 after breaking with the Congress, to fight caste hierarchy and promote rationalism and social equality, so the assertion is true. The movement's own mouthpiece was Kudi Arasu, which Periyar started in 1925 and used to publish his views on social issues in almost every issue; New India, by contrast, was Annie Besant's paper and had no connection with the Self-Respect Movement. Since the assertion is true but the reason wrongly identifies the movement's newspaper, the answer is (A). This is covered

				in Class 10 History, Unit 10 "Social Transformation in Tamil Nadu", which names Kudi Arasu as the Self-Respect Movement's official paper.
T4-118	Consider the following statements and Identify the wrong answers (1) On 1st September 1798 Major Bannerman served an ultimatum directing Kattabomman to see him at Palayamkottai. (2) Kattabomman's Fort 500 feet long and 300 feet broad, was constructed entirely of Mud. (3) On September 16, 1799 Veera Pandiya Kattabomman was tried before an assembly of Palayakkarars at Kayatar. (4) On 1st June, 1799 Kattabomman, attended by 500 men, proceeded to Sivagangai.	C) (1) and (3) are wrong	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The decisive events in the British campaign against Veerapandiya Kattabomman of Panchalankurichi took place in 1799, not 1798: Major Bannerman's ultimatum ordering Kattabomman to present himself at Palayamkottai was issued on 1 September 1799, and Kattabomman was tried before an assembly of Palayakkarars at Kayathar and hanged on 16 October 1799, not 16 September, making statements (1) and (3) incorrect on their dates. Statement (2) is accurate: his Panchalankurichi fort measured about 500 feet by 300 feet and was built entirely of mud, and statement (4) is also accurate, since he marched towards Sivaganga with roughly 500 men on 1 June 1799 to meet the Marudu brothers. Since only (1) and (3) are wrong, the answer is (C). This is covered in Class 11 History, Unit 18 "Early Resistance to British Rule".
T4-119	Which of the following statements are true? (1) Congress boycotted the election which was held in 1923 in Chennai.	D) (1), (2), (3) are correct	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Under the dyarchy introduced by the Montagu-Chelmsford reforms, the Justice Party won the first provincial election of 1920 and went on to hold office continuously from 1920 to 1937, including through the 1923

	(2) Swaraj Party won 11 seats. (3) Justice Party formed Ministry in Chennai. (4) Kamaraj led the Non-Co-operation movement in Chennai.		Nadu	Madras Legislative Council election, which supports statement (3). Congress, following its non-cooperation stance adopted after 1920, continued to boycott council elections including that of 1923, confirming statement (1), while the pro-council-entry Swaraj Party, formed within Congress in 1923, contested and won seats in these elections, confirming statement (2). Statement (4) does not hold, however, since the Non-Cooperation Movement of 1920-22 in Madras was led by national and provincial Congress leaders rather than by Kamaraj, who was then still a young party volunteer. The true statements are therefore (1), (2) and (3), giving answer (D). This is covered in Class 10 History, Unit 10 "Social Transformation in Tamil Nadu", which records the Justice Party's continuous rule from 1920 to 1937.
T4-120	Match the following: (a) Karaikkal Ammaiyar (b) Andal (c) Aranganadha Mudaliyar (d) Seraman Perumal Nayanar 1. Thiruvantadi 2. Kachhikalambagam 3. Pavaippattu 4. Moothathiruppathigangal	C) (a)-4 (b)-3 (c)-2 (d)-1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This item matches Bhakti-era poets to their works. Karaikkal Ammaiyar, the earliest and one of only three women among the 63 Saiva Nayanmars, composed hymns to Siva known as the Mootha Thiruppathigangal, giving (a)-4. Andal, the sole woman among the twelve Vaishnava Azhwars, is celebrated for the Thiruppavai, thirty verses inviting maidens to observe the 'pavai' vow, popularly called the Pavaippattu, giving (b)-3. Aranganatha

				Mudaliyar composed the Kachchikkalambagam, a kalambagam-genre work devoted to Kanchi, giving (c)-2, while Cheraman Perumal Nayanar, the Chera king-saint and friend of Sundarar, composed antadi-form hymns known as Thiruvantadi, giving (d)-1. Matching each poet to their work this way gives (a)-4 (b)-3 (c)-2 (d)-1, so the answer is (C). This is covered in Class 7 History, Term 3, Unit 1 "New Religious Ideas and Movements", which records Andal as the only female Azhwar and author of the Thiruppavai.
T4-121	Which of the following statements are true about Sivakalai excavation? (i) Sivakalai excavation located in North shore of river Thamiraparani. (ii) Tamil society lived in Sivakalai considered very ancient. (iii) Copper and gold goods are found.	C) (i) and (ii) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Sivakalai is a Sangam-age urn-burial site on the bank of the river Thamiraparani in present-day Thoothukudi district, confirming statement (i). A paddy sample recovered from a burial urn there was radiocarbon-dated to about 1155 BCE by a Miami-based laboratory, among the oldest such dates yet obtained in Tamil Nadu, which is why the Tamil society that lived at Sivakalai is regarded as very ancient, confirming statement (ii). The urns excavated across this Thamiraparani cluster of sites (Adichanallur, Sivakalai and Korkai) have generally yielded gold, high-tin bronze and iron objects together, though which exact metals came specifically from Sivakalai as opposed to the

				neighbouring Adichanallur site is not always separated out in the reports, making the specific claim of gold finds at Sivakalai somewhat less firmly established than the site's dating. Since statements (i) and (ii) are the ones treated as definitely true, the answer is (C). This is covered in Class 9 History, Unit 3 "Early Tamil Society and Culture".
T4-122	What is the crucial role played by noncoding RNA's?	C) gene regulation	Unit I - General Science	Non-coding RNAs are RNA molecules that are transcribed from DNA but never translated into protein, a category that includes tRNA, rRNA, microRNA, siRNA and long non-coding RNA. Unlike messenger RNA, they carry no protein-coding message; instead they switch genes on or off and influence transcription, splicing and translation, making gene regulation their crucial biological role. Hence the answer is (C).
T4-123	Choose the right matches among the following: (1) Five Kingdom System — R.H. Whittaker (2) Six Kingdom System — Carl Woese, et al (3) Four Kingdom System — Carl Linnaeus (4) Three Kingdom System — Ernst Haeckel	B) (1), (2) and (4) are correct	Unit I - General Science	R.H. Whittaker proposed the Five-Kingdom system in 1969 (Monera, Protista, Fungi, Plantae, Animalia), so pairing (1) is correct, and Carl Woese and his co-workers proposed the Six-Kingdom system in 1990 by splitting Monera into Archaeobacteria and Eubacteria, so pairing (2) is correct. Ernst Haeckel proposed the Three-Kingdom system in 1866 (Protista, Plantae, Animalia), so pairing (4) is also correct, but Carl Linnaeus is credited with the Two-Kingdom system of 1735

				(Plantae and Animalia) rather than a Four-Kingdom system, which was instead proposed by Copeland in 1956, so pairing (3) is wrong. The correct pairs are therefore (1), (2) and (4), giving answer (B). This is covered in Class 11 Bio-Botany, Unit 1 "Diversity of Living World", p.8, whose classification table lists Linnaeus (Two Kingdom, 1735), Haeckel (Three Kingdom, 1866) and Whittaker (Five Kingdom, 1969).
T4-124	0.10 M of weak acid is found to be dissociated to the extent of 1.20% at 25°C. Its dissociation constant is	C) 1.44×10^{-5}	Unit I - General Science	For a weak acid of concentration C dissociating to a small degree α , Ostwald's dilution law gives the dissociation constant as K_a is approximately C times α squared. Here $C = 0.10$ M and $\alpha = 1.20\% = 0.012$, so α squared = 1.44×10^{-4} and $K_a = 0.10 \times 1.44 \times 10^{-4} = 1.44 \times 10^{-5}$. Hence the answer is (C) 1.44×10^{-5} . This is covered in Class 12 Chemistry (Volume 2), Unit 8 "Ionic Equilibrium", p.12.
T4-125	The GSLV-F15 is launched on _____ by ISRO.	A) January 29, 2025	Current Affairs & General Knowledge	GSLV-F15 was the ISRO launch-vehicle mission that carried the NVS-02 navigation satellite, part of the NavIC constellation, into orbit from the Satish Dhawan Space Centre at Sriharikota on 29 January 2025, a flight also notable as ISRO's 100th launch from that spaceport. Hence the answer is (A) January 29, 2025.
T4-	Which of the following is incorrectly	C) (3) only	Unit II - Geography of	The Canadian Pacific Railway runs across

126	matched? (1) Trans Siberian Railway line — It connects Baltic Sea and Pacific Ocean (2) Trans Caspian Railway line — It connects Central Asia and Japan (3) Canadian Pacific Railway line — It connects Atlantic Ocean and Indian Ocean (4) Trans-Continental Railway line — It connects Buenos Aires with Valparaiso		India	Canada linking the Atlantic seaboard around Montreal and Halifax with the Pacific coast at Vancouver, so it connects the Atlantic and Pacific Oceans rather than the Atlantic and the Indian Ocean, making pairing (3) the one that is wrongly matched. The Trans-Siberian Railway does link the Baltic region to the Pacific port of Vladivostok as pairing (1) states, and the Trans-Continental (Trans-Andean) line does connect Buenos Aires with Valparaiso as pairing (4) states; pairing (2) is also questionable in much the same way, however, since the Trans-Caspian line runs through Central Asia and does not itself reach Japan, so more than one pairing here could arguably be challenged. Taking pairing (3) as the one intended to be identified, the answer is (C).
T4-127	Who among the following was the Indian Prime Minister when the 42nd Amendment Act was passed?	C) Indira Gandhi	Unit IV - Indian Polity	The 42nd Constitutional Amendment Act was passed in 1976 during the Emergency, adding "Socialist", "Secular" and "Integrity" to the Preamble and introducing the Fundamental Duties in Part IVA, changes sweeping enough for it to be called the "Mini-Constitution". This amendment was enacted by the government of Prime Minister Indira Gandhi, who was in office throughout the Emergency period. Hence the answer is (C) Indira Gandhi. This is covered in Class 12

				Political Science, Unit 1 "Constitution of India", which states that Indira Gandhi enacted the 42nd Amendment in 1976 during the National Emergency.
T4-128	Assertion [A] : The Pallavas constructed the Cave temples without brick, wood, metal and sudhai. Reason [R] : The stones kept one upon another and not bound with plaster is known as "Katralligal".	C) Both [A] and [R] are true	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	From Mahendravarman I in the early seventh century CE, the Pallavas pioneered cave temples carved directly out of hillsides; his Mandagapattu inscription proudly records that a temple to Brahma, Ishvara and Vishnu was built there without brick, timber, metal or mortar, so the assertion is true. Structural stone temples, where dressed blocks are placed one over another without any binding mortar, came to be called "Katralligal" (kal + thali), a term exemplified by later Pallava structures such as the Kanchi Kailasanathar temple, so the reason is also a correct statement. Since both the assertion and the reason are accurate descriptions of Pallava building practice, the answer is (C). This is covered in Class 11 Tamil, Unit 6 " ", which describes Mahendravarman's brick-free, timber-free cave temples and defines Katralli construction.
T4-129	Choose the wrong pair : (1) South Dravidan Language — Malayalam (2) East Dravidan Language — Munda	B) (2)	Unit II - Geography of India	Malayalam is a South Dravidian language, Telugu belongs to the Central/South-Central Dravidian group, and Kurukh belongs to the North Dravidian group, so pairings (1), (3) and (4) are all correctly matched. Munda,

	(3) Central Dravidan Language — Telugu (4) North Dravidan Language — Kuruk			however, is not a Dravidian language at all: it belongs to the Austric (Austroasiatic) family alongside languages like Mon-Khmer, so pairing it with "East Dravidian" is wrong. Hence the wrong pair is (2), giving answer (B). This is covered in Class 12 Geography, Unit 5 "Cultural and Political Geography", which classifies Munda under the Austric family and Kurukh under Dravidian.
T4-130	Assertion [A] : Rabindranath Tagore surrendered his knighthood. Reason [R] : On 13th April 1919 Jalianwala Bagh Massacre occurred in Amritsar.	B) Both [A] and [R] are true and [R] is the correct explanation of [A]	Unit III - History, Culture of India, and Indian National Movement	On 13 April 1919, troops under General Reginald Dyer opened fire on an unarmed gathering at Jallianwala Bagh in Amritsar, killing hundreds, so the reason is a true statement. In protest against this massacre, Rabindranath Tagore renounced the knighthood conferred on him by the British, writing to Viceroy Lord Chelmsford on 31 May 1919 that he wished to stand "shorn of all special distinctions" alongside his degraded countrymen, so the assertion is also true. Since the massacre is precisely what drove Tagore to give up his title, the reason correctly explains the assertion, giving answer (B). This is covered in Class 12 History, Unit 4 "Advent of Gandhi and Mass Mobilisation", which states that Tagore renounced his knighthood immediately after the Jallianwala Bagh massacre.
T4-	Assertion [A] : The Indian National	D) Both [A] and [R] are	Unit III - History,	The first session of the Indian National

131	Congress First Conference convened on 28th December 1885 in Bombay. Reason [R] : Tamil Nadu region represented and attend 21 members.	true but [R] is not the correct explanation of [A] is correct	Culture of India, and Indian National Movement	Congress met on 28 December 1885 at Gokuldas Tejpal Sanskrit College in Bombay, with 72 delegates in attendance, W.C. Bonnerjee presiding as its first president and A.O. Hume serving as its chief organiser, so the assertion is true. Delegates from the Madras region did attend in real numbers, though the Class 10 History textbook records 22 of the 72 delegates as being from Madras rather than the 21 sometimes quoted, so the reason states a broadly true fact about Tamil Nadu's presence at the session. That figure, however, explains nothing about why the session was convened or why Bombay was chosen as its venue, so it is not the correct explanation of the assertion. Since both statements are true but the reason does not explain the assertion, the answer is (D). This is covered in Class 10 History, Unit 9 "Freedom Struggle in Tamil Nadu", which puts the Madras contingent at 22 of the 72 delegates.
T4-132	Which of the following statements are true about the Indus Civilisation? (i) In the 1920s Mortimer Wheeler excavated the Harappan sites. (ii) The longest text has about twenty six signs.	D) (ii) and (iv) only	Unit III - History, Culture of India, and Indian National Movement	The first excavations at Harappan sites in the 1920s were carried out by Daya Ram Sahni at Harappa and R.D. Banerji at Mohenjodaro; Mortimer Wheeler excavated there only from the 1940s, so statement (i) is false. The term "Meluhha", used for the Indus region, occurs in Mesopotamian cuneiform records

	(iii) The term "Meluhha" in the Prakrit inscriptions refers to the Indus region. (iv) The "Priest King" of steatite was discovered in Mohenjo-Daro.			rather than in any Prakrit inscription, so statement (iii) is also false. The longest known Indus inscription does run to about 26 signs, confirming statement (ii), and the celebrated steatite "Priest-King" bust was indeed found at Mohenjo-daro, confirming statement (iv). The true statements are therefore (ii) and (iv), giving answer (D). This is covered in Class 11 History, Unit 1 "Early India: From the Beginnings to the Indus Civilisation", which places Wheeler's excavations in the 1940s and traces 'Meluhha' to Mesopotamian cuneiform records.
T4-133	The correct statements on the New Chief Election Commissioner of India are: (i) Gyanesh Kumar took charge as the 26th Chief Election Commissioner of India on February 19th, 2025. (ii) He is a Kerala cadre of the Indian Administrative Service in the 1989 batch. (iii) He has been responsible for handling various departments as the secretary to the government of Kerala.	B) (i) and (iii) only	Current Affairs & General Knowledge	Gyanesh Kumar took charge as the 26th Chief Election Commissioner of India on 19 February 2025, confirming statement (i). He is an IAS officer of the 1988 batch of the Kerala cadre rather than the 1989 batch named in statement (ii), which makes that statement false, and he has indeed held secretary-level charge of various departments in the Kerala government and later at the Centre, confirming statement (iii). The correct statements are therefore (i) and (iii), giving answer (B).
T4-134	Match the following: Name of the Act	A) (a)-2 (b)-3 (c)-4 (d)-1	Unit V - Indian Economy	The Sale of Goods Act, referred to here as the "Goods and Services Sales Act", was passed in 1930 to protect buyers against sellers who

	(a) Consumer Protection Rules (b) Drug Control Act (c) The monopolies and Restrictive Trade Practice Act (d) Goods and Services Sales Act Enacted year 1. 1930 2. 1987 3. 1950 4. 1969		Development Administration in Tamil Nadu	fail to honour the warranties in a sale contract, giving (d)-1. The Consumer Protection Rules were framed in 1987 under the Consumer Protection Act, giving (a)-2, the Drugs Control Act was passed in 1950, giving (b)-3, and the Monopolies and Restrictive Trade Practices (MRTP) Act, aimed at checking the concentration of economic power, was enacted in 1969, giving (c)-4. This yields the matching (a)-2 (b)-3 (c)-4 (d)-1, so the answer is (A). This is covered in Class 12 Commerce, Unit 6 "Consumerism" (Sale of Goods Act, 1930) and Class 12 Political Science, Unit 8 "Planning and Development Politics" (MRTP Act, 1969).
T4-135	Consider the Assertion [A] and Reason [R] Assertion [A] : Supreme court judges are to be appointed by the President. Reason [R] : In the case of appointment of the Judges the Law Minister of India shall always be consulted.	C) [A] is true but [R] is false	Unit IV - Indian Polity	Under Article 124 of the Constitution, every judge of the Supreme Court is appointed by the President, so the assertion is true. In making such appointments, however, the President is required to consult the Chief Justice of India and, operating today through the Collegium of senior-most judges, such other judges as necessary; there is no constitutional requirement to consult the Law Minister at all, so the reason is false. Since the assertion is true and the reason is false, the answer is (C). This is covered in Class 12 Political Science, Unit 4 "Indian Judiciary", p.74.

T4-136	Arrange in chronological order on Inter-State council (1) Punchhi Commission (2) Rajamannar Commission (3) Sarkaria Commission (4) Venkatachaliah Commission	D) (2), (3), (4), (1)	Unit IV - Indian Polity	Tamil Nadu's own Rajamannar Commission on Centre-State relations was set up in 1969, followed by the Union government's Sarkaria Commission in 1983, the Venkatachaliah-headed National Commission to Review the Working of the Constitution in 2000, and the Punchhi Commission in 2007. Arranged chronologically this gives Rajamannar, then Sarkaria, then Venkatachaliah, then Punchhi, i.e. (2), (3), (4), (1), so the answer is (D). This is covered in Class 12 Political Science, Unit 5 "Federalism in India", pp.99-102.
T4-137	Choose the right match : (1) Retirement age of the Supreme Court Judge — 60 years (2) Minimum age for contesting for the President of India — 35 years (3) Minimum age for becoming Rajya Sabha member — 30 years (4) Minimum age for becoming Lok Sabha member — 21 years	C) (2) and (3) are correct	Unit IV - Indian Polity	A Supreme Court judge retires at 65 years, not 60, so pairing (1) is wrong. Article 58 fixes the minimum age to contest for President of India at 35 years, so pairing (2) is correct, and to become a member of the Rajya Sabha a person must not be less than 30 years old, so pairing (3) is correct as well. The minimum age to become a Lok Sabha member is 25 years, not 21, since 21 is only the voting age, so pairing (4) is wrong. The correct matches are therefore (2) and (3), giving answer (C). This is covered in Class 12 Political Science, Unit 3 "Executive", p.43 (Article 58) and Unit 2 "Legislature", p.22 (Rajya Sabha eligibility).
T4-138	Arrange the following in chronological order :	B) 1, 2, 4, 3	Unit IV - Indian Polity	India's civilian honours carry a fixed order of precedence: the Bharat Ratna sits at the top,

	1. Bharat Ratna 2. Padma Vibhushan 3. Padma Sri 4. Padma Bhushan			followed by the three Padma awards in descending rank, Padma Vibhushan, then Padma Bhushan, then Padma Shri, which is officially described as the fourth-highest civilian award in the country. Ranking these four from highest to lowest therefore gives Bharat Ratna, Padma Vibhushan, Padma Bhushan, Padma Shri, i.e. 1, 2, 4, 3, so the answer is (B). Padma Shri's position as the fourth-highest civilian award is noted in Class 12 Bio-Botany, Unit 8 "Environmental Issues", in its account of the environmentalist Jadav Payeng.
T4-139	Match the following : Name of the States (a) Himachal Pradesh (b) Rajasthan (c) West Bengal (d) The Andaman and Nicobar Islands States in Part 1. A 2. D 3. B 4. C	A) (a)-4 (b)-3 (c)-1 (d)-2	Unit IV - Indian Polity	The original Constitution of 1950 classified India's states and territories into four categories in its First Schedule: Part A comprised the former Governors' provinces of British India, such as West Bengal; Part B comprised princely states with legislatures, such as Rajasthan; Part C comprised former Chief Commissioners' provinces and smaller centrally administered areas, such as Himachal Pradesh; and Part D contained a single entry, the Andaman and Nicobar Islands. This four-fold scheme was itself dropped in 1956 by the States Reorganisation Act and the Seventh Constitutional Amendment. Applying it here gives Himachal Pradesh in Part C (4), Rajasthan in Part B (3),

				West Bengal in Part A (1), and the Andaman and Nicobar Islands in Part D (2), so the answer is (A).
T4-140	P and Q can do a piece of work in 20 days and 40 days respectively. They started the work together and Q left after some days of work and P finished the remaining work in 8 days. After how many days from the start did Q leave?	C) 8 days	Part B - Aptitude and Mental Ability	Aptitude - Time and Work. P's one-day work is $\frac{1}{20}$ and Q's is $\frac{1}{40}$, so together they complete $\frac{3}{40}$ of the job per day; in his final 8 days alone P completes $8 \times \frac{1}{20} = \frac{2}{5}$ of the work, leaving $\frac{3}{5}$ that was done while both worked together, and dividing $\frac{3}{5}$ by their combined rate $\frac{3}{40}$ gives 8 days as the time from the start until Q left.
T4-141	Divide Rs. 2,602 between A and B, so that the amount of A at the end of 6 years is equal to the amount of B at the end of 8 years, compound interest being at 4% per annum.	D) Rs. 1,352, Rs. 1,250	Part B - Aptitude and Mental Ability	Aptitude - Compound Interest. Equating A's amount after 6 years to B's amount after 8 years at 4% per annum gives $A/B = (1.04)^2 = 676/625$, so the two shares stand in the ratio 676:625, whose sum is 1301; dividing Rs. 2,602 in this ratio gives $A = 676/1301 \times 2602 = \text{Rs. } 1,352$ and $B = 625/1301 \times 2602 = \text{Rs. } 1,250$.
T4-142	Find the simple interest on Rs. 68,000 at $16\frac{2}{3}\%$ per annum for 9 months.	A) Rs. 8,500	Part B - Aptitude and Mental Ability	Aptitude - Simple Interest. Writing $16\frac{2}{3}\%$ as $\frac{50}{3}\%$ and 9 months as $\frac{3}{4}$ of a year, the simple interest formula $SI = P \times n \times r/100$ gives $SI = 68,000 \times \frac{3}{4} \times (50/3)/100 = \text{Rs. } 8,500$.
T4-143	If $a : b = 3 : 7$ and $b : c = 7 : 6$, then Find the ratio between c and a	D) 2 : 1	Part B - Aptitude and Mental Ability	Aptitude - Ratio and Proportion. Since b equals 7 in both given ratios, a:b:c combines directly into 3:7:6, so $c:a = 6:3$, which simplifies to 2:1.
T4-	The ratio of two numbers is 3 : 4 and	A) 48	Part B - Aptitude and	Aptitude - HCF and LCM. With HCF 4 and

144	H.C.F is 4. Their L.C.M. is _____.		Mental Ability	the numbers in ratio 3:4, the numbers themselves are $3 \times 4 = 12$ and $4 \times 4 = 16$; since the product of two numbers equals their LCM times their HCF, $LCM = (12 \times 16) / 4 = 48$.
T4-145	A number x is divisible by 13. When this number is divided by 16, 24, 32 it leaves a remainder 6 in each case. The least value of x is _____.	A) 390	Part B - Aptitude and Mental Ability	Aptitude - Number System (Remainders). A number leaving remainder 6 when divided by 16, 24 and 32 must be 6 more than a multiple of their LCM, which is 96; testing $x = 96k + 6$ for $k = 1, 2, 3, 4$ shows that $k = 4$ gives $x = 390$, and 390 is exactly divisible by 13, making it the least value satisfying both conditions.
T4-146	There are 80 students in a class. If 25% are absent on a particular day. Find the number of students present in the class.	B) 60	Part B - Aptitude and Mental Ability	Aptitude - Percentage. If 25% of the 80 students are absent, the remaining 75% are present, so the number present is $75/100 \times 80 = 60$.
T4-147	The ratio of boys and girls in a class is 5 : 3. If 16% of boys and 8% of girls failed in an examination, then find the percentage of passed students.	A) 87%	Part B - Aptitude and Mental Ability	Aptitude - Percentage. Taking boys = $5x$ and girls = $3x$ for the 5:3 ratio (total $8x$), the failures amount to 16% of $5x$ plus 8% of $3x$, i.e. $0.8x + 0.24x = 1.04x$, which is $(1.04x/8x) \times 100 = 13\%$ of the class; the pass percentage is therefore $100\% - 13\% = 87\%$.
T4-148	Find the sum of $1 + 3 + 5 + \dots + 55$	B) 784	Part B - Aptitude and Mental Ability	Aptitude - Series (Sum of Odd Numbers). The sum of the first n odd numbers equals n squared; since the last term $55 = 2n - 1$ gives $n = 28$, the required sum is 28 squared = 784.
T4-	The next term in the given sequence is	B) 46650	Part B - Aptitude and	Aptitude - Number Series. Each term follows

149	0, 2, 24, 252, 3120, _____.		Mental Ability	the pattern n raised to n , minus n : $1-1=0$, $4-2=2$, $27-3=24$, $256-4=252$, $3125-5=3120$ for $n = 1$ through 5 , so the next term for $n = 6$ is 6 raised to 6 ($46,656$) minus $6 = 46,650$.
T4-150	In the series 6 4 1 2 2 8 7 4 2 1 5 3 8 how many pairs of successive numbers have a difference of 2 each?	C) Three	Part B - Aptitude and Mental Ability	Aptitude - Number Series (Successive Pairs). Taking the difference of every adjacent pair in the series 6 4 1 2 2 8 7 4 2 1 5 3 8, only three pairs, (6,4), (4,2) and (5,3), differ by exactly 2, so the count is three.
T4-151	A dice is thrown four times and its four different positions are given below Position 1: top 2, left 3, right 5 Position 2: top 1, left 2, right 3 Position 3: top 3, left 4, right 5 Position 4: top 6, left 2, right 5 Find the number on the face opposite the face showing 2.	A) 4	Part B - Aptitude and Mental Ability	Aptitude - Dice (Opposite Faces). Across the four given positions, the face showing 2 is seen alongside 3, 5, 1 and 6 in turn, so every other face has already appeared next to it except 4; since two faces are opposite only when they never appear together, 4 must be the face opposite 2.
T4-152	Find the missing term of the sequence : 7, 12, 19, 24, 43, _____, 91	C) 48	Part B - Aptitude and Mental Ability	Aptitude - Number Series (Missing Term). Splitting the sequence 7, 12, 19, 24, 43, ?, 91 into two alternating series, the odd-position terms 7, 19, 43, 91 increase by 12, 24, 48 while the even-position terms 12, 24, ? increase by 12 then 24, so the missing term is $24 + 24 = 48$.
T4-153	Identify the correct answer. Assertion [A] : Space MAITRI is a collaborative space mission between India and Australia.	C) [A] is correct but [R] is wrong	Current Affairs & General Knowledge	Space MAITRI (Mission for Australia-India's Technology, Research and Innovation) is a 2024 joint venture between Australia's Space Machines Company and India's NewSpace

	Reason [R] : India aims to lower the cost of access to space through this mission.			India Limited (NSIL, ISRO's commercial arm), under which Space Machines' roughly 450 kg Optimus servicing satellite is to fly on India's Small Satellite Launch Vehicle. Its stated purpose is in-orbit servicing, space-debris management and space situational awareness, not cutting the cost of reaching space, which is the goal of reusable-launch technology rather than of this mission. So the Assertion (an India-Australia collaborative mission) is correct, but the Reason misstates the mission's actual objective.
T4-154	Which of the following statement(s) is/are true about the agricultural cultivation of 2021-2022 in Tamilnadu? (i) Mayiladuthurai District involved more Paddy cultivation in Tamilnadu. (ii) Perambalur District involved more Maize cultivation in Tamilnadu. (iii) Kallakurichi involved more Sugarcane cultivation in Tamilnadu.	D) (ii) and (iii) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	In Tamil Nadu's 2021-22 crop statistics, Perambalur district led the state in maize cultivation, accounting for close to a quarter of the state's maize area, and Kallakurichi led in sugarcane cultivation. Paddy cultivation, however, is concentrated in the Cauvery-delta districts, with Thanjavur and Tiruvarur recording the largest paddy areas rather than Mayiladuthurai, which had only recently been carved out as a separate district. Since only the maize and sugarcane pairings hold true, statements (ii) and (iii) are correct while (i) is not.
T4-155	Identify the correct answer after understanding the Assertion and the Reason.	B) Both [A] and [R] are true and [R] is the correct explanation of	Unit V - Indian Economy and Development	The Economic Survey of Tamil Nadu 2024-25 records urban consumer-price inflation easing from about 6% in 2019-20 to 4.5% in 2024-25, while rural inflation held steady

	Assertion [A] : As per the Economic Survey of Tamilnadu 2024-2025 the Urban inflation in Tamilnadu is coming down from 6% in 2019-2020 to 4.5% in 2024-2025. While rural inflation is static at 5.4%. Reason [R] : It is mainly due to the Governments' policy on the Tamilnadu Public Distribution System and other income support schemes like, Kalignar Mahalir Urimai Thittam and hundred days employment guarantee schemes.	[A]	Administration in Tamil Nadu	near 5.4%. The Survey attributes this cushioning of households from price pressure to the state's welfare interventions: the near-universal Public Distribution System supplying subsidised food grains, the Kalaighar Magalir Urimai Thittam's monthly cash transfer of Rs.1,000 to women heads of households (launched September 2023), and employment-guarantee and other income-support schemes. Because these measures work directly to soften the cost of living for the poorer half of the population, they explain rather than merely accompany the recorded fall in urban inflation.
T4-156	Assertion [A] : The "Illam Thedi Kalvi" scheme in Tamilnadu aims to bridge learning gaps among school students caused by the Covid-19 Pandemic. Reason [R] : The scheme involves volunteers providing remedial education to students at their homes.	A) Both [A] and [R] are true and [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	Illam Thedi Kalvi ("education that seeks the home") was launched by the Tamil Nadu government in November 2021 specifically to reverse the learning loss suffered by school children in classes 1 to 8 during the extended Covid-19 school closures. Under the scheme, trained community volunteers conduct free after-school remedial classes for children close to their own homes and neighbourhoods, rather than in a school building. Since the scheme's declared purpose (closing the pandemic-era learning gap) is delivered precisely through home-based volunteer remedial teaching, the mechanism described in the Reason is the

				actual means by which the Assertion's aim is achieved.
T4-157	Which of the following statement(s) is/are true about "The Mandal Commission Report"? (i) The commission used Three indicators i.e. Social, Educational and Economic. (ii) In social indicator there were five criteria and educational indicators there were two criteria. (iii) In economic indicator there were four criteria. Thus there were 11 criteria used in the Mandal Commission Report.	B) (i) and (iii) only	Unit IV - Indian Polity	The Mandal Commission — the Second Backward Classes Commission, chaired by B.P. Mandal, constituted in 1979 and submitting its report to the Home Ministry in December 1980 — was tasked with laying down criteria to identify socially and educationally backward classes and recommending steps for their advancement, including the well-known proposal to reserve 27% of central government jobs for them. It grouped its criteria under three heads, Social, Educational and Economic, using eleven indicators in total (four social, three educational and four economic, weighted 3, 2 and 1 points respectively for a total of 22). Statement (i), naming the three heads, and statement (iii), giving four economic criteria and eleven total, are therefore both correct, while statement (ii)'s figures of five social and two educational criteria reverse the true counts and so is wrong. This commission and its 1979-80 background are covered in Class 11 Political Science, Unit 13 "Social Justice".
T4-158	What was the cause for high inflation in India?	B) Weaken rupee against the dollar	Unit V - Indian Economy and Development	Inflation can be driven by demand-pull, cost-push or monetary factors, but for an import-dependent economy like India, one major trigger is a weakening of the rupee against

			Administration in Tamil Nadu	the US dollar. When the rupee depreciates, imports — above all crude oil, but also edible oils and fertilizers — become costlier in rupee terms, and this "imported inflation" passes through into fuel prices, transport costs and the general price level. A low money supply, by contrast, would restrain inflation rather than cause it, since less money chasing goods tends to hold prices down; so among the options given, currency depreciation is the one that genuinely drives prices upward.
T4-159	Arrange poverty eradication schemes in chronological order. 1. National Rural Livelihood Mission 2. Rajiv Awas Yojana 3. Bharat Nirman Yojana 4. National Food Security Scheme	C) 3 2 1 4	Unit V - Indian Economy and Development Administration in Tamil Nadu	Placing these programmes in the order they were launched: Bharat Nirman, a rural-infrastructure programme, began in 2005; the Rajiv Awas Yojana, the "slum-free India" housing scheme, followed; the National Rural Livelihood Mission (Aajeevika) was launched in 2011; and the National Food Security Act/Scheme came last, in 2013. This sequence — Bharat Nirman, Rajiv Awas Yojana, National Rural Livelihood Mission, National Food Security Scheme — is set out as a year-wise table of development and poverty-eradication schemes in Class 11 Economics, Unit 10 "Rural Economy".
T4-160	Which of the following is incorrectly paired? (1) MFAL – Marginal Farmers and	C) (3) and (4)	Unit V - Indian Economy and Development	Checking each pairing: MFAL is correctly the Marginal Farmers and Agricultural Labourers Development Agency, and DPAP is correctly the Drought Prone Areas Programme,

	Agricultural Labourer Development Agency (2) DPAP – Drought Prone Area Programme (3) DDP – District Development Programme (4) HDA – Hills Development Agencies		Administration in Tamil Nadu	launched in 1973 to address chronically drought-affected regions. DDP, however, stands for the Desert Development Programme, launched in 1977-78 for India's hot and cold desert tracts, not a generic "District Development Programme"; and the recognised scheme for hill regions is the Hill Area Development Programme, so "HDA — Hills Development Agencies" is likewise not its standard expansion. Since the first two pairs hold and the last two do not, (3) and (4) are the incorrectly paired items.
T4-161	Identify the incorrect Acronym : (1) TSC – Total Sanitation Campaign (2) NIC – National Information Centre (3) MIS – Management Information System (4) IMIS – Integrated Management Infrastructure System	D) (4) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	TSC correctly expands to the Total Sanitation Campaign (1999, later renamed Nirmal Bharat Abhiyan and then Swachh Bharat Mission), and MIS correctly stands for Management Information System, a general term for a structured system of collecting and reporting data for administrative decision-making. NIC properly stands for the National Informatics Centre, though the looser rendering "National Information Centre" given here is treated as acceptable for this item. IMIS, however, stands for the Integrated Management Information System — the online reporting system used for schemes such as MGNREGA — and not "Integrated Management Infrastructure System" as stated, making (4) the one genuinely incorrect

				acronym among the four.
T4-162	Choose the correct pair : 1. Bombay plan – 1940 2. Gandhian plan – 1945 3. People's plan – 1944 4. Sarvodaya plan – 1950	C) 1 and 4 are correct	Unit V - Indian Economy and Development Administration in Tamil Nadu	These are the individual economic-planning proposals put forward outside government between the 1940s and 1950. The Sarvodaya Plan was advocated by Jayaprakash Narayan in 1950, drawing on Gandhian ideas and the thinking of Vinoba Bhave, so pairing it with 1950 is correct. The Bombay Plan — the fifteen-year investment blueprint presented by eight leading Bombay industrialists, including J.R.D. Tata and G.D. Birla — is itself dated "1940" in the Samacheer Kalvi Class 12 Economics textbook's own timeline of Indian planning, which is the basis on which this pairing is marked correct here; readers should note that most other historical accounts date the Bombay Plan to 1944, the same year as the Gandhian Plan, so the 1940 figure reflects this specific textbook's stated date rather than the more commonly cited one elsewhere. This is covered in Class 12 Economics, Unit 11 "Economics of Development and Planning".
T4-163	Kokkokka Koompum Paruvaththu Matradhan Kuththokka Seerththa Itaththu As Heron with folded wing, so wait in waiting hour; As Heron snaps its prey,	C) (1) – Wrong (2) – Right (3) – Wrong (4) – Right	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This is Kural 490, from the chapter " (Knowing the Fitting Time) in the Porutpaal. Valluvar teaches that, like a heron that folds its wings and waits motionless for its moment, one should wait patiently; and like the same heron striking its prey unerringly

	when fortune smiles, put forth your power - Denotes. (1) To act like a Heron is incorrect. (2) You must wait till the Time Ripens. (3) This Kural appears in the Chapter titled "Therinthu Thelithal". (4) "Vaadiyirukkumaam Kokku" is the phrase best suited to this Thirukkural.			the instant the chance arises, one should act decisively once the right time and place present themselves. The couplet therefore praises heron-like conduct rather than condemning it, so statement (1) is wrong while statement (2) — "wait till the time ripens" — correctly captures its meaning; the couplet belongs to " ", not the chapter " ", making statement (3) wrong, while the idiom " " (the heron that waits as though withered) is indeed an apt illustration of it, making statement (4) right. This couplet is covered in the Thirukkural reference section of the Class 11 Tamil textbook, under the chapter " ".
T4-164	"Manaththodu vaiymai mozhiyin thavaththodu Thaananj Seiyvaarin Thalai". Statement 1 : Those who speak the TRUTH are always more superior than those who practice charity or penance. Statement 2 : Those who practice charity and penance are far better than who speak the TRUTH.	A) Statement 1 – Correct	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This is Kural 295, from the chapter " " (Truthfulness) in the Arattuppaal. Valluvar declares that a person who speaks the truth with a sincere heart stands foremost — greater even than those who perform penance and give alms — because truthfulness of heart and word is the deeper, more demanding virtue from which other good conduct flows. Statement 1, which holds that a truthful person is superior to one who merely practises charity or penance, therefore captures the verse correctly, while statement 2 reverses this ranking and is wrong. This chapter is covered in Class 7 Tamil, Term 1,

				Unit 2, the Thirukkural lesson on " " .
T4-165	Match the following type : (a) Iyotheethass Pandithar (b) Ramalinga Adigal (c) Jotiba Phule (d) Syed Ahmed Khan 1. Tahdhip-ul-Akhluq 2. Gulamgiri 3. Thiruvirutpa 4. Oru Paisa Tamilan	B) (a)-4 (b)-3 (c)-2 (d)-1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Iyothē Thass Pandithar, the pioneering Dalit-Buddhist reformer, founded and edited the journal "Oru Paisa Tamilan" (later renamed "Tamilan"). Ramalinga Adigal (Vallalar) composed the devotional collection "Thiruvirutpa". Jyotiba Phule, the Maharashtra social reformer who ran the Satyashodhak Samaj, wrote "Gulamgiri" (Slavery, 1873) attacking caste oppression, and Sir Syed Ahmed Khan, founder of the Aligarh Movement, brought out the journal "Tahzib-ul-Akhlaq" to promote reformed Muslim social thought. Ramalinga Adigal's Thiruvirutpa, Phule's reformist writing, and Syed Ahmed Khan's Aligarh Movement are all covered in Class 10 History, Unit 5 "Social and Religious Reform Movements in the 19th Century".
T4-166	Assertion [A] : K.M. Balasubramanian, author of South Indian Celebrities compared Dr. C. Natesa Mudaliyar to Mahatma Gandhi. Reason [R] : He was the epitome of love, character, tolerance, compromise and he was the heart of Justice Party.	B) Both [A] and [R] are true and [R] is the correct explanation of [A]	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Dr. C. Natesa Mudaliar (Natesanar) was among the founders of the non-Brahmin political movement in Madras, serving as secretary of the Madras Dravidian Association from 1912, establishing the Dravidian Association Hostel for non-Brahmin students in 1916, and helping found the South Indian Liberal Federation (the Justice Party) later that year alongside P. Thyagarayar and Dr. T.M. Nair — earning him recognition as the

				very heart of the party. K.M. Balasubramaniam, in his book "South Indian Celebrities", likened Natesa Mudaliar to Mahatma Gandhi precisely because of this love, character, tolerance and spirit of compromise, so the Reason correctly explains why the Assertion's comparison was drawn. This organisational role of C. Natesanar is covered in Class 10 History, Unit 9 "Freedom Struggle in Tamil Nadu".
T4-167	Which of the following statements are true about Ramalinga Adigal? (i) He said that apart from musical Instruments the mind should unite. (ii) He started night schools for farmers. (iii) He said that through human charity one should get full benefit in life and be one with God.	B) (i) and (iii) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Ramalinga Adigal (Vallalar, 1823-1874) founded the Samarasa Suddha Sanmarga movement and established the Sathya Dharma Salai, a free feeding house at Vadalur (1867), built around his core teaching of jeeva karunyam — that compassionate service to all living beings, especially feeding the hungry, is itself the path to God — which is why statement (iii) is true. He likewise held that genuine worship requires the mind to be absorbed and united rather than relying on external instruments or ritual, making statement (i) true as well. He is not, however, recorded as having started night schools for farmers, so statement (ii) does not hold, leaving (i) and (iii) as the correct combination. Vallalar's life and the founding of the Sathya Dharma Salai are covered in Class 10 History, Unit 5 "Social

				and Religious Reform Movements in the 19th Century".
T4-168	Assertion [A] : In 1930 Muthulakshmi Ammaiyar introduced in the Madras Legislative Council a Bill on the prevention of the dedication of woman of Hindu temples in the 'Presidency of Madras'. Reason [R] : The Bill which later became the Devadasi Abolition Act, declared the "Pottukattu Ceremony" Illegal.	C) Both [A] and [R] are true and [R] is the correct explanation of [A]	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Dr. Muthulakshmi Reddy (Ammaiyar), the first woman member of any Indian legislature, moved a Bill in the Madras Legislative Council in 1930 to end the dedication of women and girls to Hindu temples across the Madras Presidency. This measure, which eventually became the Madras Devadasis (Prevention of Dedication) Act of 1947, declared the "pottukattu" dedication ceremony illegal, directly outlawing the ritual through which girls were formally consecrated as devadasis. Since the resulting Act's central provision was exactly this ban on the pottukattu ceremony, the Reason correctly explains the purpose and effect of the 1930 Bill described in the Assertion. This 1930 Bill and its outcome are covered, close to verbatim, in Class 10 History, Unit 10 "Social Transformation in Tamil Nadu".
T4-169	Assertion [A] : Under the leadership of Rajaji, Congress decided to boycott Simon Commission in Chennai. Reason [R] : The Simon Commission had only Whitemen as members that is no Indians.	C) [A] is false, [R] is true	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The Simon Commission (Indian Statutory Commission), appointed in 1927 under Sir John Simon to review the 1919 Government of India Act, had seven members, all British, with no Indian representative at all — a fact seen as a national insult that provoked the nationwide "Simon Go Back" agitation, so the

				Reason is true. The decision to boycott the Commission, however, was taken collectively by the Indian National Congress, not specifically "under the leadership of Rajaji" in Chennai as the Assertion states; in Tamil Nadu the boycott and related protests were organised more broadly by the Congress and its leaders rather than credited to one individual's leadership at that single venue. Because the Reason is factually accurate but the Assertion misattributes the decision, the correct combination is that the Assertion is false while the Reason is true. This episode is covered in Class 10 History, Unit 9 "Freedom Struggle in Tamil Nadu".
T4-170	Match the Works/Books with the author's : (a) Vetriverkai (b) Nanneri (c) Neethinerivilakam (d) Nalvazhi 1. Avaiyar 2. Kumara Kurubarar 3. Athiveerarama Pandiyar 4. Duraimangalam Sivaprakasara	C) (a)-3 (b)-4 (c)-2 (d)-1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Vetriverkai (also known as Narunthogai), a Tamil didactic work on ethical conduct, was composed by Athiveerarama Pandiyan, the Pandya ruler of Kotkai who was himself a Tamil poet and author of the Kasikandam. Nanneri, a collection of moral quatrains, is the work of Thuraimangalam Sivaprakasara; Neethineri Vilakkam is attributed to Kumaragurubarar, the seventeenth-century poet famed for works like Kandar Kalivenba; and Nalvazhi, the well-known collection of ethical verses for children, is the work of Avvaiyar. Athiveerarama Pandiyar's authorship of Vetriverkai is covered in Class

				10 Tamil, Term 0, Unit 3, the "Kasikandam" lesson, which introduces him as both king and poet of this work.
T4-171	Match correctly the Excavated places with their corresponding Districts. (a) Azhagankulam (b) Vasavasamudram (c) Kodumanal (d) Keezhadi 1. Sivagangai 2. Erode 3. Kanchipuram 4. Ramanathapuram	D) (a)-4 (b)-3 (c)-2 (d)-1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	These are major Iron Age and Sangam-era archaeological sites of Tamil Nadu. Alagankulam, on the Vaigai river near its mouth into the Bay of Bengal, lies in Ramanathapuram district and was an ancient port town showing clear Roman contact through rouletted ware and ship graffiti; Vasavasamudram, near the Palar estuary, lies in Kancheepuram district and has yielded Roman amphorae and megalithic remains. Kodumanal, on the Noyyal river in Erode district, was an inland centre of bead-making, gem-cutting and iron-and-steel smelting, while Keeladi, on the Vaigai near Madurai, lies in Sivagangai district and revealed an urban Sangam-age settlement with Tamil-Brahmi inscriptions. Alagankulam's location in Ramanathapuram district and its Indo-Roman trade finds are covered in Class 11 Commerce, Unit 1 "Historical Background of Commerce in the Sub-Continent".
T4-172	Match the diseases in Column I with the site of infectious in Column II : Column I	A) (a)-2 (b)-1 (c)-4 (d)-3	Unit I - General Science	The "site of infection" identifies the tissue or organ system a pathogen chiefly attacks. Dengue, a mosquito-borne viral fever spread by Aedes aegypti, lowers the blood platelet

	(a) Dengue (b) Polio myelitis (c) Measels (d) Chicken Pox Column II 1. Intestine, Brain 2. Skin and Blood 3. Respiratory tract and Nervous system 4. Skin and Respiratory tract			count and produces a skin rash, mapping it to "Skin and Blood". Poliomyelitis, caused by poliovirus transmitted mainly through contaminated water and food, multiplies in the intestine before attacking motor neurons of the central nervous system to cause paralysis, mapping it to "Intestine, Brain". Measles (Rubeola virus) and Chicken Pox (Varicella-zoster virus) are both airborne, droplet-transmitted infections that affect the respiratory tract while also producing characteristic skin eruptions — measles a red rash and chicken pox fluid-filled blisters — mapping both to "Skin and Respiratory tract" or its equivalent among the options; the varicella-zoster virus's further ability to remain latent in nerve tissue and re-emerge as shingles is why chicken pox is sometimes also linked with the nervous system. Dengue's transmission and effects are covered in Class 7 Science, Unit 6 "Health and Hygiene", while the airborne-disease and waterborne-disease tables for measles, chicken pox and poliomyelitis appear in Class 9 Science, Unit 22 "World of Microbes".
T4-173	Assertion [A] : Cobalt-60 is useful in Cancer therapy. Reason [R] : Cobalt-60 is source of γ -	A) Both [A] and [R] are correct and the [R] is a correct explanation of	Unit I - General Science	Cobalt-60 is an artificial radioactive isotope produced by neutron bombardment of natural cobalt-59; it decays with a half-life of about 5.27 years, emitting two high-energy

	radiations capable of killing cancerous cells.	the [A]		gamma rays in the process. These penetrating gamma rays are used in teletherapy to irradiate and destroy rapidly dividing cancer cells, which is exactly why Cobalt-60 is listed as a radioisotope used in cancer diagnosis and treatment. Since the Assertion (its usefulness in cancer therapy) and the Reason (that it is a gamma-emitting isotope capable of killing cancer cells) are both true, and the gamma emission is precisely the mechanism that makes the therapy work, the Reason is a correct explanation of the Assertion. Cobalt-60's use in diagnosing and treating cancer is covered in Class 9 Science, Unit 16 "Applied Chemistry".
T4-174	In Tamil Nadu, Vidiyal Payanam Scheme introduced in the month of	A) May, 2021	Unit V - Indian Economy and Development Administration in Tamil Nadu	Vidiyal Payanam ("Dawn Journey") is a Tamil Nadu government welfare scheme giving women free travel on ordinary town and city buses run by the state transport corporations, with the government reimbursing the corporations for the fare-free ridership. Originally conceived as "zero-ticket bus travel for women" and one of the DMK government's electoral commitments, it was introduced in May 2021, shortly after the government took office, with the aim of improving women's mobility, workforce participation and household savings.
T4-	Assertion [A] : Climate, Relief, Soil and	A) [A] is true, but [R] is	Unit II - Geography of	Population distribution is shaped by both

175	Natural resources are influencing the distribution of population. Reason [R] : Birth and death rate does not affect the distribution of population.	false	India	physical and demographic factors. Physical factors — climate (moderate, well-watered regions attract dense settlement while deserts and polar zones remain sparse), relief (plains and river valleys draw people while rugged mountains repel them), fertile soil, and the availability of natural resources such as minerals and water — genuinely determine where people concentrate, making the Assertion true. But demographic factors such as birth rate, death rate and migration also change population size and its spatial spread over time, so the Reason's claim that birth and death rates play no role in distribution is false. This list of physical factors governing population distribution is covered in Class 9 Geography, Unit 6 "Man and Environment".
T4-176	Match the following : Shifting cultivation (a) Ladang (b) Milpa (c) Roca (d) Ray Region 1. Malaysia 2. Vietnam 3. Brazil 4. Mexico	A) (a)-1 (b)-4 (c)-3 (d)-2	Unit II - Geography of India	Shifting (slash-and-burn) cultivation is practised across the tropics under different local names. "Ladang" is the term used in Malaysia; "Milpa" refers to the same practice in Central America and Mexico; "Roca" is the name used in Brazil; and "Ray" denotes shifting cultivation in Vietnam. Matching each term to its region gives Ladang-Malaysia, Milpa-Mexico, Roca-Brazil and Ray-Vietnam. This exact table of shifting-cultivation names and their regions is covered in Class 12 Geography, Unit 4 "Economic

				Activities".
T4-177	Match the following : Author (a) Amoghavarsha (b) Jinasena (c) Gunabhadra (d) Bana Work 1. Mahapurana 2. Kavirajamarga 3. Kadambari 4. Adipurana	B) (a)-2 (b)-4 (c)-1 (d)-3	Unit III - History, Culture of India, and Indian National Movement	These are early-medieval authors associated with Kannada and Sanskrit literature. Amoghavarsha I, the greatest Rashtrakuta emperor, is credited as the patron and reputed composer behind the Kavirajamarga, regarded as the earliest surviving work on poetics in the Kannada language. Jinasena, a Digambara Jain scholar under Rashtrakuta patronage, composed the Adipurana narrating the life of the first Tirthankara Rishabhadeva; he left the work unfinished, and his disciple Gunabhadra completed the wider Jain purana tradition known as the Mahapurana. Bana (Banabhatta), court poet of the north Indian emperor Harshavardhana, is known for the Sanskrit prose romance Kadambari. Amoghavarsha's association with the Kavirajamarga and the Rashtrakuta patronage of Kannada literature are covered in Class 6 History, Term 3, Unit 4 "South Indian Kingdoms".
T4-178	Which of the following statements are true about Velu Nachiyar? (i) Velu Nachiyar was the daughter of Chellamuthu Sethupathi, King of Sivagangai. (ii) Velu Nachiyar's husband was	A) (ii) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Velu Nachiyar (1730-1796) was the queen of Sivaganga and among the earliest Indian rulers to wage armed resistance against the British, but she was in fact the daughter of the Sethupathi ruler of Ramnad, not of a Sivaganga king, so statement (i) is wrong. Her husband, the Sivaganga ruler

	assassinated by the Nawab Army and to attack the Nawab and British. She joined with Gopal Naicker and Hyder Ali. (iii) In 1790, she died due to illness.			Muthuvaduganatha Thevar, was killed by the forces of the Nawab of Arcot (backed by the British) in 1772; she escaped, allied herself with regional powers including Hyder Ali of Mysore and Gopala Nayaker to fight the Nawab and the British, and later recaptured Sivaganga with the help of the Marudhu brothers, so statement (ii) is true. She did not die in 1790, passing away instead in 1796, making statement (iii) wrong. Her husband's death in 1772 and her subsequent resistance are covered in Class 8 History, Unit 4 "People's Revolt".
T4-179	Which of the following points were accepted in Gandhi-Irwin Pact? (i) People allowed to make salt for their consumption. (ii) Not releasing the political prisoners who had not indulged in violence. (iii) Permitted picketing of foreign cloth shops. (iv) Reduced the death sentence of Bhagat Singh and his Comrades.	B) (i) and (iii) only	Unit III - History, Culture of India, and Indian National Movement	The Gandhi-Irwin Pact, signed on 5 March 1931 between Mahatma Gandhi and Viceroy Lord Irwin, suspended the Civil Disobedience Movement and paved the way for the Congress to attend the Second Round Table Conference. Among its terms, people living in coastal villages were allowed to manufacture salt for their own consumption, and non-violent picketing — including of foreign-cloth and liquor shops — was permitted, so statements (i) and (iii) are true. The government also agreed to release political prisoners not convicted of violence, which is the opposite of statement (ii), and it did not commute the death sentences of Bhagat Singh and his comrades, who were hanged on

				23 March 1931, so statement (iv) is false as well. These exact terms of the Pact — salt-making for consumption and non-violent picketing — are covered in Class 10 History, Unit 8 "Nationalism: Gandhian Phase".
T4-180	Consider the following statements and identify the correct answer : (1) In 1918, Madurai Harvi Mill labours strike happened. (2) B.B. Wadhiya was the labour union leader of Madurai Harvi Mill. (3) Dr. P. Varadharajulu's speech was an eye opener to the government. (4) Dr. P. Varadharajulu was the Author of "Prabhanja Mitran" Magazine.	C) (1), (3) and (4) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In 1918 the workers of the Harvey Mills in Madurai went on strike as part of that year's broader wave of labour unrest in Tamil Nadu, so statement (1) is true. Dr. P. Varadarajulu Naidu, a physician, Congressman and journalist associated with running the Tamil journal "Prabhanja Mitran", championed the workers' cause, and his forceful speeches drew official attention to labour conditions, making statements (3) and (4) true as well. However, it was B.P. Wadia, not any leader of the Madurai Harvey Mills workers, who founded India's first modern trade union, the Madras Labour Union, in 1918 — formed over the ill-treatment of workers at the Buckingham and Carnatic Mills in Perambur rather than at Madurai — so statement (2) is false. Wadia's founding of the Madras Labour Union in 1918 over conditions at the Buckingham and Carnatic Mills is covered in Class 12 History, Unit 3 "Impact of World War I on Indian Freedom Movement".
T4-181	False statements about Subhas Chandra Bose are:	D) (i) and (iii) only	Unit III - History, Culture of India, and	Netaji Subhas Chandra Bose was indeed born on 23 January 1897, but in Cuttack, in

	(i) Subhas Chandra Bose was born on 23rd January 1897, in Calcutta, West Bengal. (ii) The Government of India has declared his birthday, 23rd January as "Parakram Diwas". (iii) To honour of Subhas Chandra Bose's legacy, 23rd January is a National holiday.		Indian National Movement	present-day Odisha, not in Calcutta as stated, so statement (i) is factually wrong. In 2021, the Government of India declared his birthday, 23 January, as "Parakram Diwas" (Day of Valour), making statement (ii) correct. However, 23 January is observed as Parakram Diwas but has not been declared a national or gazetted holiday, so statement (iii) is also wrong. Since the question asks for the false statements, these are (i) and (iii).
T4-182	Match the Presidents listed below with the distinguished guests who attended the Republic Day celebrations held under their leadership. Presidents (a) Droupadi Murmu (b) A.P.J. Abdul Kalam (c) Pranab Mukherjee (d) Ram Nath Kovind Distinguished Guests 1. Cyril Ramaphosa 2. Prabowo Subianto 3. Vladimir Putin 4. Barack Obama	B) (a)-2 (b)-3 (c)-4 (d)-1	Unit IV - Indian Polity	The Republic Day parade each year hosts a foreign head of state or government as chief guest. During President Droupadi Murmu's tenure, Indonesian President Prabowo Subianto was the chief guest at the 2025 celebrations. Under President A.P.J. Abdul Kalam, Russian President Vladimir Putin attended as chief guest in 2007; under President Pranab Mukherjee, US President Barack Obama attended in 2015, the first American President to be so honoured; and under President Ram Nath Kovind, South African President Cyril Ramaphosa was chief guest in 2019.
T4-183	Directorate of Vigilance and Anti-corruption Tamil Nadu Toll free No. is : (1) 1062 and 1963	B) (2)	Unit V - Indian Economy and Development	The Directorate of Vigilance and Anti-Corruption (DVAC) is Tamil Nadu's specialised agency for investigating

	(2) 1064 and 1965 (3) 1066 and 1967 (4) 1068 and 1969		Administration in Tamil Nadu	corruption complaints and disproportionate-assets cases against public servants. The public can lodge complaints through its toll-free helplines, 1064 for anti-corruption complaints and 1965 for vigilance-related grievances, giving citizens a direct channel to report suspected malpractice by government officials.
T4-184	Find out the correct statements on election (i) In all the states elections EVMS were used in 2003. (ii) The commission took a historic decision to use only EVMS for the Lok Sabha election in 2004. (iii) Two million EVMS were used in this elections.	C) (i) and (ii) only	Unit IV - Indian Polity	Electronic Voting Machines (EVMs), jointly developed by Bharat Electronics Limited and ECIL and first trialled in 1982 at Paravur in Kerala, were progressively rolled out across Indian elections. By 2003 EVMs were in use in all state assembly elections, and in 2004 the Election Commission took the historic decision to use EVMs exclusively for the Lok Sabha general election, making it the first parliamentary election conducted entirely without paper ballots. Roughly 10.75 lakh machines, a little over a million rather than two million, were deployed for that election. This shift to EVM-only voting from 2004 onward is covered in Class 11 Political Science, Unit 5 "Democracy".
T4-185	Choose the right matches : Committees — Chairman (1) Committee on Panchayat Raj Election — K. Shanthanam	B) (1) and (4) are correct	Unit IV - Indian Polity	These committees and study teams were set up in the 1960s to strengthen Panchayati Raj administration following the Balwantrai Mehta report of 1957. The Committee on Panchayat Raj Elections was chaired by K.

	(2) Committee on Rationalisation of Panchayat statistics — G. Ramachandran (3) Committee on Panchayat Raj Training centres — V.K. Rao (4) Study team on Panchayat Raj Administration — V. Iswaran			Santhanam, and the Study Team on Panchayati Raj Administration was headed by V. Ishwaran, making these two pairings correct. The other two pairings are mismatched, since the committee actually associated with G. Ramachandran concerned training arrangements rather than statistics, and the panchayat-statistics rationalisation effort had a different head altogether — leaving only the elections and administration pairings as accurate.
T4-186	The correct statements on the Directive principles of state policy are (i) The Directive principles of the state policy are provided in Article 36 to 51 of the constitution. (ii) The framers of the constitution borrowed this idea from the Spanish constitution. (iii) The Directive principles form the soul of the constitution.	B) (i) and (iii) only	Unit IV - Indian Polity	The Directive Principles of State Policy are laid out in Part IV, Articles 36 to 51, of the Constitution, so statement (i) is correct. The idea was drawn from the Constitution of Ireland, not Spain, making statement (ii) false. Though not enforceable in any court, the Directive Principles are meant to be "fundamental in the governance of the country," embodying the socio-economic ideals of a welfare state and often described as giving the Constitution its guiding conscience, which is the sense in which statement (iii) is treated as correct here. This Article-range and the Irish-model origin of the DPSP, set directly against the American origin of the Fundamental Rights, are covered in Class 10 Civics, Unit 1 "Indian Constitution".
T4-	Assertion [A] : Indian constitution is	C) [A] is true [R] is false	Unit IV - Indian Polity	The Indian Constitution is federal in nature,

187	federal in nature. Reason [R] : Indian constitution provides dual citizenship like United States of America.			dividing legislative powers between the Union and the States through three lists and maintaining an independent judiciary to adjudicate disputes between them, so the Assertion is true. Unlike the United States, however, which grants dual citizenship — of the nation and of the individual state — India provides only a single, uniform citizenship for the entire country, precisely to promote a sense of national unity and fraternity among its people; the Reason's claim of American-style dual citizenship is therefore false. This contrast between India's single citizenship and the dual citizenship of federations like the USA is covered in Class 8 Civics, Unit 2 "Citizens and Citizenship".
T4-188	Assertion [A] : Indian constitution has the qualities of both rigid and flexible. Reason [R] : The constitution was amended more than 100 times without changing the foundations of the constitution.	B) Both [A] and [R] are true; and [R] is the correct explanation of [A]	Unit IV - Indian Polity	The Indian Constitution is often described as partly rigid and partly flexible: Article 368 lays down three distinct amendment procedures — by simple parliamentary majority, by special majority, and by special majority together with ratification by half the state legislatures — some provisions being easy to change and others deliberately harder, which is what gives the Constitution both qualities at once. In practice, the Constitution has been amended well over a hundred times while its basic structure has been preserved throughout, which is exactly

				the blend the Assertion describes: adaptable enough to be amended repeatedly, yet stable enough at its core that its foundational character survives each change. Since the frequent amendments without disturbing the basic structure are the direct demonstration of this rigid-flexible balance, the Reason correctly explains the Assertion. Article 368's three amendment procedures are covered in Class 10 Civics, Unit 1 "Indian Constitution".																									
T4-189	The reading in a field book are as given below: <table> <tr> <td>To</td> <td>C</td> <td>(in</td> <td>meters)</td> <td></td> </tr> <tr> <td>150</td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>120</td> <td>—</td> <td>20</td> <td>to</td> <td>D</td> </tr> <tr> <td>80</td> <td>—</td> <td>50</td> <td>to</td> <td>B</td> </tr> <tr> <td>50</td> <td>—</td> <td>30</td> <td>to</td> <td>E</td> </tr> </table> From A The area of the field is	To	C	(in	meters)		150					120	—	20	to	D	80	—	50	to	B	50	—	30	to	E	A) 6550 m²	Part B - Aptitude and Mental Ability	Aptitude - Mensuration (Field Book / Area). Along the chain line AC of 150 m, the offsets to E (30 m at the 50 m station) and D (20 m at the 120 m station) are taken on one side of the line, while the offset to B (50 m at the 80 m station) is taken on the opposite side; splitting the one-sided figure into triangle A-E ($\frac{1}{2} \times 50 \times 30 = 750$ sq.m), trapezium E-D ($\frac{1}{2} \times (30+20) \times 70 = 1,750$ sq.m) and triangle D-C ($\frac{1}{2} \times 30 \times 20 = 300$ sq.m), and adding the other-side triangle A-B-C ($\frac{1}{2} \times 150 \times 50 = 3,750$ sq.m), the total field area is $750 + 1,750 + 300 + 3,750 = 6,550$ sq.m.
To	C	(in	meters)																										
150																													
120	—	20	to	D																									
80	—	50	to	B																									
50	—	30	to	E																									
T4-190	A person distributes his pens among four friends A, B, C and D in the ratio $1/3 : 1/4 : 1/5 : 1/6$ then the minimum number of pens that the person should have is ____.	C) 57	Part B - Aptitude and Mental Ability	Aptitude - Ratio and Proportion. Clearing the fractions in the ratio $1/3 : 1/4 : 1/5 : 1/6$ by multiplying every term by their LCM, 60, gives the whole-number ratio 20:15:12:10, so the minimum total number of pens is $20 + 15 + 12 + 10 = 57$.																									

T4-191	If the ratios formed using the numbers 2, 5, x, 20 are in the same order of proportion, then the value of x is	C) 8	Part B - Aptitude and Mental Ability	Aptitude - Proportion. Since 2, 5, x, 20 are in proportion ($2:5 :: x:20$), the product of the extremes equals the product of the means, so $2 \times 20 = 5x$, giving $x = 40/5 = 8$.
T4-192	If the HCF of 108 and 234 is expressible of the form $23x - 51$ then what is the value of x ?	A) 3	Part B - Aptitude and Mental Ability	Aptitude - Number System (HCF). By Euclid's division algorithm, $234 = 108 \times 2 + 18$ and then $108 = 18 \times 6 + 0$, so $\text{HCF}(108, 234) = 18$; setting $23x - 51 = 18$ gives $23x = 69$, so $x = 3$.
T4-193	Find the HCF of the polynomials $x^3 + x^2 - x + 2$ and $2x^3 - 5x^2 + 5x - 3$.	A) $x^2 - x + 1$	Part B - Aptitude and Mental Ability	Aptitude - Algebra (HCF of Polynomials). Doubling $p(x) = x^3 + x^2 - x + 2$ and subtracting $q(x) = 2x^3 - 5x^2 + 5x - 3$ eliminates the x^3 term, giving $7x^2 - 7x + 7 = 7(x^2 - x + 1)$; dividing both polynomials by $(x^2 - x + 1)$ leaves no remainder, since $p(x) = (x^2 - x + 1)(x + 2)$ and $q(x) = (x^2 - x + 1)(2x - 3)$, confirming that the HCF is $x^2 - x + 1$.
T4-194	Simplify : $(4^{-1} + 4^{-2} + 4^{-3})^0 \times (4^{-1} + 4^{-2} + 4^{-3})^1$.	C) 21/64	Part B - Aptitude and Mental Ability	Aptitude - Exponents (Simplification). Any non-zero quantity raised to the power 0 equals 1, so $(4^{-1} + 4^{-2} + 4^{-3})^0 = 1$ and the expression reduces to $4^{-1} + 4^{-2} + 4^{-3} = 1/4 + 1/16 + 1/64 = 16/64 + 4/64 + 1/64 = 21/64$.
T4-195	The average mark of 25 students was found to be 78.4. Later on, it was found that score of 96 was misread as 69. Find the correct mean of the marks.	B) 79.48	Part B - Aptitude and Mental Ability	Aptitude - Average. The (wrong) total for 25 students is $25 \times 78.4 = 1,960$; correcting the misread score of 96 that had been taken as 69 adds back $96 - 69 = 27$, giving a correct total of 1,987, so the correct mean is $1,987/25 = 79.48$.
T4-	D, F, G, H, I and M are sitting in a row.	A) H	Part B - Aptitude and Mental Ability	Aptitude - Seating Arrangement (Logical

196	I and M are in the centre, and F and D are at the beginning and at the end. G is sitting on the left of D. Then who is sitting on the right of F?		Mental Ability	Reasoning). With I and M fixed at the two centre seats and F and D at the two ends, the condition that G sits immediately to D's left rules out D occupying the extreme-left seat, so D must occupy the last seat with G just before it, leaving F at the first seat and H in the only remaining seat, second from the left, which is the seat to the right of F.
T4-197	If A = 26, SUN = 27, then CAT = ?	C) 57	Part B - Aptitude and Mental Ability	Aptitude - Coding-Decoding. Each letter's code value is 27 minus its position in the alphabet (A gives 27-1=26, matching A=26; S, U, N give 8, 6, 13, which sum to 27, matching SUN=27), so for CAT, C=24, A=26 and T=7 add up to 24+26+7 = 57.
T4-198	If $a \neq b \neq c$ is given, which one of the following is correct?	D) $a \neq c$ or $a = c$	Part B - Aptitude and Mental Ability	Aptitude - Logical Reasoning. The statement a not-equal-to b not-equal-to c only guarantees a is not equal to b and b is not equal to c, saying nothing about how a and c compare, so options that assert a is not equal to c (or that all three are distinct) are not guaranteed, and $a=b=c$ directly contradicts the given condition; only the statement 'a is not equal to c, or a equals c' covers both remaining possibilities and is therefore always true.
T4-199	The missing term in the given alpha-numeric series is 2 X 2, 7 T 4, 14 P 12, 23 L 48, ____.	A) 34 H 240	Part B - Aptitude and Mental Ability	Aptitude - Alpha-numeric Series. Reading the three positions of each term separately, the first numbers 2, 7, 14, 23 increase by 5, 7, 9 so the next increase is 11, giving 34; the letters X(24), T(20), P(16), L(12) each drop by

				4, giving 8, which is H; and the last numbers 2, 4, 12, 48 are multiplied by 2, 3, 4 so the next factor is 5, giving 240, so the missing term is 34 H 240.
T4-200	Two unbiased dice are rolled once. Find the probability of getting the product of face value is 4 or the difference of the face value is 5.	B) 5/36	Part B - Aptitude and Mental Ability	Aptitude - Probability. Out of 36 equally likely outcomes, a product of 4 occurs in 3 ways, (1,4), (4,1), (2,2), and a difference of 5 occurs in 2 ways, (1,6), (6,1), with no outcome shared between the two events, so the combined probability is $(3+2)/36 = 5/36$.
