

2022 - Group 1 Preliminary Exam - Answer Key

Q1-Q200

Q.No	Question	Correct Answer	Syllabus	Explanation
1	The primary contaminant included in cigar smoke is	C) Carbon monoxide and Benzene	Unit I - General Science	Tobacco/cigar smoke contains many chemicals, but the two most damaging contaminants are carbon monoxide, which binds to haemoglobin in red blood cells and reduces the blood's oxygen-carrying capacity, and benzene and related polycyclic aromatic hydrocarbons (such as benzopyrene), which are carcinogenic and cause smoking-related cancers. Nicotine is present too, but it is the addictive stimulant rather than the primary toxic combustion contaminant, which is why carbon monoxide and benzene is the better-fitting pair. This is covered in Class 10 Science, Unit 21 "Health and Diseases", in the section on the harmful effects of tobacco smoke.
2	When a ball is projected upwards there is an increase in its: 1. Potential Energy, 2. Momentum, 3. Kinetic Energy	A) 1 only	Unit I - General Science	As a ball rises after being projected upwards, gravity continuously decelerates it, so its speed keeps falling; since both momentum (mass x velocity) and kinetic energy (half mv-squared) depend directly on speed, both of these decrease during the upward flight. Height above the ground, however, keeps

				increasing as the ball rises, and gravitational potential energy (mgh) depends on height, so potential energy is the only one of the three quantities that increases. This is covered in Class 11 Physics Volume 1, Unit 4 "Work, Energy and Power", in the discussion of the law of conservation of mechanical energy.
3	Alterations in the environments represent selective pressures upon the population to which it must adjust. This statement infers that	B) Organisms which fail to adjust to the changed environment must vanish	Unit I - General Science	This statement is describing natural selection: when the environment changes, individuals whose traits allow them to cope with the new conditions survive and reproduce, while those that cannot adjust are progressively eliminated from the population. It does not claim that organisms actively reshape their own bodies or the environment to suit themselves (that would be closer to Lamarckism), so the correct inference is that maladapted organisms are weeded out over time. This is covered in Class 10 Science, Unit 19 "Origin and Evolution of Life", section 19.3.2 "Darwinism or Theory of Natural Selection".
4	The enzyme involved in unwinding of DNA is	B) Helicase	Unit I - General Science	During DNA replication, the double helix must first be unwound and its two strands separated before new complementary strands can be synthesised. The enzyme helicase binds at the origin of replication and breaks the hydrogen bonds holding the two DNA strands together, unwinding the double helix

				so replication can proceed; polymerase then synthesises new strands, ligase joins DNA fragments, and telomerase extends chromosome ends, none of which perform the initial unwinding step. This is covered in Class 10 Science, Unit 18 "Genetics", in the section on DNA Replication.
5	The first step in the seed germination is imbibition of water which induce the	D) Resumes metabolic activities	Unit I - General Science	Imbibition is the absorption of water by the dry seed, causing it to swell; this rehydration is what directly reactivates the seed's enzymes and resumes its metabolic activities, such as respiration and mobilisation of stored food reserves, which had been dormant in the dry seed. Only after these metabolic processes resume does the embryo actually begin to grow, with the radicle emerging as a later, downstream event rather than the immediate effect of imbibition itself. This is covered in Class 11 Bio-Botany, Unit 15 "Plant Growth and Development", section 15.5 "Seed Germination and Dormancy".
6	Which is the stronger acid than phenol due to the presence of three same electron withdrawing groups: (i) O-Toluic Acid, (ii) Benzoic acid, (iii) Salicylic Acid, (iv) Picric Acid	D) (iv) only	Unit I - General Science	Picric acid (2,4,6-trinitrophenol) is phenol with three identical nitro (-NO ₂) groups substituted onto its benzene ring; nitro groups are strongly electron-withdrawing, and having three of them pulls electron density away from the O-H bond, stabilising the resulting phenoxide ion and making the compound far more acidic than plain phenol.

				O-Toluic acid, benzoic acid and salicylic acid are carboxylic acids with at most one or two substituents, not phenol derivatives bearing three identical withdrawing groups, so only picric acid fits the description. This is covered in Class 12 Chemistry Volume 2, Unit 11 "Hydroxy Compounds and Ethers", in the section on the acidity of substituted phenols and nitration of phenol.
7	Which is the one considered to be more important to study the History of science is	D) Conjunction with philosophy	Unit I - General Science	The history of science is generally regarded as most valuable when studied alongside the philosophy of science, because tracing how scientific ideas, methods and worldviews actually developed and changed over time requires understanding the philosophical questions, about evidence, method, and the nature of explanation, that shaped why scientists accepted or rejected particular theories. Mere antiquarian curiosity about old facts, or isolated technical scientific knowledge on its own, does not by itself explain why science evolved the way it did, which is why the conjunction with philosophy is considered the more important framing.
8	Which one of the following phenomenon cause adverse changes in global climate pattern and wreak havoc world wide in the form of floods and	B) El-Nino	Unit I - General Science	El Nino is a periodic warming of sea-surface temperatures in the equatorial Pacific Ocean that disrupts normal atmospheric circulation patterns worldwide, weakening the monsoon and causing droughts in some regions (such

	droughts?			as parts of India, Australia and Southeast Asia) while triggering heavy rainfall and flooding in others (such as parts of South America). Carbon dioxide and tropical cyclones affect climate and weather too, but it is El Nino specifically that is known for this global see-saw of simultaneous droughts and floods across different regions. This is covered in Class 11 Geography, Unit 5 "Hydrosphere", in the section on ocean currents and El Nino.
9	Match the following: List I, (a) Polyethylene glycol, (b) Bt Toxin, (c) Glyphosate, (d) Proline; List II, 1. Herbicide, 2. Stress Tolerance, 3. Insecticide, 4. Cell Fusion	D) (a)-4 (b)-3 (c)-1 (d)-2	Unit I - General Science	Polyethylene glycol (PEG) is a chemical used to induce fusion of plant protoplasts (cell fusion) in tissue culture; Bt toxin, produced by the bacterium <i>Bacillus thuringiensis</i> , is an insecticidal protein used in genetically modified crops to kill specific insect pests; Glyphosate is a widely used herbicide, and crop plants are genetically engineered to be glyphosate-tolerant so the herbicide kills weeds without harming the crop; and Proline is an amino acid that accumulates in plant cells as an osmoregulator, helping plants tolerate stresses such as drought and salinity. This is covered in Class 12 Bio-Botany, Unit 4 "Principles and Processes of Biotechnology" (for Bt toxin, glyphosate-tolerant transgenic crops, and PEG-mediated protoplast fusion), and Class 11 Bio-Botany, Unit 15 "Plant Growth and Development" (for

				proline as a stress-tolerance osmoregulator).
10	Which of the following statement is/are correct, NANOBOTS are: (1) Robots that carry out a very specific function at nano scale level, (2) They can be injected into blood stream, (3) They can be used to measure toxic elements in the environment, (4) They are very cheap to produce	C) (1), (2) and (3)	Unit I - General Science	Nanobots are robots scaled down to microscopic (nanometre) size so that they can be placed in very small spaces to carry out a specific function, including being injected into the bloodstream for medical applications and being used to detect or measure toxic elements in the environment; these three capabilities (1, 2, 3) are genuine, established uses envisaged for nanobots. Producing machines at this level of precision, however, requires highly sophisticated fabrication technology, making them expensive rather than cheap, so statement (4) is incorrect. This is covered in Class 6 Science, Unit 2 "Force and Motion", in the discussion of nanobots and their applications.
11	_____ was the first mission to be operationalized under the National Action Plan on Climate Change (NAPCC).	B) National Solar Mission (NSM)	Unit I - General Science	India's National Action Plan on Climate Change (2008) comprises eight national missions covering areas such as solar energy, energy efficiency, water and sustainable agriculture. Among these, the Jawaharlal Nehru National Solar Mission, launched in January 2010 to promote the development and deployment of solar power, was the first of the eight missions to become operational, ahead of the Solar Cities Programme and other solar-related sub-schemes listed as distractors, which are components of the

				broader solar mission rather than separate NAPCC missions in their own right.
12	Which Biodiversity park in India was announced as the 1st "Other Effective Area based Conservation Measures" (OECMs) site?	B) Aravalli Biodiversity Park	Unit I - General Science	Other Effective area-based Conservation Measures (OECMs) are sites recognised for delivering effective, long-term biodiversity conservation outside formally protected areas. The Aravalli Biodiversity Park in Gurugram, Haryana, developed on what was once a degraded mining site and restored into a thriving native forest ecosystem, was recognised as India's first OECM site, ahead of other urban biodiversity parks such as the Tilpath Valley and Yamuna Biodiversity Parks in Delhi.
13	Which of the following are correctly paired: (i) KVK - Kisan Vigyan Kendra, (ii) SMAE - Sub Mission on Agriculture Extension, (iii) NSDA - National Skill Development Agency, (iv) ATMA - Agricultural Technology Management Agency	B) (ii), (iii) and (iv)	Unit V - Indian Economy and Development Administration in Tamil Nadu	SMAE correctly stands for the Sub-Mission on Agricultural Extension (a component of the National Mission on Agricultural Extension and Technology), NSDA correctly stands for the National Skill Development Agency, and ATMA correctly stands for the Agricultural Technology Management Agency, a district-level body that coordinates agricultural extension activities, so pairs (ii), (iii) and (iv) are all correctly matched. Pair (i), however, is wrong: KVK actually stands for Krishi Vigyan Kendra ('Farm Science Centre'), not 'Kisan Vigyan Kendra', which is why option B excludes it.
14	How many number of Ramsar sites are	C) 75	Unit II - Geography of	Ramsar sites are wetlands of international

	identified in India till 15th August 2022?		India	importance designated under the Ramsar Convention for their ecological significance. India added a large number of new wetlands to the Ramsar list through 2022, and by 15 August 2022, marking 75 years of India's independence, the country's tally of Ramsar sites had reached 75, making it a symbolically significant milestone number for that Independence Day. This is covered in Class 11 Geography, Unit 7 "Biosphere", in the section on Ramsar Wetland Sites.
15	PM Gatishakti is a transformative approach for economic growth and Sustainable Development which focuses on _____	B) Multimodal Connectivity	Unit V - Indian Economy and Development Administration in Tamil Nadu	PM Gati Shakti (launched in 2021) is a National Master Plan that digitally integrates the planning and implementation of infrastructure projects across different ministries and modes of transport, roads, railways, ports, waterways and airports, on a single platform. Its central aim is to achieve seamless multimodal connectivity, reducing logistics costs and project delays, rather than being targeted specifically at education, SHG empowerment or environmental development, which are separate policy areas.
16	Which one of the following is NOT an objective of the Union Government's 'Beti Bachao Beti Padhao' scheme? (i) Prevention of gender biased sex selective elimination, (ii) Ensuring	D) (iv) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	Beti Bachao Beti Padhao (launched in 2015) has three core objectives: preventing gender-biased sex-selective elimination, ensuring the survival and protection of the girl child, and ensuring her education and participation, covering objectives (i), (ii) and (iii). Creating a

	survival and protection of the Girl child, (iii) Ensuring education and participation of the Girl child, (iv) Creating a fixed deposit in the name of the Girl child concerned			fixed deposit account in the name of the girl child is instead the defining feature of a separate scheme, the Sukanya Samriddhi Yojana, which is why option (iv) is correctly identified as not being a Beti Bachao Beti Padhao objective.
17	Read the list given below carefully of dignitaries and find out among them the correct hierarchical order with respect to their rank and precedence: (i) Chief Election Commissioner of India, (ii) Cabinet Secretary, (iii) Chief of Army Staff, (iv) Deputy Speaker, Lok Sabha	C) (iv), (ii) and (iii)	Unit IV - Indian Polity	India's official Table of Precedence, which the Vice-President's own rank is also fixed by, ranks the Chief Election Commissioner (grouped with the Chairperson of the UPSC and the Comptroller and Auditor General) above the Deputy Speaker of the Lok Sabha, who in turn ranks above the Cabinet Secretary, who ranks above the service Chiefs of Staff such as the Chief of Army Staff, giving the descending order CEC, Deputy Speaker, Cabinet Secretary, Chief of Army Staff. The marked answer's printed text, "(iv), (ii) and (iii)", omits item (i) from the sequence, which appears to be a transcription gap in the source paper rather than a change to the underlying correct precedence order reasoned above. This general concept of an official warrant/order of precedence, headed by the President and Vice-President, is introduced in Class 10 Social Science, Civics Unit 2 "Central Government".
18	Which is the international coalition of solar-resource rich countries that are	B) International Solar Alliance (ISA)	Unit V - Indian Economy and	The International Solar Alliance, launched jointly by India and France in 2015, is a

	collectively addressing common challenges on solar-energy applications?		Development Administration in Tamil Nadu	coalition of solar-resource-rich countries (mostly lying between the Tropics of Cancer and Capricorn) that work together to scale up solar energy deployment, mobilise investment, and share technology and best practices to address common challenges in solar-energy applications. This distinguishes it from broader energy bodies like IRENA or the IEA, or from a solar-specific professional body like ISES, none of which is defined specifically as a coalition of solar-rich nations in this way. This is covered in Class 12 Political Science, Unit 12 "Environmental Concerns and Globalisation".
19	Arrange the following Indian Women Olympic Medal Winners in Chronological order: 1. Saina Nehwal, 2. Lovlina Borgohain, 3. Sakshi Malik, 4. Karnam Malleswari	C) 4, 1, 3, 2	Unit I - General Science	Karnam Malleswari won weightlifting bronze at the 2000 Sydney Olympics, becoming the first Indian woman to win an Olympic medal; Saina Nehwal won badminton bronze at the 2012 London Olympics; Sakshi Malik won wrestling bronze at the 2016 Rio Olympics; and Lovlina Borgohain won boxing bronze at the 2020 Tokyo Olympics. Arranged by the year each medal was won, the chronological sequence is therefore Malleswari (4), Nehwal (1), Malik (3), Borgohain (2).
20	Palmer index is associated with which of the following natural disaster?	C) Drought	Unit II - Geography of India	The Palmer Drought Severity Index (PDSI), developed by meteorologist Wayne Palmer, measures the intensity and duration of drought conditions in a region by tracking

				soil moisture and water balance relative to normal conditions, using factors such as precipitation, temperature and available water content. It is therefore specifically a drought-monitoring tool, distinct from indices or scales used for earthquakes, volcanic eruptions or floods.
21	Match the following and choose the correct option related to ISRO: (a) URSC - 1. ISRO's virtual space Museum, (b) ITTP - 2. ISRO satellite centre, (c) SPARK - 3. Space science for school students, (d) YUVIKA - 4. Technical training for ISRO staff	C) (a)-2 (b)-4 (c)-1 (d)-3	Unit I - General Science	URSC (U R Rao Satellite Centre) is ISRO's satellite-building centre in Bengaluru; ITTP (ISRO Technical Training Programme) provides technical training for ISRO's own staff and engineers; SPARK is ISRO's virtual space museum/outreach portal that lets the public explore space technology online; and YUVIKA (Yuva Vigyani Karyakram, the Young Scientist Programme) is ISRO's initiative that introduces school students to space science during a residential summer programme. Matching each acronym to its correct role gives (a)-2, (b)-4, (c)-1, (d)-3.
22	On April 10, 1802, the Great Trigonometrical Survey of India Commenced its work from _____ city.	D) Madras	Unit III - History, Culture of India, and Indian National Movement	The Great Trigonometrical Survey of India, a colonial-era project to accurately map the Indian subcontinent using precise triangulation methods, was begun by William Lambton on 10 April 1802, starting from Madras (present-day Chennai) in the south before the survey network was gradually extended northward across the country, eventually leading to landmark achievements

				such as the measurement of Mount Everest's height.
23	Carolyn Bertozzi, Morten meldal and Barry sharglers won the 2022 Nobel prize in Chemistry for?	A) For the development of click chemistry and bioorthogonal chemistry	Unit I - General Science	Carolyn Bertozzi, Morten Meldal and K. Barry Sharpless jointly won the 2022 Nobel Prize in Chemistry for developing click chemistry, a way of snapping molecular building blocks together quickly and reliably, and, in Bertozzi's case, for extending this into bioorthogonal chemistry, which allows such click reactions to be carried out inside living organisms without disrupting their normal biochemistry, opening up new tools for drug development, cancer treatment and biological research. This is distinct from the other listed 2022 Nobel achievements, which belonged to different prize categories (genome editing and ancient-hominin genomics, for instance, were unrelated Nobel-winning work in other years or categories).
24	Match the winner of medal in Commonwealth Games 2022 with their sport. List I, Player: (a) Sharat Kamal, (b) Lakshya Sen, (c) Mirabai Chanu, (d) Nikhat Zareen; List II, Sport: 1. Boxing, 2. Weight lifting, 3. Table Tennis, 4. Badminton	B) (a)-3 (b)-4 (c)-2 (d)-1	Unit I - General Science	At the 2022 Commonwealth Games in Birmingham, Sharat Kamal won gold in table tennis, Lakshya Sen won gold in badminton, Mirabai Chanu won gold in weightlifting, and Nikhat Zareen won gold in boxing. Matching each player to their sport therefore gives (a)-3, (b)-4, (c)-2, (d)-1.
25	Which one of the following Indicator is not used to calculate Human	B) CPI	Unit V - Indian Economy and	The Human Development Index is calculated using three dimensions: a long and healthy

	Development Index (HDI)?		Development Administration in Tamil Nadu	life (measured through life expectancy), knowledge (measured through the education index, based on years of schooling), and a decent standard of living (measured through per-capita income/GNI). CPI (Consumer Price Index), which measures inflation in the price of a basket of goods, plays no part in this formula, which is why it is the indicator that is NOT used to calculate HDI. This is covered in Class 9 Social Science, Economics Unit 1 "Understanding Development", which includes the question of which dimension HDI does not take into account.
26	"Nambikkai Inaiyam (NI)", a Tamil Nadu Government project, is about	A) Statewide Block chain infrastructure	Unit V - Indian Economy and Development Administration in Tamil Nadu	Nambikkai Inaiyam (NI), meaning "Trust Link", is the Tamil Nadu government's state-wide blockchain-as-a-service platform, built by the Tamil Nadu e-Governance Agency to let citizens store and share tamper-proof digital documents such as certificates, mark sheets and land records securely across government departments. It functions as the underlying blockchain backbone on which individual e-services are then built, rather than being itself a resident-data repository, a single service portal, or a training programme for officials, which is why it is correctly described as a state-wide blockchain infrastructure.
27	Which is correct? (i) HYV - High	B) (i) and (iii) only	Unit V - Indian	HYV correctly stands for High Yielding

	Yielding Varieties (ii) MSP - Maximum Support Prices (iii) PDS - Public Distribution System (iv) IPM - Integrated Pesticide Management		Economy and Development Administration in Tamil Nadu	Varieties, the fertiliser-responsive rice and wheat seeds that powered India's Green Revolution, and PDS correctly stands for Public Distribution System, the government network of ration shops that distributes subsidised food grain. MSP, however, actually stands for Minimum Support Price (not Maximum), the floor price the government guarantees farmers to protect them from a market crash, and IPM stands for Integrated Pest Management (not Integrated Pesticide Management), an approach that combines biological, cultural and limited chemical methods to control crop pests. Since only (i) and (iii) give the correct expansion, option B is correct; HYV, MSP and PDS are all covered together in Class 10 Social Science, Economics Unit 3 "Food Security and Nutrition".
28	Kalaigharin Anaithu Grama Orunginaintha Velan Valarchi Thittam aims at: 1. Increasing the cultivable area 2. Bringing fallow land under cultivation 3. Changing the crop pattern with introduction of new crops 4. Augmenting water resources	C) 1, 2 and 4 are correct	Unit V - Indian Economy and Development Administration in Tamil Nadu	Kalaigharin Anaithu Grama Orunginaintha Velan Valarchi Thittam (Kalaighar's All-Village Integrated Agricultural Development Scheme) is a Tamil Nadu rural-development programme aimed at expanding the area under cultivation, reclaiming fallow and uncultivated land for farming, and augmenting irrigation and water resources so that more land can be farmed productively. Changing the cropping pattern by introducing

				altogether new crops is not one of its stated objectives, since the scheme's focus is on bringing more land and water under existing agriculture rather than crop diversification, which is why objectives 1, 2 and 4 (and not 3) describe the scheme correctly.
29	Match the following: (a) 1997 (b) 1998 (c) 2006 (d) 2009, with, 1. Anaithu Grama Anna Marumalarchi Thittam, 2. Varumun Kappom Thittam, 3. Samathuvapuram, 4. Namakku Naame Thittam	A) (a)-3 (b)-4 (c)-2 (d)-1	Unit V - Indian Economy and Development Administration in Tamil Nadu	These are four Tamil Nadu rural-welfare schemes matched to their launch years: Samathuvapuram, a model-village scheme that settled different communities together to ease caste-based social conflict, began in 1997; Namakku Naame Thittam, a people's-participation rural development programme, was rolled out from 1997-98 (rounded here to 1998); Varumun Kappom Thittam, a preventive-healthcare screening and medical-camp scheme, was introduced around 2006; and Anaithu Grama Anna Marumalarchi Thittam, a comprehensive rural-infrastructure renewal scheme named in memory of Anna, was launched in 2009 - giving the match (a)-3, (b)-4, (c)-2, (d)-1. Samathuvapuram's role as a remedy devised against caste conflict is covered in Class 11 Political Science, Unit 14 "Political Developments in Tamil Nadu".
30	Which among the following is a scheme of Govt. of India for ensuring the safety and dignity of sanitation workers?	B) Namaste	Unit V - Indian Economy and Development	NAMASTE (National Action for Mechanised Sanitation Ecosystem) is a central government scheme, run jointly by the

			Administration in Tamil Nadu	Ministries of Housing and Urban Affairs and Social Justice and Empowerment, that seeks to end hazardous manual cleaning of sewers and septic tanks by promoting mechanisation, formally recognising and registering sanitation workers, and providing them safety gear, health checks, insurance and rehabilitation support. Smile targets welfare of beggars and transgender persons, Amber promotes energy-efficient appliances, and West relates to waste-management infrastructure, none of which are specifically about sanitation-worker safety and dignity, which is why Namaste is the correct answer.
31	During which period were bronze icons of the Nataraja deity with four hands cast?	B) Chola Period	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The Cholas were master bronze-casters who used the lost-wax (cire perdue) process to create images of exceptional artistic refinement, and the most celebrated of these is the four-armed Nataraja, depicting Shiva performing his cosmic dance of creation and destruction within a ring of fire. This iconic Chola bronze form, along with the Chola era's other major sculptural and architectural achievements, is covered in Class 9 Social Science, History Unit 7 "State and Society in Medieval India", which describes the Nataraja as "the best known" of the Cholas' lost-wax bronze images.
32	Match the following Acts with their	B) (a)-4 (b)-1 (c)-2 (d)-3	Unit I - General Science	These conservation laws were enacted in this

	corresponding years: (a) Madras Wild Elephants Preservation Act (b) Tamil Nadu Forest Act (c) Forest Conservation Act (d) Wildlife Protection Act, with, 1. 1882, 2. 1980, 3. 1972, 4. 1873			order: the Madras Wild Elephants' Preservation Act came first in 1873, followed by the Madras (Tamil Nadu) Forest Act in 1882, then the national Wildlife (Protection) Act in 1972, and finally the Forest (Conservation) Act in 1980 - giving the match (a)-4, (b)-1, (c)-2, (d)-3. The two national laws are covered in Class 10 Science, Unit 22 "Environmental Management", which states that the Wildlife Protection Act was established in 1972 and that forests are further safeguarded through the Forest Conservation Act, 1980.
33	Which of the following statements are true in respect of Dr. Muthulakshmi Reddy? 1. She was the first woman in India to get a degree in medicine. 2. She was the first woman Legislator in British India. 3. She was the first female student to be admitted in Maharaja's college. 4. She was the first woman President of the legislative council.	B) 2, 3 and 4	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Dr Muthulakshmi Reddy was not India's first woman doctor - Kadambini Ganguly and Anandibai Joshi had earned medical qualifications earlier - but she was the first woman student admitted to Maharaja's College, Pudukkottai, before going on to Madras Medical College, and in 1926 she became the first woman legislator in British India when nominated to the Madras Legislative Council, later also becoming the first woman to hold a presiding office in an Indian legislature as Deputy President of that Council. Statements 2, 3 and 4 are therefore true while statement 1 is factually wrong, which is why B is the correct combination; her landmark entry into the Madras

				Legislative Council in 1926 is recorded in Class 10 Social Science, History Unit 10 "Social Transformation in Tamil Nadu".
34	The significance of the Tamil Nadu Panchayat Raj (Amendment) Act, 2016 is	D) 50 percent reservation for women	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Panchayat Raj (Amendment) Act, 2016 raised the reservation for women in panchayat, panchayat union and district panchayat seats, including the offices of chairpersons, from the earlier one-third to fifty percent, significantly increasing women's representation in the state's three-tier local self-government system. This reservation increase, rather than any restructuring of the three-tier system or the creation of new planning bodies, was the amendment's key significance, which is why D is the correct answer.
35	During the early resistance against the British, who issued the "Tiruchirappalli Proclamation"?	C) Maruthu Brothers	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The Marudu brothers of Sivaganga, Periya Marudu and Chinna Marudu, who had formed the South Indian Confederacy with neighbouring palayakkarars against the British, issued the Tiruchirappalli Proclamation in June 1801 declaring the region's independence from British rule and asserting the right of the people of the land to govern themselves. This early and remarkable anti-colonial declaration, made well before the 1857 uprising, is covered in Class 8 Social Science, History Unit 4 "People's Revolt", which describes it as a proclamation

				of independence issued by the Marudu Pandyas.
36	Match the following: (a) Swami Sahajananda (b) M.C. Rajah (c) Pandit Iyothee Thass (d) Veeresalingam, related to, 1. Oppressed Hindus, 2. Tamizhan, 3. Nandanar Kalvi Kazhagam, 4. The Widows Home	A) (a)-3 (b)-1 (c)-2 (d)-4	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	M.C. Rajah (Mylai Chinnathambi Rajah), a pioneering leader of the depressed classes who became the first elected Legislative Council member from that community in Madras and founded the All India Depressed Classes Association in 1928, is linked here to the upliftment of oppressed Hindus, while Pandit Iyothee Thass, a radical Tamil scholar-activist who championed a casteless Tamil identity and published the journal Tamizhan, is linked to that paper. Swami Sahajananda's Nandanar Kalvi Kazhagam promoted education among depressed-caste communities, and the Telugu reformer Kandukuri Veeresalingam, described as South India's earliest champion of women's emancipation, worked for widow remarriage and opened homes and schools for widows, giving the match (a)-3, (b)-1, (c)-2, (d)-4. M.C. Rajah's work for the depressed classes and Veeresalingam's pioneering role in widow remarriage and women's education are covered respectively in Class 10 Social Science, History Unit 10 "Social Transformation in Tamil Nadu" and Class 8 Social Science, History Unit 8 "Status of Women in India through the Ages".

37	Assertion [A]: Human Resources is necessary for the progress of any country. Reason [R]: Investment in education and health of people can result in a high rate of returns in the future for a country.	A) Both [A] and [R] are true and [R] explains [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	A country's human resources - its people's skills, knowledge and health - are what actually put its physical and natural resources to productive use, so a well-educated and healthy population is essential for national progress, making Assertion [A] true. Because investment in education, training and healthcare builds this very human capital and yields high future returns in the form of a more productive, innovative and adaptable workforce, Reason [R] is not just true but is the direct explanation for why human resources matter, which is why option A is correct. This idea of human capital, built through investment in education, training and health, is introduced in Class 7 Social Science, Economics Unit 1 "Production".
38	Which among the following institutions secured the No. 1 overall rank according to the National Institutional Ranking Framework?	A) IIT, Madras	Unit V - Indian Economy and Development Administration in Tamil Nadu	The National Institutional Ranking Framework (NIRF), released annually by the Ministry of Education, ranks Indian higher-education institutions on parameters such as teaching, research, graduation outcomes, outreach and perception, and in its overall category IIT Madras has consistently topped the rankings in the years leading up to and including 2022, ahead of institutions like IISc Bangalore, AIIMS Delhi and IIT Bombay, which are typically ranked highly in their own specific categories (research institutions,

				medical colleges and engineering colleges respectively) rather than the overall list.
39	Match: Tinais and Their Gods - (a) Kurinji (b) Mullai (c) Marudam (d) Palai, with, 1. Kali, 2. Murugan, 3. Indra, 4. Tirumal	C) 2 4 3 1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Tholkappiyam, the earliest Tamil grammar, classifies the Sangam landscape into five tinais (ecological-cum-emotional regions), each presided over by its own deity: Kurinji (hill country) is associated with Seyon or Murugan, Mullai (forest/pastoral tracts) with Mayon or Tirumal, Marudam (fertile riverine plains) with Vendhan or Indra, and Palai (arid wasteland) with the fierce goddess Kotravai, identified here with Kali - giving the match (a)-2, (b)-4, (c)-3, (d)-1. This five-fold tinai scheme, central to interpreting Sangam love and war poetry, is a foundational concept of classical Tamil literary convention.
40	Gandhiji established an ashram at Sabarmathi. Likewise, an ashram was established in Tamil Nadu by Rajaji. Where was it established?	D) Thiruchengodu	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	C. Rajagopalachari (Rajaji), inspired by Gandhian ideals of simple communal living, self-reliance and social service, set up an ashram at Thiruchengodu in present-day Namakkal district, which served as a centre for constructive programmes such as khadi production, hand-spinning and anti-untouchability work in the Gandhian mould, mirroring the role Gandhi's own Sabarmati Ashram played in Ahmedabad.
41	Which of the following statements are true about Ramalinga Adigal? (i) He started the Samarasa Suddha	C) (i), (ii) and (iii) are true	Unit VI - History, Culture, Heritage and Socio-Political	Ramalinga Adigal (Vallalar) founded the Samarasa Vedha Sanmarga Sangam in 1865, later renamed the Samarasa Suddha

	Sanmarga Satya Sangam in 1865 (ii) He was against caste system (iii) He established Satya Dharma Salai in 1867		Movements in Tamil Nadu	Sanmarga Satya Sangam ("Society for Pure Truth in Universal Selfhood"), through which he preached jeevakarunyam, or compassion for all living beings, and firmly opposed caste-based discrimination and rigid ritualism. In 1867, in the wake of a severe famine, he also established a free feeding house at Vadalur (the Satya Dharma Salai) that fed the poor irrespective of caste, so all three statements are true. This is covered in Class 10 Social Science, History Unit 5 "Social and Religious Reform Movements in the 19th Century", which records both the 1865 founding of the Sangam and the 1867 establishment of the free feeding house at Vadalur.
42	Find the incompatible pair: (A) Pradhaba Mudhaliar Sarithiram - Vedanayagam Pillai (B) Sugunasundhari - Nadesa Saathiri (C) Kamalambal Sarithiram - Rajam Ayyar (D) Padmavathi Sarithiram - Madhavaiya	B) Sugunasundhari - Nadesa Saathiri	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Pradhaba (Prathapa) Mudhaliar Charithram (1879), widely regarded as the first Tamil novel, and Sugunasundari were both written by the same author, Mayuram Vedanayagam Pillai, not by Nadesa Sastri, which makes pair (B) the incompatible one. The other pairs are correctly matched: Kamalambal Charithram was written by B.R. Rajam Aiyar and Padmavathi Charithram by A. Madhaviah, both landmark works of early Tamil prose fiction alongside Vedanayagam Pillai's novels.
43	In 1921 at Erode, E.V.R. picketed toddy shops. Two women also participated in the picketing and were	A) Nagammaiyar and Kannammal	Unit VI - History, Culture, Heritage and Socio-Political	As part of Periyar E.V. Ramasamy's early temperance and social-reform campaigns at Erode in 1921, Nagammaiyar and

	the first women to be arrested for picketing toddy shops in Tamil Nadu. Who were they?		Movements in Tamil Nadu	Kannammal joined him in picketing toddy shops and were arrested for it, becoming the first women in Tamil Nadu to be arrested in an anti-liquor picketing agitation. Both women went on to be counted among the prominent women activists of the Self-Respect Movement that Periyar led, alongside figures such as Moovalur Ramamirtham and Dr Muthulakshmi Ammaiyar, a point noted in Class 10 Social Science, History Unit 10 "Social Transformation in Tamil Nadu", in its account of women in the Self-Respect Movement.
44	Which of the following are correctly paired? 1. Nizhal Thaankalgal - Vaigunda Swamigal 2. Hindu Progressive Improvement - Rajaram Mohan Roy Society 3. Samarasa Sanmarka Sangam - Vallalar 4. Self Respect Morality - Vedanayagam Pillai	A) 1 and 3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Vaigunda Swamigal, the 19th-century Ayya Vazhi religious reformer of southern Tamil Nadu, established Nizhal Thangals as prayer and community halls for his followers, and Vallalar (Ramalinga Adigal) founded the Samarasa Sanmarga Sangam to preach universal compassion and oppose caste distinctions, making pairs 1 and 3 correct. The "Hindu Progressive Improvement" reform effort is properly linked to Raja Rammohan Roy himself (not a separately named society), and the Self-Respect movement's philosophy of rejecting caste and ritual is Periyar E.V. Ramasamy's legacy, not Vedanayagam Pillai's, which is why pairs 2 and 4 are incorrect and only option A holds; Vallalar's

				Samarasa Sanmarga Sangam is covered in Class 10 Social Science, History Unit 5 "Social and Religious Reform Movements in the 19th Century".
45	Choose the correct kural for the explanation given below: "It is more pleasant to hold the dart that has missed an Elephant than that which has targeted the hare in the forest."	A) Kaana Muyaleydha Ampinil Yaanai Pizhaiththavel Endhal Inidu	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This couplet from the Thirukkural teaches that it is nobler to aim high and fail than to succeed at something trivial: holding the spear that missed an elephant while hunting is more satisfying than holding the arrow that successfully hit only a hare, because the attempt itself reflects ambition and courage regardless of the outcome. This idea, that setting one's sights on a great goal is praiseworthy even in failure, is precisely the sense captured in "Kaana Muyaleydha Ampinil Yaanai, Pizhaiththavel Endhal Inidu", making option A the correct kural for the given explanation.
46	Match the following books with their authors and find the correct order: (a) Ulagam Sutrum Thamilan (b) Gnanaratham (c) Thanneer Thanneer (d) En Kadhai, with, 1. Desiya Kavi, 2. Swaminathan, 3. Ve. Ramalingam, 4. A. Karuppan	D) (a)-4 (b)-1 (c)-2 (d)-3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Ulagam Sutrum Thamilan, the popular travelogue of a globe-trotting Tamilian, is the work of A. Karuppan; Gnanaratham is associated with the poet-title "Desiya Kavi" (National Poet), traditionally used for Subramania Bharati and those in his poetic tradition; the acclaimed play Thanneer Thanneer, on drought and rural water scarcity, was written by Komal Swaminathan; and En Kadhai, the candid autobiography that stirred controversy in its time, was

				written by Ve. Ramalingam (Periyar E.V. Ramasamy's autobiography of that title, as serialised in Viduthalai) - giving the match (a)-4, (b)-1, (c)-2, (d)-3.
47	Who said these lines to whom? "Maarivaram koorin mannuyir illai, Mannuyir ellam mannaal Vendhan".	A) Manimegala deity to Udhayakumaran	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In the Tamil Buddhist epic Manimekalai, the guardian deity Manimekala Devi appears before Prince Udhayakumaran to warn and counsel him, and in these lines she teaches that if rain fails, living beings cannot survive, and that all living beings depend on the land, which in turn is protected by the king's just rule. The verse thus underscores the epic's recurring theme that a righteous king's primary duty is to ensure the people's welfare and sustenance, a moral lesson delivered by the deity Manimekala to Udhayakumaran, matching option A.
48	"Urellam koodi olikka azhuthittu, perinai neekki pinamenru perittu" - Who defined death as an undeniable force?	B) Thirumoolar	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In the Thirumandiram, the Saiva mystic-poet Thirumoolar describes how, when a person dies, the whole town gathers and wails loudly, and the person's name is stripped away and replaced with the word "pinam" (corpse) - a stark image capturing how death erases identity and status instantly and inevitably. This vivid depiction of death as an inescapable leveller of all human distinction is characteristic of Thirumoolar's philosophical verses on the impermanence of the body, making him the poet being referred

				to here.
49	Choose the correct meaning for the following sentences: 1. Palakudai Neezhalum Thankudai keel Kaanbar 2. Iravaar Irapparkku Ondru Ieevar	C) These two statements eulogize the farmers	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This is a celebrated Purananuru verse in praise of farmers (uzhavar perumai): it says that even those who sit under the many ceremonial umbrellas of royal status will ultimately find themselves standing under the farmer's "umbrella" (the rain and shade that sustain crop and life), and that the farmer, though never begging from anyone, gives something to whoever asks. Together the lines glorify the farmer as society's true sustainer, upon whom even kings and the powerful depend for their food and survival, which is why the verses eulogise farmers rather than kings, philanthropists, or the humble.
50	"Nadaakondro! Kadaakondro!! avazhi nallai vazhiya nilanse!" - Whose character plays an important role in shaping the ideal of world emancipation in Purananuru?	B) Men (Aadavar)	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This Purananuru verse, addressed to the land itself (whether it becomes cultivated field or wasteland, may it prosper), reflects the Sangam-age conviction that a land's fortune is shaped not by its physical form but by the conduct and enterprise of the men (aadavar) who inhabit and work it - their courage, industry and righteousness determine whether a region flourishes. This emphasis on human, specifically male, agency and character as the true engine of a land's progress and well-being is what the poem holds up as the basis for the world's

				betterment, matching option B.
51	Which Festival was celebrated throughout Tamilaham during the Sangam Age?	D) Thiruvathirai	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Thiruvathirai (Arudra Darisanam), observed in the Tamil month of Margazhi in honour of Shiva's cosmic dance, is recorded in Tamil literary tradition as a festival celebrated uniformly across the Chera, Chola and Pandya lands of ancient Tamilaham, unlike more regionally or community-specific festivals such as Adippooram, Onam or Navarathiri. Its wide, pan-Tamil observance made it one of the few festivals shared across the whole Sangam-age Tamil country rather than being tied to a single locality or deity-cult. This is covered in Class 12 Tamil, Unit 5, " ", in the list of festivals from the Mylapore Padhigam (Margazhi - Thiruvathirai Vizha).
52	"Kavarum Kazhagamum Kaiyum Tharukki Ivaryaar Illagi yaar" - to whom does the advice is said in this Kural?	D) Kings	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This line is Kural 934 from the " " (chapter on Gambling) in the Porutpaal (Wealth) division of the Thirukkural, which is traditionally read as Valluvar's counsel to a ruler on the conduct and vices that can undo a kingdom; the verse warns that one who cannot renounce gambling, quarrelsome company and pilfering will end up friendless and ruined, a warning aimed above all at a king whose indulgence in such vices could bankrupt and destabilise the state. This is covered in Class 12 Tamil, Unit 8, in the

				Thirukkural chapter " ".
53	Match List I with List II: List I - (a) Thirumurugatruppadai (b) Porunararruppadai (c) Sirupanarruppadai (d) Kurinjipattu; List II - 1. Mudathamakkanniyar 2. Nakkeerar 3. Kapilar 4. Nallur Nathathanar	C) (a)-2 (b)-1 (c)-4 (d)-3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Among the ten Pattuppattu (Ten Idylls) of Sangam literature, each poem has a traditionally fixed author: Thirumurugatruppadai is attributed to Nakkeerar, Porunararruppadai to Mudathamakkanniyar, Sirupanarruppadai to Nallur Nathathanar, and Kurinjipattu to Kapilar, which gives the matching (a)-2, (b)-1, (c)-4, (d)-3. The list of these ten Pattuppattu works is covered in Class 7 Tamil, Term 2, Unit 1, " " (the individual poet-attributions being standard Sangam-literature reference knowledge alongside that chapter's list).
54	Find out the missing value in the given figure. [Figure: circle divided into sections with values 4, 7, 2, 9, 3, 8, 11, 5 on outer ring and 1, 125, 27, ? in inner sections]	C) 216	Part B, Unit II - Reasoning	In this figure-based number series, each inner value is obtained by cubing the difference between the pair of outer numbers in its segment; for example, the pair (4, 7) gives a difference of 3, and $3^3 = 27$, while the pair (3, 8) gives a difference of 5, and $5^3 = 125$, both of which match values already shown in the figure. Applying the same rule to the remaining pair, 11 and 5, gives a difference of 6, and $6^3 = 6 \times 6 \times 6 = 216$, which is the missing value.
55	Find the common ratio for the geometric sequence 0.15, 0.015, 0.0015, ...	A) 0.1	Part B, Unit I - Aptitude	The common ratio of a geometric sequence is found by dividing any term by the term immediately before it; here $0.015 \div 0.15 =$

				0.1, and checking the next pair, $0.0015 \div 0.015 = 0.1$ as well, confirming that the common ratio of this sequence is 0.1.
56	Find the sum of $1^2 + 2^2 + \dots + 19^2$.	C) 2470	Part B, Unit I - Aptitude	The sum of the squares of the first n natural numbers is given by the formula $n(n+1)(2n+1)/6$; substituting $n = 19$ gives $(19 \times 20 \times 39)/6 = 14,820/6 = 2470$, which is the required sum.
57	'A' can finish a work in 18 days and 'B' can do the same work in half the time taken by 'A'; if they work together, what part of the same work can they finish in a day?	B) 1/6	Part B, Unit I - Aptitude	Since A finishes the work in 18 days, A's one-day work is $1/18$; B takes half of A's time, i.e. 9 days, so B's one-day work is $1/9$. Working together, their combined one-day work is $1/18 + 1/9 = 1/18 + 2/18 = 3/18 = 1/6$, meaning they complete one-sixth of the work in a single day.
58	The side of a metallic cube is 12 cm. It is melted and formed into a cuboid whose length and breadth are 18 cm and 16 cm respectively. Find the height of the cuboid.	A) 6 cm	Part B, Unit I - Aptitude	Melting a solid and recasting it into another shape preserves its volume, so the cuboid's volume equals the cube's volume, $12^3 = 1728 \text{ cm}^3$. With length 18 cm and breadth 16 cm, the height is $1728 \div (18 \times 16) = 1728 \div 288 = 6 \text{ cm}$.
59	The compound interest on ₹ 16,000 for 9 months at 20% per annum compounded quarterly is	C) ₹ 2,522	Part B, Unit I - Aptitude	At 20% per annum compounded quarterly, the effective quarterly interest rate is 5%, and 9 months equals 3 quarters, so the amount is $16,000 \times (1.05)^3 = 16,000 \times 1.157625 = ₹18,522$. The compound interest earned is therefore $18,522 - 16,000 = ₹2,522$.
60	In what time period will ₹ 10,000 earn an interest of ₹ 2,000 at 10% per	A) 2 years	Part B, Unit I - Aptitude	Using the simple interest formula $I = PRT/100$ with $P = ₹10,000$, $R = 10\%$ per

	annum?			annum and $I = ₹2,000$: $2,000 = (10,000 \times 10 \times T) / 100 = 1,000T$, which gives $T = 2$ years.
61	A car travels 90 km in 2 hours 30 minutes. Then the time required to cover 210 km with the same speed is	A) 5 hours 50 minutes	Part B, Unit I - Aptitude	The car's speed is $90 \text{ km} \div 2.5 \text{ hours} = 36 \text{ km/h}$. Travelling 210 km at this same speed takes $210 \div 36 = 5.8333$ hours, and since 0.8333 hours equals 50 minutes (0.8333×60), the total time required is 5 hours 50 minutes.
62	The radius of two right circular cylinders is in the ratio 3 : 2. The ratio of their heights is 5 : 3. Then the ratio of their C.S.A. is	A) 5 : 2	Part B, Unit I - Aptitude	The curved surface area of a right circular cylinder is $2\pi rh$, so for two cylinders it depends only on the product of radius and height. With radius ratio 3:2 and height ratio 5:3, the CSA ratio is $(3 \times 5) : (2 \times 3) = 15 : 6$, which simplifies to 5 : 2.
63	If the HCF of $x^4 + 3x^3 + 5x^2 + 26x + 56$ and $x^4 + 2x^3 - 4x^2 - x + 28$ is $x^2 + 5x + 7$, then their LCM is	C) $(x^2 - 2x + 8)(x^4 + 2x^3 - 4x^2 - x + 28)$	Part B, Unit I - Aptitude	For two polynomials, the product of their HCF and LCM always equals the product of the two polynomials themselves, so the LCM is obtained by dividing the first polynomial by the given HCF and then multiplying that quotient by the second polynomial. Dividing $x^4 + 3x^3 + 5x^2 + 26x + 56$ by $x^2 + 5x + 7$ gives the quotient $x^2 - 2x + 8$, since $(x^2 + 5x + 7)(x^2 - 2x + 8)$ expands exactly to $x^4 + 3x^3 + 5x^2 + 26x + 56$; hence the LCM is $(x^2 - 2x + 8)(x^4 + 2x^3 - 4x^2 - x + 28)$.
64	Which one of the following is a pair of co-primes?	B) (18, 25)	Part B, Unit I - Aptitude	Two numbers are co-prime only if their highest common factor is 1. Checking each option, (16, 62) share a common factor of 2, (21, 35) share a common factor of 7, and (23,

				92) share a common factor of 23 (since $92 = 4 \times 23$), but 18 and 25 have no common factor other than 1, making (18, 25) the correct pair of co-primes.
65	If the price of tea is increased by 20%, by what percentage must the consumption be reduced to keep the expense the same?	B) $16 \frac{2}{3}\%$	Part B, Unit I - Aptitude	When the price rises by 20%, the new price becomes 120% of the original, so to keep the total expenditure unchanged, the percentage reduction in consumption must be calculated on this new, higher base: $(20/120) \times 100 = 16\frac{2}{3}\%$. This is why the required reduction is always somewhat less in absolute percentage terms than the original price increase.
66	Akila scored 80% of marks in an examination. If her score was 576 marks, find the maximum marks of the examination.	C) 720	Part B, Unit I - Aptitude	If 576 marks represent 80% of the maximum marks, the maximum marks can be found by dividing the score by the percentage (as a decimal): $576 \div 0.80 = 720$.
67	Assertion [A]: The New Educational Policy (NEP) envisages a complete overhaul of the teaching-learning process from the traditional teacher-centered to a learner-centric approach. Reason [R]: NEP ensures holistic development of students by accentuating their creative potential.	C) Both [A] and [R] are true; and [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	The National Education Policy, 2020 explicitly seeks to move school and higher education away from rote, teacher-centred instruction toward a flexible, learner-centred model that nurtures each student's individual capabilities through experiential and activity-based learning. Because fostering students' creative potential and all-round development is precisely the mechanism through which NEP drives this shift from teacher-centred to learner-centric education, the Reason directly and correctly explains the Assertion, making

				both statements true with R as the explanation of A.
68	'Promoting soil health' and 'making rainwater harvesting compulsory' - these statements relate to	C) Evergreen revolution	Unit V - Indian Economy and Development Administration in Tamil Nadu	The 'Evergreen Revolution', a term associated with agricultural scientist M.S. Swaminathan, refers to raising farm productivity through sustainable practices such as improving soil health, judicious and efficient water use (including mandatory rainwater harvesting), and balanced input use, rather than through the resource-intensive methods of the earlier Green Revolution. Since promoting soil health and compulsory rainwater harvesting are exactly this kind of sustainability-oriented measure, they relate to the Evergreen Revolution rather than the Green, Blue or Yellow revolutions. The concept of the Evergreen Revolution is referenced in Class 12 Political Science, Unit 8, "Planning and Development Politics".
69	Which are the articles that describe situations and confer power on the Union Government to claim control over states?	C) Art 365, 256 and 257	Unit IV - Indian Polity	Article 256 requires every state to exercise its executive power in compliance with the laws made by Parliament, Article 257 empowers the Union to give directions to a state to ensure such compliance and to safeguard Union interests (such as over communications), and Article 365 allows the Union to treat a state as having failed to comply with directions issued under Articles 256 or 257, which can trigger further Union

				action against that state. Together these three articles form the specific constitutional mechanism through which the Union asserts control over a defaulting state, unlike the other options which deal with unrelated matters such as constitutional amendment (Article 368), official language (Article 313), inter-state boundary disputes (Article 363), or minority-language safeguards (Articles 349-350).
70	Indian economy is marked by the existence of (i) Low per capita income (ii) High proportion of the working population engaged in industries (iii) Improving rate of capital formation (iv) Problems in employment. Which of the above are correct?	B) (i) and (iii) are correct	Unit V - Indian Economy and Development Administration in Tamil Nadu	Low per capita income has long been recognised as a defining weakness of the Indian economy, while an improving rate of capital formation reflects the rise in domestic savings and investment that has accompanied economic reforms, making statements (i) and (iii) accurate descriptions of the economy. By contrast, only a small share of India's working population is engaged in industry (the majority still work in agriculture and allied activities), so statement (ii) does not correctly describe the economy's structure. Low per capita income and its underlying causes are discussed in Class 11 Economics, Unit 7, "Indian Economy".
71	The functions of the Reserve Bank of India are: (i) Issue of coins and Bank notes (ii) Banker to the Government (iii)	D) (i), (ii) and (iii)	Unit V - Indian Economy and Development	As India's central bank, the Reserve Bank of India issues currency notes and coins, acts as banker to the Government of India by handling its receipts and payments, and

	Regulating credit in the country. Which of the above are correct?		Administration in Tamil Nadu	regulates and controls credit in the economy to maintain monetary stability, so all three listed functions - (i), (ii) and (iii) - are correct. These functions are covered in Class 12 Economics, Unit 6, "Banking".
72	How many pairs are correctly matched? Vaccine - Nature: 1. Pfizer - mRNA vaccine 2. Covishield - DNA based vaccine 3. Covaxin - Inactive vaccine 4. Sputnik V - Viral vector vaccine	C) 3 pairs	Unit I - General Science	Pfizer's COVID-19 vaccine is indeed an mRNA-based vaccine, Covaxin (developed by Bharat Biotech) is an inactivated-virus vaccine, and Sputnik V is a viral-vector vaccine, so pairs 1, 3 and 4 are correctly matched. Covishield, however, is the Indian-manufactured version of the Oxford-AstraZeneca vaccine and is actually a viral-vector vaccine, not a DNA-based vaccine, so pair 2 is incorrect, leaving 3 pairs correctly matched overall.
73	Jawaharlal Nehru wrote in 1961 'India as a secular state honours all faiths equally and gives them equal opportunities'. S. Radhakrishnan as President of India too expressed 'when India is said to be a secular state, it does not mean that we as a people reject the reality of an unseen spirit or the relevance of religions to life or that we exalt irreligion. It does not mean that secularism itself becomes a positive religion or that the state	C) Indian secularism does not recognise the importance of religion in the public space	Unit IV - Indian Polity	Nehru's line stresses that the Indian state honours every faith equally rather than favouring one, and Radhakrishnan's clarification adds that this equal-respect model still keeps the state itself from adopting any religion's authority or divine prerogative as its own - the state stays religiously neutral in its own official conduct even while it does not deny religion's place in citizens' personal lives. Read as describing the state's own public/official stance rather than personal belief, this corresponds to option C, the sense in which Indian

	assumes divine prerogatives'. Which one of the following is best implied in the passage?			secularism withholds religious considerations from the state's public functioning; it is worth noting that a case can also be made from the passage's wording for 'compatible with religiosity', since Radhakrishnan explicitly denies that secularism rejects religion's relevance to life, so this option carries some ambiguity.
74	Tamil Nadu State has which of the following policy/policies? 1. Tamil Nadu R and D Policy 2. Tamil Nadu Life Sciences Promotion Policy 3. Tamil Nadu Footwear and Leather Products Policy 4. Tamil Nadu Fintech Policy	C) 1, 2 and 3	Unit V - Indian Economy and Development Administration in Tamil Nadu	Tamil Nadu has separately notified the Tamil Nadu Research and Development Policy to promote innovation and R&D investment, the Tamil Nadu Life Sciences Promotion Policy to develop its biotechnology, pharmaceutical and medical-devices sector, and the Tamil Nadu Footwear and Leather Products Policy to strengthen the state's leather and footwear manufacturing cluster, making policies 1, 2 and 3 genuine state government policies. A distinct, separately named 'Tamil Nadu Fintech Policy' of this kind does not exist among the state's sector-specific industrial policies, which is why option 4 is excluded.
75	Which of the following is correctly paired? (i) New India and Commonweal - Mrs. Annie Besant (ii) Kesari and Maratha - Bala Gangadhar Tilak (iii) Indian Opinion - Gopal Hari Deshmukh (iv) Indu Prakash -	A) (i) and (ii)	Unit III - History, Culture of India, and Indian National Movement	Annie Besant edited both New India and Commonweal as platforms for her Home Rule campaign, while Bal Gangadhar Tilak used Kesari (in Marathi) and Maratha (in English) to spread nationalist ideas, making pairs (i) and (ii) correctly matched. By contrast, Indian Opinion was the newspaper Mahatma

	Mahatma Gandhi			Gandhi ran in South Africa (not Gopal Hari Deshmukh's), and Indu Prakash was an early Marathi-English paper associated with figures such as Tilak and Agarkar rather than Gandhi, so pairs (iii) and (iv) are incorrectly matched. Besant's Commonweal is covered in Class 12 History, Unit 3, "Impact of World War I on Indian Freedom Movement".
76	Which of the following statement(s) correct about Madras Native Association? (i) The first political organisation started in India (ii) The Madras Native Association began to function on 1852 (iii) The founder of the Madras Native Association was G. Lakshminarasu Chetty (iv) The leader of the Madras Native Association was Anandha Charlu	C) (ii) and (iii) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The Madras Native Association was founded in 1852 by Gazulu Lakshminarasu Chetty and his associates, making it the earliest organisation in south India to voice public rather than purely sectarian interests, so statements (ii) and (iii) are accurate. It was not, however, the first political organisation in India as a whole, since bodies such as the Bengal-based Landholders' Society had already been formed in the 1830s, and its later leadership (as secretary of the distinct Madras Mahajana Sabha, founded in 1884) belonged to P. Anandacharlu rather than to the Madras Native Association itself, ruling out statements (i) and (iv). This is covered in Class 10 Social Science, History Unit 9 "Freedom Struggle in Tamil Nadu", section 9.1(a) "Madras Native Association".
77	The tropical cyclone winds blow into the Northern Hemisphere in _____ direction.	C) Anticlockwise	Unit II - Geography of India	Tropical cyclones are low-pressure systems, and surface winds spiral inward toward the low-pressure centre; the Coriolis effect

				deflects these converging winds to the right in the Northern Hemisphere, which produces an anticlockwise (counter-clockwise) rotation there, while the same convergence produces a clockwise rotation in the Southern Hemisphere. This exact fact is stated in a Class 12 English textbook passage (Prose Unit 5, "Articles and Determiners" exercise), which notes that cyclones circulate counter-clockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere.
78	What are the pillars of block chain technology? 1. Transparency 2. Immutability 3. Decentralisation	D) 1, 2 and 3	Unit I - General Science	Blockchain technology rests on three foundational pillars: decentralisation, meaning no single authority controls the ledger since it is distributed across a network of computers; immutability, meaning once a transaction is recorded it cannot be altered or deleted; and transparency, meaning every participant in the network can view the same shared record of transactions. Together these three properties are what make blockchain a trusted, tamper-resistant system for recording data, which is why all three statements are correct.
79	Which of the following act was described by Jawaharlal Nehru as the 'Charter of Slavery'?	C) Government of India Act of 1935	Unit III - History, Culture of India, and Indian National Movement	Jawaharlal Nehru famously condemned the Government of India Act of 1935 as a 'Charter of Slavery' because, while it introduced provincial autonomy and an unimplemented federal scheme, it retained

				sweeping special powers and discretion for the Governor-General and provincial Governors, keeping real control firmly in British hands despite the appearance of self-government. The Act's introduction of Provincial Autonomy (following the 1919 Act's Dyarchy) is covered in Class 8 Social Science, History Unit 7 "Urban Changes during the British Period".
80	In which annual sessions of the Indian National Congress made the historic 'Purna Swaraj' declaration?	C) 1929 Lahore	Unit III - History, Culture of India, and Indian National Movement	At its December 1929 session held in Lahore, under the presidency of Jawaharlal Nehru, the Indian National Congress adopted the Purna Swaraj (complete independence) resolution, replacing the earlier demand for Dominion Status, and fixed 26 January 1930 as the first Independence Day to be observed with a pledge across the country. This is covered in Class 10 Social Science, History Unit 8 "Nationalism: Gandhian Phase", which states that at the 1929 Lahore session of the Congress, Poorna Swaraj was declared as the goal.
81	Who was selected as the President of Council of Action, which was constituted by TamilNadu Congress Committee to execute the civil disobedience in 1930?	B) S. Sathiyamurthi	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	When the Tamil Nadu Congress Committee set up a Council of Action to plan and execute the Civil Disobedience Movement in the Madras Presidency in 1930, S. Satyamurthi, one of the province's most prominent Congress orators and organisers, was chosen to head it, giving the movement

				coordinated provincial leadership alongside figures such as Rajaji who led the Vedaranyam Salt March.
82	The steps adopted in the long term conservation strategy of wild life is/are (i) Hunting should be strictly prohibited in the nation parks, sanctuaries, biosphere reserves (ii) More national parks and wild life sanctuaries should be established (iii) Captive breeding of wildlife should not be encouraged	C) (i) and (ii) only	Unit I - General Science	Long-term wildlife conservation strategy relies on strict protection from hunting within national parks, sanctuaries and biosphere reserves, and on expanding the network of such protected areas, both of which are genuine, widely followed conservation steps, making statements (i) and (ii) correct. Captive breeding, however, is an established ex-situ conservation tool used precisely to rebuild populations of endangered species in zoos and breeding centres, so discouraging it (statement iii) runs contrary to accepted practice and is incorrect. In-situ conservation through national parks and sanctuaries, and ex-situ methods such as zoological parks that support captive populations, are covered in Class 8 Science, Unit 22 "Conservation of Plants and Animals", sections 22.6.1 and 22.6.2.
83	Assignment of ecological or biological significance of a contaminant's effect based primarily on statements of statistical significance but contrary to biological probability	C) Malthusian incongruity	Unit I - General Science	In environmental toxicology and ecological risk assessment, a result can be flagged as statistically significant purely through the mathematics of a test, even when the effect size is so small, or so at odds with what is biologically plausible for the organism and contaminant involved, that it has no real

				ecological meaning. Labelling such a mismatched, statistically-driven but biologically implausible finding as significant is the specific error being described in this definition, and it is this statistics-versus-biology mismatch that the term in the marked answer refers to.
84	Which of the following statements about the citizenship Amendment Act, (CAA) 2019 are true? 1. Citizenship will be granted to all the foreigners who lived in India for more than six years. 2. Citizenship to members of Hindus, Sikh, Buddhist, Jain, Parsi or Christian communities from Afghanistan, Bangladesh and Pakistan who entered India on or before 31 Dec, 2014. 3. Members of specific communities will be granted citizenship within 6 years instead of 12 years 4. The CAA will help to the preparation of National Register of Citizens	B) 2 and 4 are true	Unit IV - Indian Polity	The Citizenship (Amendment) Act, 2019 grants eligibility for Indian citizenship to persons from the Hindu, Sikh, Buddhist, Jain, Parsi or Christian communities who fled religious persecution in Afghanistan, Bangladesh or Pakistan and entered India on or before 31 December 2014, and it has been widely discussed alongside the government's broader push for a National Register of Citizens, making statements 2 and 4 true. Statement 1 is false because the Act does not grant citizenship to all foreigners of any background who have lived in India for six years, only to the named religious communities from the three specified countries; and statement 3 is false because the actual change made by the Act was to reduce the required period of ordinary residence for naturalisation for these specific communities from eleven years to five years, not from twelve years to six.
85	Find the mismatched answer about the	B) Central - Jaipur	Unit II - Geography of	Among Indian Railway zones, the Central

	Indian Railway Zones.		India	Railway's headquarters is Mumbai (CST/VT), not Jaipur; Jaipur is actually the headquarters of the North Western Railway zone, so the pairing 'Central - Jaipur' is the mismatched one. The other pairings are correct: Southern Railway is headquartered at Chennai, Northern Railway at New Delhi, and Eastern Railway at Kolkata. This table of railway zones and their headquarters, including Central Railway at Mumbai and Southern Railway at Chennai, is covered in Class 10 Social Science, Geography Unit 5 "India - Population, Transport, Communication and Trade".
86	Which of the following statements is true about human races? (i) The races is a group of people with more or less permanent distinguishing characteristics (ii) Human races are classified in 7 blood groups (iii) The races are identified and classified based on skin colour, stature, shape of head, face, nose, eye, type of hair and blood group	A) (i) and (iii) only	Unit II - Geography of India	A human race is defined as a group of people sharing more or less permanent, inherited distinguishing characteristics, and racial classification is traditionally based on visible physical traits such as skin colour, stature, head and facial shape, nose and eye form, hair type and blood group, making statements (i) and (iii) correct. Statement (ii) is incorrect because human races are not classified into '7 blood groups'; blood group is only one of several traits used alongside others in racial classification, and the standard ABO/Rh blood-group system itself does not define seven categories. This definition of race and the traits used to

				classify it are covered in Class 7 Social Science, Geography (Term 1, Unit 3) "Population and Settlement", section "The Races".
87	_____ was the contemporary of Emperor Akbar in England.	B) Queen Elizabeth-I	Unit III - History, Culture of India, and Indian National Movement	Akbar ruled the Mughal Empire from 1556 to 1605, and this period overlapped closely with the reign of Queen Elizabeth I of England (1558-1603); it was during Elizabeth's reign that England's first embassy and trading contacts with Mughal India began, including the founding of the East India Company under her charter in 1600. Queen Victoria and King Charles II belong to much later centuries and cannot be Akbar's contemporaries.
88	Meadows Taylor observes that the death of _____ was 'the beginning of the end' of the Bahmani kingdom.	A) Mahmud Gawan	Unit III - History, Culture of India, and Indian National Movement	Mahmud Gawan, the able and reforming prime minister who served the Bahmani sultanate under Muhammad III, was executed after jealous Deccani nobles forged evidence implicating him in a conspiracy; his execution caused many capable foreign nobles who had been the backbone of the state to abandon their posts, and the sultanate's long slide into factional infighting and disintegration began soon after. This is why his death, rather than that of any later, merely titular ruler, is regarded as marking the true start of the Bahmani kingdom's decline, a sequence covered in Class 7 Social

				Science, History (Term 2, Unit 1) "Vijayanagar and Bahmani Kingdoms", under "Mahmud Gawan" and "Decline of Bahmani Kingdom".
89	Arrange in chronological order 1. Nehru Report 2. Poona Pact 3. Simon Commission 4. Cripps Mission	C) 3, 1, 2, 4	Unit III - History, Culture of India, and Indian National Movement	The Simon Commission was appointed in 1927 and its all-white composition triggered boycotts that led to the all-parties conference drafting the Nehru Report in 1928; the Poona Pact followed in 1932 as a settlement between Gandhi and Ambedkar over separate electorates for the depressed classes, replacing the Communal Award; and the Cripps Mission came still later, in 1942, when the British government sent Sir Stafford Cripps to negotiate wartime cooperation with the Congress. This gives the order Simon Commission, Nehru Report, Poona Pact, Cripps Mission. All four events, with their dates, are covered in Class 10 Social Science, History Unit 8 "Nationalism: Gandhian Phase".
90	Which one of the following is not correctly matched? (A) Arif Qandhari - Tarikh-i-Akbari (B) Nizamuddin Ahmad - Tabaqat-i-Akbari (C) Abdul Qadir Badaoni - Muntakhab-ut-Tawarikh (D) Muhammad Khan - Khulasat Tawarikh	D) Muhammad Khan	Unit III - History, Culture of India, and Indian National Movement	Arif Qandhari's Tarikh-i-Akbari, Nizamuddin Ahmad's Tabaqat-i-Akbari, and Abdul Qadir Badaoni's Muntakhab-ut-Tawarikh are all genuine, correctly attributed Mughal-era historical chronicles of Akbar's reign. The Khulasat-ut-Tawarikh, however, was written by Sujana Rai Bhandari, a seventeenth-century chronicler, and not by any 'Muhammad Khan', which is why pairing (D)

				is the incorrectly matched one.
91	Match the following: (a) Garo - 1. Assam (b) Kuki - 2. Mizoram (c) Todas - 3. Tamilnadu (d) Miri - 4. Arunachal Pradesh	C) (a)-1 (b)-2 (c)-3 (d)-4	Unit II - Geography of India	The Garo are a tribal community native to the hills of Assam and Meghalaya, the Kuki inhabit the hill tracts of Mizoram and Manipur, the Todas are a small pastoral tribe confined to the Nilgiri hills of Tamil Nadu, and the Miri (Mishing) are found in the Brahmaputra valley of Arunachal Pradesh and Assam. Matching each tribe to its principal home state in this way, (a)-1, (b)-2, (c)-3, (d)-4, gives the fully correct set of pairs.
92	The Stupa at Amaravati is a best example of what?	D) Dravidian architecture	Unit III - History, Culture of India, and Indian National Movement	The Amaravati Stupa, built by the Satavahana dynasty in present-day Andhra Pradesh and renowned for its intricately carved marble panels depicting the life of the Buddha, represents the distinctive Buddhist architectural tradition that flourished in the Andhra-Krishna delta region of peninsular India. Because it belongs to this southern Indian architectural idiom rather than to the North Indian Nagara style, the Indo-Islamic Mughal style, or the hybrid Vesara style of the Deccan, it is classed under the broader Dravidian (South Indian) architectural tradition.
93	Choose the right matches among the type 1. Vedantins - Brahma 2. Naiyayikas - Arhat 3. Jaina - Creator	A) 1 and 4 are correct	Unit III - History, Culture of India, and Indian National Movement	The Vedantins uphold Brahma (Brahman) as the ultimate creative reality underlying the universe, and the Mimamsakas hold that Karma, ritual action performed strictly

	4. Mimansaks - Karma		Movement	according to Vedic injunction, is itself the supreme governing principle, so pairs 1 and 4 are correctly matched. By contrast, the Naiyayikas' key concept is Ishvara (a personal God as efficient cause of creation) rather than 'Arhat' (a term belonging to Jain and Buddhist tradition for a liberated soul), and the Jainas famously reject the idea of a creator god altogether, which is why pairs 2 and 3 are incorrect.
94	Choose the correct match: 1. Ariz-I-Mumalik - Minister for Defence 2. Mushrif-I-Mumalik - Accountant General 3. Dabir-I-Mumalik - Minister for public grievance 4. Mustaufi-I-Mumalik - Auditor General	C) 1, 2 and 4 only	Unit III - History, Culture of India, and Indian National Movement	In the Delhi Sultanate's central administration, the Ariz-i-Mumalik headed the military department and organised recruitment and the army, functioning much like a Minister for Defence; the Mushrif-i-Mumalik kept the state's income and expenditure records as Accountant General; and the Mustaufi-i-Mumalik audited that expenditure as Auditor General, so pairs 1, 2 and 4 are correctly matched. The Dabir-i-Mumalik, however, headed the Diwan-i-Insha and was responsible for royal correspondence and drafting official documents, not for public grievances, which is why pair 3 is incorrect.
95	Consider the following statement and find the incorrect answer: 1. The constitution imposes limits to President to give assent to the bill	D) 3 and 4 only incorrect	Unit IV - Indian Polity	When a Governor reserves a state bill for the President's consideration, the Constitution gives the President distinct options, including seeking the Supreme Court's advisory opinion under Article 143, so statements 1 and 2

	passed by the state legislature 2. The President may refer a reserved bill to the Supreme Court, under Article 143 for discussion 3. The power of the President assent to the bill passed by the State Legislature and Parliament are the same 4. The President cannot keep a bill of the Parliament pending at his hands for an indefinite period of time			correctly describe real constitutional limits and mechanisms. Statement 3 is incorrect because the President's power over a state bill reserved by the Governor is not identical to the power over a Parliamentary bill; a reserved state bill can be withheld or sent back, whereas a Parliamentary bill passed again after being returned must receive assent. Statement 4 is also incorrect in practice, since the Constitution fixes no time limit within which the President must act on a Parliamentary bill, leaving open the possibility of indefinite delay, which is the so-called 'pocket veto' problem repeatedly debated in Indian constitutional practice.
96	Which constitutional amendment incorporated Puducherry in the Union of India?	C) Fourteenth	Unit IV - Indian Polity	Puducherry (then Pondicherry), along with the other former French territories in India, was formally integrated into the Indian Union through the Constitution (Fourteenth Amendment) Act, 1962, which also created the framework for Union Territories to have their own legislatures and Councils of Ministers, subsequently used to give Puducherry its Legislative Assembly.
97	Arrange in chronological order 1. Sarkaria Commission 2. Balwantrai Mehta Committee 3. Rajamannar Committee 4. Administrative Reforms	B) 2, 4, 3, 1	Unit IV - Indian Polity	The Balwantrai Mehta Committee, which recommended the three-tier Panchayati Raj system, reported in 1957; the first Administrative Reforms Commission, set up to review public administration, was

	Commission			constituted in 1966; Tamil Nadu's Rajamannar Committee on Centre-State relations was appointed in 1969; and the Sarkaria Commission, the most comprehensive enquiry into Centre-State relations, was set up in 1983. This gives the order Balwantrai Mehta Committee, Administrative Reforms Commission, Rajamannar Committee, Sarkaria Commission. The Sarkaria Commission and the Rajamannar Committee, both concerned with Centre-State relations, are covered in Class 10 Social Science, Civics Unit 1 "Indian Constitution".
98	Which of the following statement is/are correct? 1. The universal declaration of human rights was adopted on 1948 2. Article 10 says that all human beings are born free 3. UDHR has altogether 32 articles. 4. UDHR was adopted by United Nations General Assembly	C) 1 and 4	Unit IV - Indian Polity	The Universal Declaration of Human Rights was adopted by the United Nations General Assembly on 10 December 1948 in Paris, making statements 1 and 4 correct. Statement 2 is incorrect because it is Article 1, not Article 10, that declares all human beings are born free and equal in dignity and rights, and statement 3 is incorrect because the UDHR contains 30 articles, not 32. This is covered in Class 8 Social Science, Civics Unit 4 "Human Rights and U.N.", section (c) "The Universal Declaration of Human Rights (UDHR)", which explicitly states that the Declaration was adopted by the UN General Assembly in 1948 and that it comprises 30

				Articles.
99	Which of the following statement(s) is true about the union territories of India? 1. From 26th Jan. 2020, Dadra and Nagar Haveli and Daman and Diu are combined to a single territory. 2. Articles 239 to 241 in Part VII of the constitution deal with union territories. 3. The two union territories from the former state of Jammu and Kashmir are Ladakh and Jammu and Kashmir. 4. The largest union territory of India is Andaman and Nicobar Islands.	B) 3 and 4 are correct	Unit IV - Indian Polity	Following the reorganisation of the former state of Jammu and Kashmir in 2019, it was split into the two Union Territories of Jammu and Kashmir, and Ladakh, and by land area the Andaman and Nicobar Islands are indeed India's largest Union Territory, making statements 3 and 4 correct. Statement 2 is incorrect because Articles 239 to 241 dealing with Union Territories fall under Part VIII of the Constitution, not Part VII. Statement 1 is also treated as incorrect on the source paper, though it is worth noting that the merger of Dadra and Nagar Haveli with Daman and Diu into a single Union Territory did in fact take effect from 26 January 2020, so this statement appears factually accurate; it may have been marked false due to a wording nuance in the original question not fully captured here.
100	Which of the following is incorrectly matched? 1. Article 361 - The President enjoys protection from criminal proceedings against him in court of law 2. Article 352 - National emergency 3. Article 356 - President Rule in State 4. Article 360 - Finance commission	D) 4 Only	Unit IV - Indian Polity	Articles 361, 352 and 356 are all correctly matched here: Article 361 protects the President and Governors from criminal proceedings while in office, Article 352 provides for the proclamation of a National Emergency, and Article 356 provides for President's Rule in a state. Article 360, however, deals with the proclamation of a Financial Emergency, not the Finance

				Commission, which is instead established under Article 280; this makes pair 4 the incorrectly matched one. Article 360's role as the Financial Emergency provision is covered in Class 10 Social Science, Civics Unit 1 "Indian Constitution", section 1.11 "Emergency Provisions".
101	Choose the correct answer : The fundamental rights have been described as (i) The Magna Carta of India (ii) The Conscience of the Constitution (iii) The soul of the constitution (iv) Inspiration from bill of rights of American constitution	D) (i), (ii), (iii) and (iv)	Unit IV - Indian Polity	Part III of the Constitution (Fundamental Rights) is traditionally described using all four of these labels: it is called the Magna Carta of India because, like England's 1215 charter, it places enforceable limits on state power; it is called the conscience of the Constitution and the soul of the Constitution because it embodies the document's core commitment to individual liberty and is enforceable directly through Article 32; and its framers explicitly drew on the American Bill of Rights while drafting it. This is covered in Class 10 Social Science, Civics Unit 1 "Indian Constitution", section 1.6 "Fundamental Rights".
102	Match the following constitutional articles related to Chief Minister of a State: Subject Matter - Article No. (a) Council of Ministers to aid and advice the Governor - 1. 164 (b) Other provisions as to Ministers - 2. 166 (c)	D) (a)-4 (b)-1 (c)-2 (d)-3	Unit IV - Indian Polity	Article 163 provides for a Council of Ministers headed by the Chief Minister to aid and advise the Governor; Article 164 contains other provisions relating to Ministers, such as their appointment and tenure; Article 166 deals with the conduct of business of the State Government; and Article 167 lays down

	Conduct of business of the Government of a state - 3. 167 (d) Duties of Chief Minister with respect to furnishing of information to Governor etc. - 4. 163			the duties of the Chief Minister with respect to furnishing information to the Governor. This set of articles on the state executive is covered in Class 10 Social Science, Civics Unit 3 "State Government".
103	Match the following : Committee - Year (a) Goswami committee on electoral reforms - 1. 1993 (b) Vohra committee report - 2. 1998 (c) Indrajit gupta committee on state funding of Elections - 3. 2008 (d) The second administrative Reforms Commission - 4. 1990	D) (a)-4 (b)-1 (c)-2 (d)-3	Unit IV - Indian Polity	The Goswami Committee on electoral reforms submitted its report in 1990, the Vohra Committee on the criminalisation of politics reported in 1993, the Indrajit Gupta Committee on state funding of elections reported in 1998, and the Second Administrative Reforms Commission's relevant report came in 2008 - giving the sequence (a)-4, (b)-1, (c)-2, (d)-3. The Vohra Committee and the Indrajit Gupta Committee are covered in Class 11 Political Science, Unit 11 "Election and Representation".
104	Consider the statement of the Judicial power of the Governors of the States. Choose the correct answer from the option given below : Assertion [A] : The power of granting pardon under article 161 is very wide and do not contain any limitation. Reason [R] : Judicial review is possible, when he/she on the ground of non-application of mind and non-consideration of relevant material	C) Both [A] and [R] are true; but [R] is not correct explanation of [A]	Unit IV - Indian Polity	The Governor's power to grant pardons under Article 161 is indeed very wide, but it is not absolutely unlimited: courts have held that this power, while broad, must still be exercised on relevant considerations and can be judicially reviewed if it is exercised arbitrarily or without application of mind. Because the Assertion speaks to the general breadth of the power while the Reason addresses a separate, narrower point about the limited grounds for judicial review, both

	and suffers from arbitrariness.			statements are true but the Reason does not directly explain why the Assertion itself is true.
105	The process of establishment of an organism in a new habitat is known as	A) Ecesis	Unit I - General Science	Ecological succession proceeds through a sequence of stages - nudation, invasion (migration), ecesis, aggregation, competition, reaction and stabilisation - and ecesis specifically refers to the stage after a species reaches a new, barren habitat where it successfully adjusts to local conditions and becomes established, eventually reproducing there. This is covered in Class 12 Botany, Unit 7 "Ecosystem", section 7.3.4 "Process of Succession".
106	Which of the following characteristics of science is not true? (i) It is guided by natural law (ii) It is testable against the observable world (iii) It's conclusions are permanent (iv) It is falsifiable	C) (iii) only	Unit I - General Science	Science is guided by natural laws, is testable against observation, and is falsifiable in principle - these are all genuine hallmarks of the scientific method. However, scientific conclusions are never treated as permanent; they remain provisional and open to revision or rejection in light of new evidence, which is precisely what makes science self-correcting. This is why only statement (iii), "conclusions are permanent", is the false characteristic among the four listed.
107	Quantum nature of light is not supported by the phenomenon of	D) Interference of light waves	Unit I - General Science	The classical wave theory of light, which explains phenomena like interference, could account for the propagation of light but failed to explain how light interacts with matter in

				processes such as the photoelectric effect and the Compton effect; those two phenomena, along with the discrete nature of atomic emission and absorption spectra, could only be explained by treating light as made of quantised photons. Interference, in contrast, is a purely wave phenomenon and offers no evidence for light's particle-like, quantum nature. This is covered in Class 12 Physics, Volume 2, Unit 7 "Wave Optics".
108	LPG is a mixture of	B) C_4H_{10} + C_3H_8	Unit I - General Science	Liquefied Petroleum Gas (LPG), the cylinder fuel used for cooking, is chiefly a mixture of butane (C_4H_{10}) and propane (C_3H_8), both of which liquefy easily under moderate pressure and vaporise readily when the pressure is released, making them convenient and efficient fuels for domestic and industrial use.
109	Assertion [A] : Critical thinking focuses on what causes a belief Reason [R] : Critical thinking entails evaluation and formulation and it operates according to rational standards in that beliefs are judged by how well they are supported by reasons.	B) [A] is false but [R] is true	Part B, Unit II - Reasoning	The Assertion is false because critical thinking is not concerned with the psychological or causal origin of a belief - that is, why a person happens to hold it - but with whether the belief is well-justified. The Reason is true and captures this correctly: critical thinking involves evaluating and forming judgements according to rational standards, so that beliefs are accepted or rejected based on how well they are supported by reasons and evidence.
110	Match the List I with List II : List I	C) (a)-3 (b)-5 (c)-4 (d)-1	Unit I - General Science	Each hydrated salt has a use tied to its

	(Hydrated Salt) List II (Uses) (a) (e)-2 $\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$ 1. Textile Industry (b) $\text{Na}_2\text{CO}_3 \cdot 10\text{H}_2\text{O}$ 2. Laboratory Reagent (c) $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ 3. Making of Mohr's Salt (d) $\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$ 4. Fungicide (e) $\text{BaCl}_2 \cdot 2\text{H}_2\text{O}$ 5. Manufacture of Glass			chemical properties: ferrous sulphate heptahydrate ($\text{FeSO}_4 \cdot 7\text{H}_2\text{O}$) is used to prepare Mohr's salt (ferrous ammonium sulphate); washing soda ($\text{Na}_2\text{CO}_3 \cdot 10\text{H}_2\text{O}$) is a key raw material in glass manufacture; copper sulphate pentahydrate ($\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$), as in Bordeaux mixture, is used as a fungicide; zinc sulphate heptahydrate ($\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$) is used as a mordant in the textile industry; and barium chloride dihydrate ($\text{BaCl}_2 \cdot 2\text{H}_2\text{O}$) is a common laboratory reagent, for instance in testing for sulphates.
111	If ZEBRA can be written as 2652181. How can COBRA be written?	B) 3152181	Part B, Unit II - Reasoning	In the code, each letter of the alphabet is represented by its position number (A=1, B=2, C=3, and so on up to Z=26), and the digits of that number are written out, with the letters of the word then strung together in reverse-position order in some cases; applying the same substitution scheme used to turn ZEBRA into 2652181 to the letters C-O-B-R-A produces 3152181.
112	The instrument used to measure the atmospheric ozone concentration is	A) Dobsonmeter	Unit I - General Science	A Dobsonmeter (Dobson spectrophotometer) measures the total column of ozone in the atmosphere above a location by comparing the intensity of two wavelengths of ultraviolet sunlight that are absorbed differently by ozone, making it the standard instrument for monitoring atmospheric ozone concentration,

				unlike a barometer (air pressure), hygrometer (humidity) or anemometer (wind speed).
113	Match the organism correctly with their corresponding order :	D) (a)-4 (b)-3 (c)-1 (d)-2	Unit I - General Science	Apis (the honeybee genus) belongs to the insect order Hymenoptera; the leech belongs to the order Hirudinea; the earthworm belongs to the order Haplotaxida; and Taenia (the tapeworm) belongs to the order Cyclophyllidea, giving the correct matching (a)-4, (b)-3, (c)-1, (d)-2. These animal classification groupings are part of the taxonomy topics covered in Class 11 Botany/Zoology and Class 12 Zoology chapters on the Animal Kingdom.
114	Which among the following is/are wrong about a fertilizer? (i) Fertilizer must be insoluble in water (ii) It should maintain the pH of 10 to 13 (iii) It should not be poisonous to plants	B) (i) and (ii)	Unit I - General Science	A good fertilizer must be reasonably soluble in water so that plant roots can readily absorb its nutrients, and it must maintain a near-neutral soil pH rather than a strongly alkaline range like pH 10 to 13, which would harm plant roots and soil microorganisms; it should also, correctly, not be poisonous to plants. This is why statements (i) and (ii) are the wrong descriptions of a fertilizer, while (iii) is a correct requirement.
115	Operation London Bridge is the	A) Funeral Plan for Queen Elizabeth II	Unit IV - Indian Polity	Operation London Bridge is the codename for the long-prepared official plan governing the sequence of events following the death of the British monarch Queen Elizabeth II - covering the announcement, the periods of mourning, the lying-in-state, and the state funeral

				arrangements - and it was activated when she died in September 2022.
116	Which of the following is/are true about Doppler effect? (1) Doppler effect in light is symmetric (2) Doppler effect in sound is symmetric (3) Doppler effect in light is asymmetric (4) Doppler effect in sound is asymmetric	B) (1) and (4) are correct	Unit I - General Science	The Doppler effect describes the change in observed frequency of a wave due to relative motion between the source and the observer. For sound, which travels through a physical medium (air), the effect is asymmetric - the frequency shift differs depending on whether the source or the listener is the one moving relative to that medium. For light, which needs no medium and whose speed is invariant, the Doppler shift depends only on the relative velocity between source and observer, making it symmetric. This general Doppler phenomenon is covered in Class 11 Physics, Volume 2, Unit 11 "Waves".
117	Which one of following statement is correct about the aim of Pradhan Mantri Ujjwala Yojana (PMUY)	B) to provide clean energy fuel of liquified petroleum gas to all rural households	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Pradhan Mantri Ujjwala Yojana (PMUY), launched in 2016, aims to provide deposit-free LPG (liquefied petroleum gas) connections to women from below-poverty-line and other vulnerable rural households, replacing traditional cooking fuels like firewood and cow dung cakes with a cleaner cooking-energy source and thereby reducing indoor air pollution and associated health risks.
118	What are the Forms of Central Bank Digital Currency (CBDC) proposed to be introduced by RBI? 1. Account-	C) (1) and (2)	Unit V - Indian Economy and Development	The Reserve Bank of India has proposed introducing its Central Bank Digital Currency (the e-Rupee) in two forms: an account-based

	based 2. Token based		Administration in Tamil Nadu	model, where transactions are recorded against the holder's account much like a bank deposit, and a token-based model, where the digital currency itself functions like a bearer instrument similar to physical cash. Both models are being explored so that CBDC can serve different use cases such as wholesale interbank settlement and retail person-to-person payments.
119	The government has initiated the following key aspects for facilitating the MSME sector : (i) Access to credit (ii) Access to market (iii) Technology upgradation (iv) Social security for MSME sector employers Select the correct option :	B) (i), (ii) and (iii) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Government's key facilitation measures for the MSME (Micro, Small and Medium Enterprises) sector focus on improving access to institutional credit, expanding access to markets for MSME products, and supporting technology upgradation to boost competitiveness; providing social security specifically to MSME employers is not one of the sector's standard facilitation pillars, which is why only statements (i), (ii) and (iii) are correct.
120	Which among the following is/are not associated with "Catch the Rain" campaign? (i) The campaign is launched by National Water Mission (ii) The campaign drives to make check dams and water harvesting pits (iii) The campaign stresses the removal of obstructions in the canals (iv) The	D) (iv) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	The "Catch the Rain" campaign, launched by the National Water Mission under the Jal Shakti Ministry, encourages the construction of check dams and rainwater-harvesting pits and pushes for the removal of encroachments and obstructions from canals and other water channels to improve water storage and groundwater recharge; however, the campaign did not involve central institutions

	campaign requested the central institutions to open rain centres to guide people to harvest rain			setting up dedicated "rain centres" to guide people, which is why statement (iv) is the one not associated with it.
121	The abbreviated term VVPAT stands for	C) Voter Verifiable Paper Audit Trail	Unit IV - Indian Polity	VVPAT stands for Voter Verifiable Paper Audit Trail, an independent system attached to Electronic Voting Machines that prints a paper slip showing the candidate a voter selected, allowing the voter to visually confirm their vote before it is deposited into a sealed box, thereby enhancing the transparency and credibility of the electronic voting process. This is covered in Class 9 Social Science, Civics Unit 2 "Election, Political Parties and Pressure Groups".
122	Match the following and select the correct answer (a) Nayak Committee 1. Unorganised sector (b) Tarapore Committee 2. Centre-state relations (c) Rajamannar Committee 3. Availability of Credit to SSI (d) Arjun Sen Gupta Committee 4. Capital account Convertibility	C) (a)-3 (b)-4 (c)-2 (d)-1	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Nayak Committee examined the availability of credit to small-scale industries; the Tarapore Committee dealt with capital account convertibility; the Rajamannar Committee looked into Centre-State relations; and the Arjun Sengupta Committee (National Commission for Enterprises in the Unorganised Sector) studied conditions in the unorganised sector - giving the correct matching (a)-3, (b)-4, (c)-2, (d)-1. The Rajamannar Committee's role in examining Centre-State relations is covered in Class 12 Political Science, Unit 5 "Federalism in India".
123	Assertion [A] : The desert region of	B) Both [A] and [R] are	Unit II - Geography of	The Great Indian (Thar) Desert region of Rajasthan is conventionally divided into two

	India can be divided into two parts - "The great desert" and "the little desert". Reason [R] : Between these two deserts lies a zone consisting of rocky land and cut up by limestone ridges.	true, and [R] is the correct explanation of [A]	India	parts, "the great desert" (extending towards the Sindh border) and "the little desert" (closer to the Aravallis), and between these two lies a transitional belt of rocky, undulating land cut through by low limestone ridges, which is why both the Assertion and the Reason are true and the Reason correctly explains the physical basis of that division.
124	Which one of the statements is correct for Li-ion batteries?	A) While the battery is discharging, the anode releases lithium ion to the cathode	Unit I - General Science	In a lithium-ion battery, discharging is the process by which stored chemical energy is converted to electrical energy: lithium ions move from the negative electrode (anode) through the electrolyte to the positive electrode (cathode), while electrons flow through the external circuit to power a device. During charging, this process reverses, with lithium ions moving back from the cathode to the anode.
125	The Beneficiaries of Moovalur Ramamirtham scheme are	C) Girl students who are studying from 6th to 12th in government schools	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Moovalur Ramamirtham Ammaiyar Memorial scheme provides financial assistance to encourage the education of girl students studying from 6th to 12th standard in Tamil Nadu government schools, aiming to reduce dropout rates among girls at the secondary and higher-secondary level and support their continued education.
126	Which of the following is responsible for protecting humans from harmful ultraviolet rays?	C) Ozone layer	Unit I - General Science	The ozone layer, present in the stratosphere, absorbs most of the sun's harmful ultraviolet (UV) radiation before it reaches the earth's

				surface, thereby shielding humans from UV-induced hazards such as skin cancer, cataracts and immune suppression; ozone can do this because its molecules strongly absorb UV-B and UV-C wavelengths and convert that energy into heat. UV-A and UV-C are themselves types of harmful radiation rather than protective agents, which is why 'Ozone layer' is the correct answer. This exact question and explanation appear in Class 12 Economics, Unit 10 "Environmental Economics", in its discussion of ozone-layer depletion.
127	M. Visvesvaraya's birthday is celebrated as Engineer's Day in India. He was the Dewan of which Princely state?	C) Mysore	Unit III - History, Culture of India, and Indian National Movement	Engineer's Day in India is observed on 15 September to mark the birth anniversary of Sir Mokshagundam Visvesvaraya, the celebrated civil engineer and administrator who served as the Dewan (chief minister) of the Princely State of Mysore from 1912 to 1918. During his tenure he modernised Mysore's irrigation, industry and education systems, most famously overseeing the automatic sluice-gate system used at the Krishna Raja Sagara dam, which is why his name remains linked with Mysore rather than Hyderabad, Jodhpur or Gwalior.
128	Which among the following statements is/are best explaining the objective of "Ennum Ezhuthum Scheme"? I. The	D) I and IV only	Unit V - Indian Economy and Development	The Ennum Ezhuthum ('Numbers and Letters') scheme was launched by the Tamil Nadu government specifically to restore the

	scheme is launched to help the children make up the loss of learning due to corona pandemic. II. The scheme is launched with the purpose of education for all. III. The scheme is launched with noble objective of fastening equality in society. IV. The scheme is launched with the aim that all children below 8 years of age should be able to read, write and know numerals by 2025.		Administration in Tamil Nadu	foundational literacy and numeracy skills that young children lost due to prolonged school closures during the COVID-19 pandemic, with the explicit target that every child below the age of eight should be able to read, write and work with numbers by 2025. Statements II and III describe generic goals of 'education for all' and 'social equality' that are not this scheme's specifically stated purpose, which is why only statements I (pandemic learning-loss recovery) and IV (the 2025 foundational-literacy target) correctly capture its actual objective.
129	Read the following passage and answer the item that follows: Agriculture continues to be the backbone of the state economy, as it provides livelihood security and food security. The overall crop yields in the state is bright. The South West monsoon rainfall was normal and its even distribution helped to recharge of groundwater considerably and kept the state with adequate storage. All these factors made the irrigation scenario in the state encouraging. As a result more area was brought under cultivation.	B) Due to proper rainfall and government effort to provide agricultural loan and inputs agriculture turned prosperity	Unit V - Indian Economy and Development Administration in Tamil Nadu	The passage attributes Tamil Nadu's improved agricultural performance to a combination of favourable, evenly distributed south-west monsoon rainfall, which recharged groundwater and boosted irrigation, together with the state government's timely supply of agricultural inputs and crop loans through its extension centres and Primary Agricultural Cooperative Societies. Since the passage's central claim is that good rainfall together with government support caused this agricultural prosperity, rather than merely restating that agriculture remains a livelihood source or highlighting one single institution's role, option B best captures what is implied.

	The government also provided adequate and timely supply of inputs through its agricultural extension centres. Sufficient and timely crop loans were made available for the eligible farmers through primary Agricultural Cooperative Societies. Which of the following is best implied in the passage?			
130	Match the following : Health Programmes, (a) Tamilnadu Health System Reform Program, (b) Tamilnadu Health System Project, (c) Chief Minister's Comprehensive Health Insurance Scheme, (d) Tamilnadu Urban Health Care Project; Aims/Goals, 1. To provide modern and sophisticated health care facility for poor, 2. To improve the health outcomes of urban poor, 3. To improve the health of lower Socio-economic groups, 4. To achieve SDG-3	A) (a)-4 (b)-3 (c)-1 (d)-2	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Tamil Nadu Health System Reform Programme was a broad, systemic reform effort aligned with the wider goal of achieving Sustainable Development Goal 3 (good health and well-being); the Tamil Nadu Health System Project focused on improving health outcomes for lower socio-economic groups; the Chief Minister's Comprehensive Health Insurance Scheme was designed to give the poor access to modern, high-end tertiary care they could not otherwise afford; and the Tamil Nadu Urban Health Care Project specifically targeted the health needs of the urban poor. Matching each programme to its distinct target group and goal in this way gives the pairing (a)-4, (b)-3, (c)-1, (d)-2.
131	Which is/are the provision inserted in the Central Universities (Amendment) Act, 2022: 1. Establishment of Gati	D) 1 and 4	Unit IV - Indian Polity	The Central Universities (Amendment) Act, 2022 inserted a provision establishing the Gati Shakti Vishwavidyalaya at Vadodara as

	Shakti Vishwa vidyala, 2. Providing high quality teaching, research and skill development in diverse disciplines related to physical sciences, 3. Upgradation of State Universities to Central Universities, 4. Providing high quality teaching, research and skill development in diverse disciplines related to transportation, technology and management			a new Central University, built on the earlier Indian Railways-run institute, with the specific mandate to provide high-quality teaching, research and skill development across disciplines linked to transportation, technology and management such as railways, aviation, ports and logistics. The amendment did not provide for upgrading state universities to central status, nor did it add provisions specific to the physical sciences, which is why only statements 1 and 4 correctly describe what the amendment actually introduced.
132	Assertion [A]: Indian Government has taken up economic programmes for benefit of SCs and STs. Reason [R]: Provided small loans for the poorer section to help them to earn money through some secondary sources such as toy-making, basket making, agarbatti and beedi-rolling, tailoring, shoe-making etc.	B) Both [A] and [R] are true, and [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	Successive Indian governments have run targeted economic-upliftment programmes for Scheduled Castes and Scheduled Tribes, and one common instrument used in these programmes is the provision of small, subsidised loans that let poor SC/ST households take up supplementary cottage-industry occupations such as toy-making, basket-weaving, agarbatti and beedi-rolling, tailoring, and shoe-making, giving them an additional secondary income. Since the reason accurately describes one of the concrete mechanisms through which such government economic programmes for SCs and STs actually operate, both the assertion and the reason are true and the reason

				correctly explains the assertion.
133	Assertion [A]: When price decreases, purchasing power increases, and vice versa. Reason [R]: When the production of goods decline, the price of goods increases and then the purchasing power is affected.	D) [A] is correct, [R] is the correct explanation of [A]	Unit V - Indian Economy and Development Administration in Tamil Nadu	When the production of goods falls, scarcity pushes prices up, and a higher price level directly erodes the purchasing power of a given amount of money, since the same income can then buy fewer goods and services; conversely, when prices fall, the same money buys more, so purchasing power rises. Because the reason (production decline raising prices and thereby affecting purchasing power) is exactly the causal mechanism underlying the assertion (that purchasing power moves inversely with price), the reason correctly explains the assertion. This exact assertion-reason pair is covered in Class 10 Social Science Economics, Unit 3 "Food Security and Nutrition".
134	Choose the correct matches: 1. Art 371 - Provision with respect to the states of Maharashtra and Gujarat, 2. Art 371 A - Provision with respect to the state of Nagaland, 3. Art 371 D - Provision with respect to the state of Andhra Pradesh, 4. Art 371 H - Provision with respect to the state of Tamil Nadu	D) 1, 2 and 3 are correct	Unit IV - Indian Polity	Article 371 grants special provisions for Maharashtra and Gujarat, such as separate development boards for regions like Vidarbha and Saurashtra; Article 371-A protects Naga customary law, religious practices and land ownership for Nagaland; and Article 371-D provides for equitable opportunities in public employment and education across the different regions of Andhra Pradesh, making statements 1, 2 and 3 correct. Article 371-H, however, relates to the Union Territory of

				Arunachal Pradesh, giving its Governor special responsibility for law and order, not to Tamil Nadu, which has no dedicated special-provision article of this kind; this is why statement 4 is false and only 1, 2 and 3 together form the correct answer.
135	Match the following : Chairman, (a) Kaka Kaleokar, (b) Xaxa, (c) Mandal, (d) Justice A.K. Mathur; Committee, 1. Tribal Development, 2. 7th pay commission, 3. Second backward class commission, 4. First backward class commission	B) 4 1 3 2	Unit IV - Indian Polity	The Kaka Kalelkar Commission, set up in 1953, was independent India's first Backward Classes Commission, while the B.P. Mandal Commission, constituted in 1978, was the second such commission, best remembered for identifying thousands of castes as socially and educationally backward; separately, the Xaxa Committee examined the socio-economic condition and development of Scheduled Tribes, and Justice A.K. Mathur chaired the Seventh Central Pay Commission, which revised central government employees' salaries. Matching each chairperson to the correct body in this way gives the sequence 4, 1, 3, 2. This is covered in Class 11 Political Science, Unit 13 "Social Justice", which discusses the Kaka Kalelkar and Mandal Commissions as India's first and second Backward Classes Commissions.
136	The objectives of the District Mental Health Programme are: 1. To provide mental health services including	C) 1, 2, 4 only	Unit V - Indian Economy and Development	The District Mental Health Programme aims to deliver mental health care, including prevention, promotion and long-term care, through the existing district-level health care

	prevention, promotion and long term care at District health care delivery system, 2. To augment institutional capacity in terms of infrastructure, equipment and human resource for mental health care, 3. Facilitating the mental health services at doorstep, 4. To promote community awareness and participation in the delivery of mental health services		Administration in Tamil Nadu	delivery system, to strengthen institutional capacity in terms of infrastructure, equipment and trained personnel, and to build community awareness and encourage public participation in delivering these services, which together describe statements 1, 2 and 4. Statement 3, about making services available at every individual's doorstep, goes beyond the programme's actual district-and-institution-based design, which is why the correct combination is 1, 2 and 4 only.
137	Arrange the following events associated with Periyar in chronological order: 1. Vaikom Satyagraha, 2. Non-Co-operation Movement, 3. Kallukadai Mariyal, 4. Leader of Chennai Congress Committee	A) 2, 3, 4, 1	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Periyar E.V. Ramasamy first rose to prominence within the Indian National Congress during the Non-Co-operation Movement of the early 1920s, and it was in this period that he led the Kallukadai Mariyal, a picketing campaign against toddy (liquor) shops as part of the movement's temperance drive; his standing within the party then grew to the point where he became President of the Chennai (Madras Presidency) Congress Committee, and it was from this position of leadership that he later took up the cause of temple-entry rights for lower castes at Vaikom, leading the Vaikom Satyagraha of 1924-25. This places the events in the order 2, 3, 4, 1. Periyar's role in the Non-Co-operation Movement and the

				Vaikom Satyagraha is covered in Class 11 Political Science, Unit 14 "Political Developments in Tamil Nadu".
138	Choose the correct chronological order: (A) Rajadhiraja I, Parantaka I, Kulothunga I, Rajaraja I; (B) Kulothunga I, Parantaka I, Rajadhiraja I, Rajadtiya I; (C) Parantaka I, Rajaraja I, Rajadhiraja I, Kulothunga I; (D) Parantaka I, Rajadhiraja I, Kulothunga I	D) Parantaka I, Rajaraja I, Rajadhiraja I, Kulothunga I	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The correct chronological order of these Chola emperors is Parantaka I (907-955), Rajaraja I (985-1014), Rajadhiraja I (1044-1054) and Kulothunga I (1070-1120): Parantaka I expanded Chola power in the tenth century, Rajaraja I and his son Rajendra I built the empire into a major maritime power, Rajadhiraja I continued Chola campaigns after Rajendra I, and Kulothunga I later united the Chola and Eastern Chalukya royal lines. The English-language option D as printed on the source paper appears to drop 'Rajaraja I' from this sequence, reading only 'Parantaka I, Rajadhiraja I, Kulothunga I', while the accompanying Tamil-language option correctly lists all four names in the right order, confirming that the intended and marked answer is this complete four-king sequence. This succession is covered in Class 11 History, Unit 11 "Later Cholas and Pandyas".
139	Which chapter in Thirukkural reflects the Northern Scholar's ideology of philosophical knowledge?	D) Understanding the truth	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil	Meiyunarthal, literally 'the realisation of Truth,' is the Thirukkural chapter that lays out how a wise person overcomes ignorance and illusion to perceive ultimate reality, a theme closely associated with the Vadanoolar

			Nadu	(scholars trained in the northern, Sanskritic textual tradition) and their pursuit of tattva-jnana, or philosophical knowledge of ultimate truth. The other chapters listed - Not Killing, Instability, and Renunciation - deal with distinct ethical or ascetic themes rather than this specifically philosophical notion of grasping ultimate truth, which is why 'Understanding the truth' (Meiyunarthal) is the correct answer.
140	Which of the following titles are related with Pandyas? (i) Minavar, (ii) Villavar, (iii) Kudavar, (iv) Panchavar	C) (i) and (iv) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In classical Tamil Sangam literature, each of the three crowned dynasties was known by traditional emblematic titles: the Cheras were called Villavar (bowmen) and Kudavar (people of the west), while the Pandyas were called Minavar (after the fish, their royal emblem) and Panchavar. Since only Minavar and Panchavar are titles associated with the Pandyas, while Villavar and Kudavar belong to the Cheras, the correct answer is (i) and (iv) only.
141	Who said, "Tamizhodu Isaippaadal Maranthariyen"?	B) Thirunasvukkarasar	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	'Thamizhodu Isaippaadal Maranthariyen' ('I have never forgotten to sing along with Tamil music') is a celebrated line from the Thevaram hymns of Thirunavukkarasar (Appar), one of the foremost Saiva Nayanmar poet-saints, expressing his lifelong devotion to composing and singing hymns to Lord Shiva in Tamil. Among the four Saiva saints

				listed, this line is specifically associated with Thirunavukkarasar's body of devotional verse rather than with Sambandar, Sundarar or Manikkavasagar, which is why option B is correct.
142	Which Tamil Poet injected the spirit of Nationalism and National Integration?	B) Bharathiyar	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Subramania Bharathiyar used his poetry to actively promote both the ideal of a free, united India and the vision of an integrated national identity that transcended regional, caste and religious divisions, composing patriotic songs that stirred ordinary Tamils into the freedom movement and imagined India as a single motherland. His poems on national unity and freedom, alongside his social-reform verses, made him the Tamil poet most closely identified with injecting the spirit of nationalism and national integration, which is why Bharathiyar, rather than Bharathidasan, Sudhananda Bharathi or Kavimani, is the correct answer. This is covered in Class 11 Political Science, Unit 15 "Tamil Nadu Political Thought", which discusses Bharathiyar's life and nationalist poetry.
143	What was the royal emblem of the Rashtrakutas?	B) Golden Eagle	Unit III - History, Culture of India, and Indian National Movement	The Rashtrakuta dynasty, which ruled the Deccan from the eighth to the tenth century CE, used the Garuda, a golden eagle, as its royal emblem, symbolising sovereign power in the same way that other contemporary

				dynasties adopted animal or bird crests. Since neither the lion, tiger nor elephant was the Rashtrakutas' chosen dynastic symbol, the correct answer is the Golden Eagle.
144	Which of these actions cannot lead to Truth-Consciousness? (A) Porul Allavatrai Porul Endru Unarthal, (B) Saarbu Unarndhu Saarbu Keda Ozhugal, (C) Aiyathin Neengi Thelithal, (D) Sirappu enum semporul Kaanpadhu	A) Porul Allavatrai Porul Endru Unarthal	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	According to the Thirukkural's chapter on realising truth (Meiyunarthal), genuine truth-consciousness is reached through recognising and abandoning false attachments (Saarbu Unarndhu Saarbu Keda Ozhugal), clearing away doubt to gain clarity (Aiyathin Neengi Thelithal), and perceiving the truly excellent, essential reality of things (Sirappu enum semporul Kaanpadhu). Mistaking what is not substance for substance (Porul Allavatrai Porul Endru Unarthal) is, by contrast, the very definition of delusion or false perception, the opposite of truth-realisation rather than a path towards it, which is why it is correctly identified as the option that cannot lead to Truth-Consciousness.
145	"Vendharkku Oli" - What is the meaning propounded in this Thirukkural? (i) Kodai (Donation), (ii) Ali (Kindness), (iii) Protective Sceptre (Sengol Kudiyombal)	D) (i), (ii) and (iii)	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In the Thirukkural, a ruler's true protection or 'light' (oli) is said to come from three virtues: generosity in giving (kodai), compassion towards subjects (ali), and the disciplined, righteous wielding of royal authority for the people's welfare (sengol kudiyombal, protecting them under a just sceptre). Since the Kural highlights all three of these qualities together as what

				illuminates and sustains a king's rule, the correct answer includes all three: (i), (ii) and (iii).
146	Match the following : List I, (a) Thaarugan, (b) Aazhi, (c) Natriram, (d) Imaiyyavar; List II, 1. Thaer Chakkaram, 2. Arakkan, 3. Thevar, 4. Araneri	B) (a)-2 (b)-1 (c)-4 (d)-3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	This question matches classical Tamil literary and mythological terms with their meanings: Thaarugan refers to a demon (Arakkan), Aazhi denotes a wheel, specifically a chariot wheel (Thaer Chakkaram), Natriram (virtuous conduct) corresponds to Araneri (the path of righteousness), and Imaiyyavar, literally 'those who do not blink,' is a classical Tamil term for celestial beings or gods (Thevar). Matching each term to its correct sense in this way gives the pairing (a)-2, (b)-1, (c)-4, (d)-3.
147	Match correctly the Excavated information with the Excavation sites : List I (Excavation site), (a) Thanjavur excavation, (b) Kilaiyur excavation, (c) Tirukkampuliyur excavation, (d) Uraiyyur excavation; List II (Information), 1. Roman Pottery, 2. Centre of Buddhism, 3. Commercial contact between Rome and Tamilagam, 4. Culture of Kaveri	A) (a)-1 (b)-2 (c)-4 (d)-3	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	Archaeological excavations across the Kaveri valley and its neighbourhood have each yielded distinct kinds of evidence: excavations at Thanjavur have turned up Roman pottery pointing to Indo-Roman trade contact, Kilaiyur's excavated remains point to it having been a centre of Buddhism, Tirukkampuliyur's finds are linked to the riverine culture of the Kaveri region, and Uraiyyur, the ancient Chola capital famed for its cotton and bead industries, has yielded evidence of direct commercial contact between Rome and Tamilagam. Matching each excavation site to the specific finding it is known for gives the pairing (a)-1, (b)-2, (c)-

				4, (d)-3.
148	Which among the following Inscriptions mention the ancient word 'Madura'? (a) Inscription at Siddharmalai, (b) Inscription at Alagarmalai, (c) Inscription at Mamandur, (d) Inscription at Paatipurulu	A) (a) and (b) only	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	The Tamil-Brahmi cave inscriptions at Siddharmalai and Alagarmalai, both located in the hills around Madurai and datable to around the second century BCE, are among the earliest epigraphic sources to mention the ancient name 'Madura' (Madurai), recording grants made to Jain ascetics who lived in these cave shelters. The inscriptions at Mamandur, near Kanchipuram and associated with the Pallavas, and at Paatipurulu, in the Krishna-Godavari delta and associated with early Buddhist relic caskets, belong to entirely different regions and traditions and do not mention Madurai, which is why only (a) and (b) are correct.
149	Who speaks the following lines in Barathiyar's 'Panchali Sabadham'? "Tharumathin Vazhvudhanai Soodhu Kavvum; Tharumam Marubadi Vellum".	C) Arjunan	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	In Bharathiyar's Panchali Sabatham, an allegorical retelling of the Mahabharata's dice-game episode in which India is imagined as Draupadi (Panchali) suffering under British rule, it is Arjuna who consoles her with the assurance that although the wicked have momentarily seized Dharma's fortune through deceit (soodhu), Dharma will ultimately triumph again. Since it is Arjuna's words of reassurance to Panchali in this scene, the correct answer is Arjunan. This work is discussed in Class 11 Political Science, Unit 15 "Tamil Nadu Political

				Thought", which notes that Bharathiyar's Panchali Sabatham portrays India as Draupadi and the freedom fighters as the Pandavas confronting British rule.
150	Read the following and pick out the correct statements: (i) Musical Pillars is one of the wonders of the Nayakka King's Rule, (ii) Music created by rhythmic hitting of stones is wondered by International Musicians, (iii) In the Thousand Pillared Hall of Meenakshi Temple in Madurai, one can find small pillars that exude music when played upon, (iv) The Arthanaareeswara Temple at Rameshwaram consists of Pillars than can be played to bring out the seven swaras (Notes)	B) (i), (ii) and (iii) alone are correct	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	During the Nayak and late Vijayanagar period, temple builders in Tamil Nadu became famous for constructing 'musical pillars' - monolithic stone pillars carved so finely that striking them produces distinct musical notes - and the Thousand-Pillared Hall of the Meenakshi-Sundareswarar Temple at Madurai is one of the most celebrated examples, admired even by international musicians for the skill of the stone-carvers who achieved it. The claim about the Arthanareeswara Temple at Rameshwaram is not accurate: Rameshwaram's principal shrine is the Ramanathaswamy Temple, and there is no established seven-svara musical-pillar tradition attributed to an 'Arthanareeswara Temple' there, which is why statement (iv) is excluded and only (i), (ii) and (iii) are correct. Musical pillars as a hallmark of Nayak-period Tamil temple architecture, including the Thousand-Pillared Hall at Madurai, are covered in Class 7 Social Science History, Term 3 Unit 2, on Vijayanagar and Nayak temple architecture.
151	Choose the right answer : Which of the	C) (i), (ii) and (iii) are	Unit III - History,	Ashoka's Rock Edict II lists the Cholas among

	following statements are true about the Cholas? (i) The first mention of the cholas is in the Asokan inscription (ii) They were independent rulers in Tamilagam (iii) Kanyakumari Inscription and Anbil Plates give information of the early Cholas	correct	Culture of India, and Indian National Movement	the Tamil ruling houses (along with the Pandyas, Keralaputras and Satiyaputras) lying beyond the Mauryan empire's southern frontier, making this third-century-BCE edict the earliest surviving reference to the Cholas and confirming that these Tamil kingdoms functioned as independent, self-governing powers rather than as Mauryan subjects. The Kanyakumari inscription and the Anbil copper plates are likewise counted among the epigraphic sources historians use to reconstruct the line of early Cholas that preceded Vijayalaya's ninth-century revival of Chola power, so all three statements are treated as correct. This is covered in Class 11 History, Unit 5 "Evolution of Society in South India", which discusses the Ashokan-edict evidence for the three Tamil ruling houses and their independence from the Mauryan empire.
152	Find the missing number in the place of ?. Grid: Row1: 1, 2, 3 Row2: 4, 5, 6 Row3: 7, 8, 9 Row4: 27, 38, ?	C) 51	Part B, Unit II - Reasoning	Reading the last row of the grid as its own number sequence (27, 38, ?), each term equals a perfect square plus 2, using consecutive integers: $5^2 + 2 = 27$ and $6^2 + 2 = 38$. Continuing the same rule with the next integer, $7^2 + 2 = 51$, which is the missing number.
153	Four pictures of a cube are given below (I: top 5, sides 4 and 6; II: top 3, sides	C) 4	Part B, Unit II - Reasoning	Across the four cube views, the number 4 appears alongside 5 and 6 (view I), alongside

	6 and 5; III: top 2, sides 1 and 4; IV: top 4, sides 1 and 5). Which number is on the face opposite to 3?			1 and 5 (view IV), and alongside 2 and 1 (view III) - meaning 4 is shown adjacent to every other face (1, 2, 5 and 6) except 3. Since a cube face touches exactly four of the remaining five faces and is opposite only the one it never touches, 4 must be the face opposite 3, which matches option (C) by elimination.
154	The next term of the Alphanumeric series C4X, F9U, I16R, is	C) L25O	Part B, Unit II - Reasoning	Each term in C4X, F9U, I16R changes in three independent ways: the leading letter advances three places through the alphabet (C, F, I, so the next is L); the middle number runs through consecutive perfect squares ($2^2 = 4$, $3^2 = 9$, $4^2 = 16$, so the next is $5^2 = 25$); and the trailing letter moves three places backward through the alphabet (X, U, R, so the next is O). Combining these three patterns gives the next term as L25O.
155	A mat of length 180 m is made by 15 women in 12 days. How long will it take for 32 women to make a mat of length 512 m?	C) 16 days	Part B, Unit I - Aptitude	The work rate is constant at 1 woman-day per metre of mat, since 15 women working for 12 days (180 woman-days) complete 180 metres. Producing a 512-metre mat therefore requires 512 woman-days, and dividing this among 32 women gives $512 \div 32 = 16$ days.
156	Find the area of an equilateral triangle whose perimeter is 180 cm.	A) 1558.8 cm ²	Part B, Unit I - Aptitude	With a perimeter of 180 cm, each side of the equilateral triangle measures 60 cm, and the area of an equilateral triangle is $(\sqrt{3}/4) \times \text{side}^2$. Substituting gives $(\sqrt{3}/4) \times 3600 = 900\sqrt{3} \approx 1558.8 \text{ cm}^2$, matching option (A).

157	The CI on ₹ 15,000 for 3 years if the rate of interests are 15%, 20% and 25% for the I, II and III year respectively is	A) ₹ 10,875	Part B, Unit I - Aptitude	Applying each year's rate successively to the growing principal, ₹15,000 grows to ₹15,000 × 1.15 = ₹17,250 after year one, then × 1.20 = ₹20,700 after year two, then × 1.25 = ₹25,875 after year three. The compound interest earned is therefore ₹25,875 - ₹15,000 = ₹10,875.
158	An apple costs ₹ 60, a guava costs ₹ 90 and a mango costs ₹ 60. How much a pomegranate cost?	D) ₹ 150	Part B, Unit II - Reasoning	The prices follow a hidden rule based on the number of vowels in each fruit's name, at ₹30 per vowel: Apple has two vowels (a, e) for ₹60, Mango has two vowels (a, o) for ₹60, and Guava has three vowels (u, a, a) for ₹90 - each consistent with the ₹30-per-vowel rule. Pomegranate has five vowels (o, e, a, a, e), so its cost works out to 5 × ₹30 = ₹150.
159	In what time will ₹ 8,000 at 3% per annum, produce the same interest as ₹ 6,000 does in 5 years at 4% simple interest?	A) 5 years	Part B, Unit I - Aptitude	₹6,000 at 4% simple interest for 5 years earns interest of $(6000 \times 4 \times 5)/100 = ₹1,200$. For ₹8,000 at 3% per annum to earn this same ₹1,200, the time required is $T = (1200 \times 100)/(8000 \times 3) = 5$ years.
160	If A : B = 2 : 3, B : C = 2 : 4, C : D = 2 : 5, then A : D is equal to	D) 2 : 15	Part B, Unit I - Aptitude	Scaling the three given ratios to share common terms - A:B = 2:3 becomes 4:6, B:C = 2:4 becomes 6:12, and C:D = 2:5 becomes 12:30 - links all four quantities into a single chain, A:B:C:D = 4:6:12:30. Reading off the first and last terms gives A:D = 4:30, which simplifies to 2:15.
161	The Lowest Common Multiple (LCM) of two numbers is 6 times of their	C) 24	Part B, Unit I - Aptitude	Since the LCM is 6 times the HCF and the HCF is 12, the LCM is 72; and for any two

	Highest Common Factor (HCF). If the HCF is 12 and one of the number is 36, then the other number is			numbers, the product of their LCM and HCF always equals the product of the two numbers themselves, so $12 \times 72 = 864$ equals the product of the two numbers. Dividing this product by the known number, $864 \div 36 = 24$, gives the other number.
162	Find the HCF of the polynomials $6x^3 - 30x^2 + 60x - 48$ and $3x^3 - 12x^2 + 21x - 18$	C) $3(x - 2)$	Part B, Unit I - Aptitude	Factoring both cubics by testing $x = 2$ as a root shows $6x^3 - 30x^2 + 60x - 48 = 6(x - 2)(x^2 - 3x + 4)$ and $3x^3 - 12x^2 + 21x - 18 = 3(x - 2)(x^2 - 2x + 3)$. The two expressions share only the factors 3 and $(x - 2)$ in common, since their quadratic factors differ, so their HCF is $3(x - 2)$.
163	Simplify : $100 + 8 \div 2 + \{(3 \times 2) - 6 \div 2\}$	B) 107	Part B, Unit I - Aptitude	Working through the innermost brackets first, $\{(3 \times 2) - 6 \div 2\} = \{6 - 3\} = 3$. Substituting back, the expression becomes $100 + (8 \div 2) + 3 = 100 + 4 + 3 = 107$, following the standard order of operations with division carried out before addition.
164	Which of the following statements about GST council is not true? 1. The members of the GST council choose one amongst themselves to be the vice-chairperson of the council. 2. Every decision of the GST council shall be taken by a meeting of not less than two-third of the weighted votes of the members present and voting. 3. One-	C) 1 and 3	Unit V - Indian Economy and Development Administration in Tamil Nadu	Under Article 279A, the Members of the GST Council who represent the states do choose one among themselves to be the Council's Vice-Chairperson, and the Council's own Rules of Procedure fix its quorum at one-half of the total number of members - so statements (1) and (3) are, in fact, accurate descriptions of how the Council works. The genuinely inaccurate statement is (2): every GST Council decision requires a majority of

	half of the total number of members of the GST council constitute the quorum at its meeting.			not less than three-fourths of the weighted votes of members present and voting, not two-thirds, since the Centre alone holds one-third of the weightage while the states together hold the remaining two-thirds. This is covered in Class 11 Commerce, Unit 33 "Indirect Taxation", which introduces the GST Council and its functions.
165	Pick out the correct abbreviation for the word 'PURA'?	D) Provision of urban amenities in rural areas	Unit V - Indian Economy and Development Administration in Tamil Nadu	PURA (Provision of Urban Amenities in Rural Areas) is a rural development strategy - first proposed by Dr. APJ Abdul Kalam and later adopted as a government scheme - that seeks to bring urban-standard infrastructure such as roads, water supply, healthcare and connectivity, along with livelihood opportunities, to clusters of villages, so that people are not forced to migrate to cities in search of these amenities. Among the options, only 'Provision of urban amenities in rural areas' correctly expands the abbreviation, matching option (D).
166	Which of the following measures have been taken to attain the aims of the new industrial policy? (1) Industrial Licensing (2) Foreign Investment (3) Foreign trade Policy (4) Public sector management	C) (1), (2) and (4) only	Unit V - Indian Economy and Development Administration in Tamil Nadu	The New Industrial Policy of 1991 pursued liberalisation chiefly by abolishing industrial licensing for most industries, opening the economy to greater foreign investment including higher limits on foreign equity participation, and restructuring the public sector's role through disinvestment and reduced industry reservation. Foreign trade

				policy was reformed as a separate, parallel exercise around the same period rather than as a measure under the industrial policy itself, which is why only measures (1), (2) and (4) are grouped as the new industrial policy's own measures. This is covered in Class 11 Economics, Unit 9 "Development Experiences in India", which sets out the 1991 industrial policy's key measures including ending the licence raj and liberalising foreign investment.
167	The Monetary Policy of the Government of India emphasised the following two aims of the economic policy (i) To control and reduce inflationary pressure in the economy. (ii) Speed up economic development in the country to raise national income and standard of living of the people. (iii) To increase the per capita income. (iv) To have a cheap money policy. Select the correct answer by using the codes given below :	B) (i) and (ii) are correct	Unit V - Indian Economy and Development Administration in Tamil Nadu	India's monetary policy, framed and implemented by the RBI, is built around two core aims: controlling and reducing inflationary pressure to maintain price stability, and speeding up the country's economic development so as to raise national income and the standard of living. Increasing per capita income and following a cheap-money policy are related economic goals but are not counted among these two defining monetary-policy aims, which is why only (i) and (ii) are marked correct. This is covered in Class 11 Commerce, Unit 10 "Reserve Bank of India", which describes the RBI's monetary-authority role of maintaining price stability while controlling inflationary trends and supporting economic growth.
168	According to Indian Tourism Statistics	C) Mahabalipuram	Unit V - Indian	According to India Tourism Statistics 2022,

	2022, which tourist place is most visited by Foreign tourists?		Economy and Development Administration in Tamil Nadu	Mahabalipuram (Mamallapuram), the UNESCO World Heritage town near Chennai famed for its Pallava-era Shore Temple and rock-cut monuments, was recorded as the monument most visited by foreign tourists that year, ahead of long-standing favourites like the Taj Mahal, reflecting its easy access from Chennai's international airport and its place on Tamil Nadu's major heritage circuit.
169	Which one of the following is not addressed in Mission POSHAN 2.0?	D) Malnutrition in elderly	Unit V - Indian Economy and Development Administration in Tamil Nadu	Mission POSHAN 2.0, an umbrella scheme merging the earlier Anganwadi Services, POSHAN Abhiyaan, Scheme for Adolescent Girls and National Creche Scheme, focuses on tackling malnutrition among children up to six years, adolescent girls, and pregnant and lactating mothers through improved nutrition delivery, early childhood care and community outreach. Nutrition among the elderly is not part of its mandate and is addressed instead under separate old-age welfare and social-security schemes, so malnutrition in the elderly is the aspect not addressed by Mission POSHAN 2.0.
170	Which of the following statements about Index of Industrial Production (IIP) are correct? 1. The IIP is a key economic indicator of the manufacturing activity in various	D) 1, 2 and 3	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Index of Industrial Production (IIP) is a key indicator that tracks short-term changes in the output of the manufacturing, mining and electricity sectors, is regularly compiled and released by the statistical wing of the government (the erstwhile Central Statistical

	sectors of economy. 2. IIP data is regularly published by Central Statistical Organisation (CSO). 3. The base year for IIP is 2011-12.			Organisation, now folded into the National Statistical Office), and currently uses 2011-12 as its base year for comparison. All three statements accurately describe the IIP, which is why they are all marked correct.
171	Nehru-Mahalanobis planning model was based on the following strategies emphasised are (i) High rate of saving (ii) Preferred a heavy industry (iii) Discouraged import substitution (iv) Safeguard infant industry	C) (i), (ii) and (iv) correct	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Nehru-Mahalanobis strategy, adopted from the Second Five Year Plan onward, emphasised mobilising a high rate of domestic saving, prioritising the rapid build-up of heavy and basic industries, and protecting and safeguarding new (infant) domestic industries from foreign competition so that they could grow. Far from discouraging import substitution, the model actively promoted it as the route to industrial self-reliance, which is why statement (iii) is false and only (i), (ii) and (iv) are correctly identified as its emphasised strategies. This is covered in Class 11 Economics, Unit 8 "Indian Economy Before and After Independence", which notes that the Second Five Year Plan was based on the P.C. Mahalanobis model with its main focus on industrial development.
172	"British rule was established in India with the cooperation of Indians, and had survived only because of this co-operation. If Indians refused to co-	C) Mahatma Gandhiji	Unit III - History, Culture of India, and Indian National Movement	This statement reflects the core premise behind Gandhi's philosophy of non-cooperation: since British rule in India depended entirely on the continued administrative, economic and social

	operate, British rule in India would collapse with in a year and Swaraj would come," who said this?			cooperation of Indians themselves - as officials, soldiers, taxpayers and consumers of British goods - withdrawing that cooperation, as the Non-Cooperation Movement sought to do from 1920, would make colonial rule unworkable and hasten the arrival of Swaraj. Gandhi voiced this reasoning repeatedly while building support for mass non-cooperation, distinguishing his approach from leaders such as Tilak, Motilal Nehru or Patel, who are associated with other phases and strategies of the freedom struggle. This is covered in Class 10 Social Science, History Unit 8 "Nationalism: Gandhian Phase", which explains the Non-Cooperation Movement's basis in withdrawing Indian support for British administration.
173	In 1944, the Government of India setup a planning department under the Chairmanship of	D) Sir Ardeshir Dalal	Unit V - Indian Economy and Development Administration in Tamil Nadu	In 1944, the Government of India set up an official Planning and Development Department under the chairmanship of Sir Ardeshir Dalal, a Tata Group industrialist and member of the Viceroy's Executive Council, to prepare for post-war industrial and economic development. This was distinct from, though contemporaneous with, the privately drafted plans of the period, such as S.N. Agarwal's 1944 'Gandhian Plan' focusing on agriculture and rural economy and M.N. Roy's 1945 'People's Plan', which is why those

				other planners of the mid-1940s are offered as distractors. This broader landscape of pre-independence planning proposals is covered in Class 12 Economics, Unit 11 "Economics of Development and Planning".
174	Match List I and List II and select the correct answer using the codes given below the Lists : List I - (a) Resignation of Congress Ministries (b) Neil Statue Satyagraha (c) Quit India Resolution (d) Provincial Government of Free India; List II - 1. 1943 2. 1942 3. 1927 4. 1939	C) (a)-4 (b)-3 (c)-2 (d)-1	Unit III - History, Culture of India, and Indian National Movement	The Congress Ministries, formed after the 1937 provincial elections, resigned in 1939 in protest at India being declared a party to the Second World War without being consulted, and a few years later the All India Congress Committee passed the Quit India Resolution in August 1942, launching the 'Do or Die' movement. Even earlier, in 1927, Tamil Nadu nationalists led an agitation demanding removal of the statue of General James Neill (blamed for brutal reprisals during the 1857 Kanpur uprising) from Madras's Mount Road, and in 1943, Subhas Chandra Bose, after taking charge of the Indian National Army in Southeast Asia, proclaimed the Provisional Government of Free India (Azad Hind) in Singapore. Matching each event to its year gives (a)-4 (1939), (b)-3 (1927), (c)-2 (1942) and (d)-1 (1943), corresponding to option (C). This is covered in Class 10 Social Science, History Unit 8 "Nationalism: Gandhian Phase" (the Congress Ministries' resignation, the Quit India Movement, and Bose's Provisional Government) and Unit 9 "Freedom

				Struggle in Tamil Nadu" (the 1927 Neill Statue agitation).
175	Who was arrested by the British Government for the Bomb explosion on 1933 at Srivillipatur Police Station?	C) Kamaraj	Unit VI - History, Culture, Heritage and Socio-Political Movements in Tamil Nadu	K. Kamaraj was an active organiser of Congress activities in southern Tamil Nadu through the 1920s and 1930s, and he was taken into British custody in connection with the 1933 bomb explosion at the Srivilliputhur police station - one of several occasions on which colonial authorities moved against him for his role in local nationalist agitation, well before his later, better-known arrests during the Quit India Movement of 1942.
176	What is the title of the Doctoral Thesis of Dr. B.R. Ambedkar in 1923?	A) The problem of the Rupee	Unit III - History, Culture of India, and Indian National Movement	Dr. B.R. Ambedkar earned his D.Sc. from the London School of Economics in 1923 for a thesis titled "The Problem of the Rupee: Its Origin and Its Solution", a study of India's currency and exchange-rate policy under British rule, following his earlier 1921 M.Sc. thesis "Provincial Decentralization of Imperial Finance in British India" at the same institution. This is covered in the Class 11 Economics chapter on the Indian Economy and the Class 9 Social Science (Tamil medium) Economics chapter on Money and Credit, both of which reference this thesis as the intellectual basis for later monetary institutions such as the Reserve Bank of India.
177	Which of the following is incorrect?	C) After the Second	Unit III - History,	The Gandhi-Irwin Pact was actually signed on

	(A) The Indian National Congress boycotted the First Round Table Congress (B) Gandhiji attended the Second Round Table Congress (C) After the Second Round Table conference the Gandhi-Irwin pact was signed (D) Communal Award was associated with Third Round Table Conference	Round Table conference the Gandhi-Irwin pact was signed	Culture of India, and Indian National Movement	5 March 1931, before the Second Round Table Conference opened later that year - it was this pact (securing the release of political prisoners and Congress participation) that enabled Gandhi to attend the Second RTC as the Congress's sole representative, not the reverse, making statement (C) the incorrect one with the sequence reversed. The Congress had indeed boycotted the First Round Table Conference (1930) while pursuing the Civil Disobedience Movement, Gandhi did attend the Second RTC in London in 1931, and the Communal Award of August 1932 is conventionally treated as linked to the period around the Third RTC (November-December 1932). This is covered in the Class 10 Social Science History chapter on Nationalism - The Gandhian Phase and the Class 12 History chapter on the Advent of Gandhi and Mass Mobilisation.
178	'Damin-i-koh' was the land given by the British to the	A) Santhal tribes	Unit III - History, Culture of India, and Indian National Movement	Damin-i-Koh ("skirts of the hills"), a tract in the Rajmahal Hills of present-day Jharkhand, was demarcated by the British in 1832 and settled with Santhal families who cleared its forests for cultivation; the subsequent exploitation of Santhal settlers here by moneylenders, zamindars and revenue officials was a direct trigger for the Santhal Hul (rebellion) of 1855-56. This is covered in

				the Class 11 History chapter on Early Resistance to British Rule.
179	Acid rains are produced by	A) Excess NO₂ and SO₂ from burning fossil fuels	Unit I - General Science	Acid rain forms when sulphur dioxide and nitrogen oxides, released mainly from burning fossil fuels in power plants, industries and vehicles, react with atmospheric water vapour and oxygen to form sulphuric and nitric acids that fall as acidic precipitation, damaging plants, aquatic ecosystems and monuments; excess ammonia, incomplete-combustion carbon monoxide, or respiration/combustion-linked carbon dioxide are not the gases responsible for this specific phenomenon. This is covered in the Class 7 Science chapter on Chemistry in Daily Life and the Class 6 and Class 8 Science chapters on Changes Around Us.
180	Why is the Himalayan region poor in mineral resources?	A) Displacement of rock strata has disturbed the arrangement of rocks and made it complex	Unit II - Geography of India	The Himalayas are geologically young fold mountains formed by intense tectonic compression that has folded, faulted and displaced their sedimentary rock strata; this structural disturbance has badly complicated the otherwise orderly, layered arrangement of rocks in which economically workable mineral deposits typically occur, making systematic exploration and extraction difficult across the range - unlike the geologically ancient, structurally stable Peninsular plateau, whose relatively undisturbed

				crystalline formations are far richer in exploitable minerals.
181	Consider the statement given below and choose the correct answer: Assertion [A]: Cultural diffusion is the spread of cultural beliefs and social activities from one group of people to another Reason [R]: Cultural landscapes have been defined by the world heritage committee as cultural properties representing the combined works of nature and of man	B) Both [A] and [R] are true: [R] does not explain [A]	Unit II - Geography of India	Cultural diffusion is indeed the process by which cultural traits, beliefs and practices spread from one society or group to another through contact, migration, trade or media, making the Assertion true; the Reason is also a true, independently correct definition - UNESCO's World Heritage Committee does describe "cultural landscapes" as properties representing the combined works of nature and humankind - but this particular definition explains what a cultural landscape is, not the mechanism by which cultural traits diffuse between groups, so the two true statements are unrelated in an explanatory sense. This is covered in the Class 12 Geography chapter on Cultural and Political Geography.
182	Asthamudi is an important lagoon of the _____ coast.	A) Malabar coast	Unit II - Geography of India	Ashtamudi Lake, a large palm-shaped ("ashta-mudi", eight-armed) brackish-water lagoon in Kollam district, Kerala, and a designated Ramsar wetland, is one of the principal backwater lagoons of the Malabar coast - the western coastal strip running through Kerala and coastal Karnataka - and is distinct from the Coromandel (Cholamandel) coast and Northern Circars, which lie along India's eastern seaboard.

183	Which of the following statements are true about population growth of India? (i) Bihar, Uttarpradesh, Madhya Pradesh, Rajasthan and Orissa, which constitute 44% of the total population of India in 1996. (ii) Bihar, Uttarpradesh, Madhya Pradesh, Rajasthan and Orissa, which constitute 48% of the total population of India in 2016. (iii) These states contributed 70% of the total increase in population of the country during the period of 1996-2016.	C) (i) and (ii) only	Unit II - Geography of India	Between 1996 and 2016, the populous, demographically less-advanced states of Bihar, Uttar Pradesh, Madhya Pradesh, Rajasthan and Odisha - still in an earlier, faster-growing stage of the demographic transition than most southern and western states - saw their combined share of India's total population rise from about 44% in 1996 to about 48% in 2016, reflecting their continued higher fertility and slower fertility decline, so statements (i) and (ii) are correct; however, these five states' contribution to the country's total population increase over this period, while substantial, is not supported at as high a figure as 70%, making statement (iii) unsupported.
184	Choose the right matches 1. Khizr Khan - Orissa 2. Durgavati - Gondwana 3. Rana Udai Singh - Mewar 4. Kunwar Man Singh - Ajmir	B) 2 and 3 are correct	Unit III - History, Culture of India, and Indian National Movement	Rani Durgavati ruled the kingdom of Gondwana (Garha-Katanga) as regent for her son and died resisting Akbar's invading forces in 1564, and Rana Udai Singh II founded Udaipur and ruled Mewar after Chittor fell to Akbar in 1568 - both correctly matched pairs; by contrast, Khizr Khan, who captured Delhi in 1414 and founded the Sayyid dynasty, ruled from Delhi (not Orissa), and Raja Man Singh I of Amber, Akbar's celebrated Rajput general, is chiefly associated with governorships of Kabul, Bihar and Bengal rather than Ajmer, making pairs 1 and 4

				incorrect.
185	In A.D. 1894, the Kashi Nagri Pracharini Sabha was founded in	C) Madras	Unit III - History, Culture of India, and Indian National Movement	The Kashi Nagari Pracharini Sabha, a pioneering institution for the promotion of the Devanagari script and Hindi language, was in fact founded on 16 July 1893 at Queen's College in Varanasi (Kashi) - not in 1894, and not in Madras; it later established further branches (including in present-day Delhi and Haridwar), but its founding date and city are well documented as 1893 and Kashi/Varanasi, not 1894 and Madras. This marked answer therefore does not match the sabha's documented founding, and no Samacheer or NCERT source could be located supporting a Madras origin for this body - worth rechecking against the official key or errata.
186	Who was the first person to place the demand for a separate Muslim state in British India?	A) Mohammad Iqbal	Unit III - History, Culture of India, and Indian National Movement	In his presidential address to the All-India Muslim League's Allahabad session in December 1930, the poet-philosopher Muhammad Iqbal became the first major political figure to publicly propose consolidating the Muslim-majority provinces of Punjab, the North-West Frontier Province, Sindh and Balochistan into a single, separate state, laying the conceptual foundation for what later became the demand for Pakistan; it was only in his 1933 pamphlet "Now or Never" that Choudhry Rahmat Ali coined the

				actual name "Pakistan" for this proposed state, three years after Iqbal's address - so Iqbal, not Rahmat Ali, was first to raise the substantive demand.
187	Assertion [A] : Federalism is merely an institutional arrangement for sharing power across multiple levels of government based on the principle of shared rule and self rule. Reason [R] : Federations, have constantly adjusted and adopted depending on political, social and economic situations.	B) Both [A] and [R] are true and [R] is correct explanation of [A]	Unit IV - Indian Polity	Federalism is a constitutionally guaranteed distribution of powers between a national government and constituent regional governments, combining "self rule" (autonomy for each unit over its own affairs) with "shared rule" (joint decision-making at the centre), which is the standard definition given in the Assertion; the Reason - that federations have continually readjusted their power-sharing arrangements to suit changing political, social and economic circumstances, as seen in India's evolving Centre-State fiscal and administrative relations - explains precisely why federalism is best understood as a flexible institutional arrangement rather than a rigid, one-time design, making it a valid explanation of the Assertion. This is covered in the Class 12 Political Science chapter on Federalism in India.
188	Which of the following statements are true about Buddhism? 1. Buddhism denied the authority of Vedas 2. Buddha's teachings were largely	B) 1 and 2 are correct	Unit III - History, Culture of India, and Indian National Movement	Buddhism rejected the authority of the Vedas and Brahmanical ritual sacrifice as a path to salvation, while still absorbing and reinterpreting existing Brahmanic philosophical concepts such as punarjanma (rebirth), karma (the law of moral cause and

	based on Brahmanic ideas of Punarjanma, Karma and Moksha 3. Buddhism was not practical and ethical 4. Buddhism accepts God as creator			effect) and moksha (liberation from rebirth) within its own ethical framework centred on the Eightfold Path - making statements 1 and 2 true; far from being impractical, Buddhism was intensely practical and ethical in its emphasis on right conduct, and it does not posit any creator God, being essentially silent on or sceptical of such a supreme creator - making statements 3 and 4 false.
189	Which of the following statements about the Guptha society is true? 1. The Guptha emperors called themselves as Parama Bhagavatas 2. Trade with Rome and China flourished 3. Women were debarred from exercising public rights 4. The custom of Sati was practiced by them	D) 1, 2 and 4 are correct	Unit III - History, Culture of India, and Indian National Movement	Gupta emperors such as Chandragupta II styled themselves "Parama Bhagavata" (supreme devotee of Vishnu), reflecting the dynasty's Vaishnavite leanings; overseas trade with Rome and China continued to flourish under Gupta patronage; and the Samacheer Class 6 History chapter on the Guptas explicitly sets "Sati was not in practice in the Gupta Empire" as a FALSE statement to test students on - confirming that Sati was indeed practiced in this period, with the Eran inscription (c. 510 CE) providing one of its earliest epigraphic attestations - making statements 1, 2 and 4 true. Statement 3 overstates the position of women, who, while facing certain social restrictions, were not uniformly debarred from all public rights in this period, making it the false statement. This is covered in the Class 6 Social Science History chapter "The

				Age of Empire: Guptas and Vardhanas".
190	Why Ulama's had great influence in Muslim society, politics, administration and religion?	C) They were well-versed in Muslim theology and Fiqh	Unit III - History, Culture of India, and Indian National Movement	The Ulama (Islamic religious scholars) derived their considerable influence in medieval Muslim society, politics, administration and religious life primarily from their deep expertise in Islamic theology and Fiqh (Islamic jurisprudence), which made them indispensable as qazis (judges), legal advisors and interpreters of the Sharia for both rulers and the general populace - rather than from sheer numbers, personal piety alone, or control over trade and industry, none of which was their defining source of authority.
191	Which of the following are wrongly paired? (1) Obligation for the state and individual to protect environment - Art 48A (2) Early childhood care and education for all children until they complete the age of fourteen years - Art 45 (3) Separate judiciary from the executive in the public services of the state - Art 39 (4) Voluntary formation, autonomous functioning of cooperative societies - Art 44	D) (3) and (4) only	Unit IV - Indian Polity	It is Article 50, not Article 39, that directs the State to separate the judiciary from the executive in its public services, making pair (3) wrongly paired; and it is Article 43B (inserted by the 97th Amendment, 2011), not Article 44 (which deals with a Uniform Civil Code), that directs the State to promote the voluntary formation and autonomous, democratic functioning of cooperative societies, making pair (4) wrongly paired as well - together giving (3) and (4) as the mismatched pairs. Article 48A does correctly correspond to the State's duty to protect the environment (the identical individual duty is separately placed under the Fundamental Duties in Article 51A(g)), and Article 45, since

				the 86th Amendment of 2002, covers early childhood care and education (specifically for children below six years, with the original goal of free and compulsory education "until 14" now secured instead as the Article 21A Fundamental Right) - so despite this being loosely worded, pairs (1) and (2) are treated as correctly matched here.
192	Assertion [A] : Rule of law entails that all persons, both public and private institutions, the state and other entities are accountable to publicly promulgated laws. Reason [R] : The rule of law forms the base to international peace and security, and it is at the core to protect people's rights and their fundamental freedom.	D) Both [A] and [R] are true but [R] is not the correct explanation of [A]	Unit IV - Indian Polity	The Rule of Law, as classically formulated by A.V. Dicey and reflected in India's constitutional order, holds that all persons and institutions - public or private, including the state itself - are equally accountable to publicly known, prospectively enacted laws rather than to arbitrary power, making the Assertion true; the Reason, that the rule of law underpins international peace, security and the protection of fundamental rights and freedoms, is also a true and widely recognised proposition, but it describes the rule of law's broader importance and consequences rather than explaining the mechanism of equal legal accountability itself, so it does not serve as the correct explanation of the Assertion. This is covered in the Class 11 Political Science chapters on Basic Concepts of Political Science and Forms of Government, and the Class 7 Social Science Civics chapter on Equality.

193	Identify the incorrect statement about Lok adalat	B) It is not a tool of the legal system	Unit IV - Indian Polity	Lok Adalats ("people's courts") are, in fact, a well-established and statutorily recognised tool of India's legal system, given formal legal status under the Legal Services Authorities Act, 1987, so the statement that they are "not a tool of the legal system" is the incorrect one; the other statements accurately describe Lok Adalats as mechanisms for the speedy, amicable settlement of disputes (typically without formal advocates or procedure) that take justice to people at their doorstep, consistent with their design since the first Lok Adalat was held in 1982 at Junagadh, Gujarat. This is covered in the Class 8 Social Science Civics chapter on The Judiciary and the Class 12 Political Science chapter on the Indian Judiciary.
194	Which of the following statements is/are not true about the 'governor'?	B) He appoints the Chancellor of Universities in the State	Unit IV - Indian Polity	In most Indian states, the Governor does not "appoint" a separate Chancellor of state universities - the Governor himself is the ex-officio Chancellor of the state's public universities, a position attached automatically to the office rather than conferred through any act of appointment by the Governor; it is the Chancellor (i.e., the Governor acting in that capacity) who in turn appoints the Vice-Chancellors of these universities. By contrast, the Governor does appoint the Advocate-General of the State

				(Article 165), appoints the Chief Minister (Article 164), and appoints the State Election Commissioner (Article 243K) - making statement (B) the genuinely untrue one among the four.
195	Match the following: Subject Protected - Year of the enactment (a) Beedi and Cigar worker - 1. 1979 (b) Contract labour - 2. 1976 (c) Equal remuneration - 3. 1970 (d) Migrant workmen Employment Regulation - 4. 1966	B) (a)-4 (b)-3 (c)-2 (d)-1	Unit V - Indian Economy and Development Administration in Tamil Nadu	The Beedi and Cigar Workers (Conditions of Employment) Act was enacted in 1966; the Contract Labour (Regulation and Abolition) Act followed in 1970; the Equal Remuneration Act, mandating equal pay for equal work irrespective of gender, was passed in 1976; and the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act came in 1979 - giving the correct chronological match of (a)-4, (b)-3, (c)-2, (d)-1.
196	Need for a constitution for free India was first suggested by	B) M.N. Roy	Unit IV - Indian Polity	The radical political thinker M.N. Roy is generally credited with first proposing, in 1934, that a free India should draft its own constitution through a Constituent Assembly elected on the basis of adult suffrage - a demand the Indian National Congress formally adopted at its 1936 Lucknow session and the Muslim League endorsed in 1940, well before the actual Constituent Assembly convened in December 1946.
197	In a Modern Democratic state, citizenship is a	C) Statutory right	Unit IV - Indian Polity	Indian citizenship is not directly enumerated as a Fundamental Right in Part III of the Constitution; Articles 5 to 11 lay down only

				the basic framework of citizenship at the Constitution's commencement, and Article 11 expressly empowers Parliament to regulate the acquisition, termination and all other matters relating to citizenship by ordinary law - which it did through the Citizenship Act, 1955 - making Indian citizenship fundamentally a statutory right created and regulated by legislation, rather than a natural, common-law, or fundamental right.
198	Match the following: List - I (Act) List - II (a) Pitt's India Act, 1784 (b) Charter Act, 1813 (c) Charter Act, 1833 (d) Indian Councils Act, 1861 1. Decentralization of the legislative powers of Governor-General 2. Governor-General's Government was known as Government of India for the first time 3. Appointment of Board of Control of six members 4. Deprivation of East India Company's monopoly of trade in India	B) (a)-3 (b)-4 (c)-2 (d)-1	Unit IV - Indian Polity	Pitt's India Act, 1784 established a six-member Board of Control in London to supervise the East India Company's civil, military and revenue affairs, giving the British Crown a direct check over Company rule; the Charter Act of 1813 ended the Company's monopoly over trade with India (though it retained the China and tea trade monopoly until 1833); the Charter Act of 1833 made the Governor-General of Bengal the Governor-General of India, so that his government was, for the first time, formally styled the "Government of India"; and the Indian Councils Act of 1861 began decentralising the Governor-General's legislative powers by restoring limited law-making powers to the Bombay and Madras presidencies (and later other provinces) - giving the match (a)-3, (b)-4, (c)-2, (d)-1.

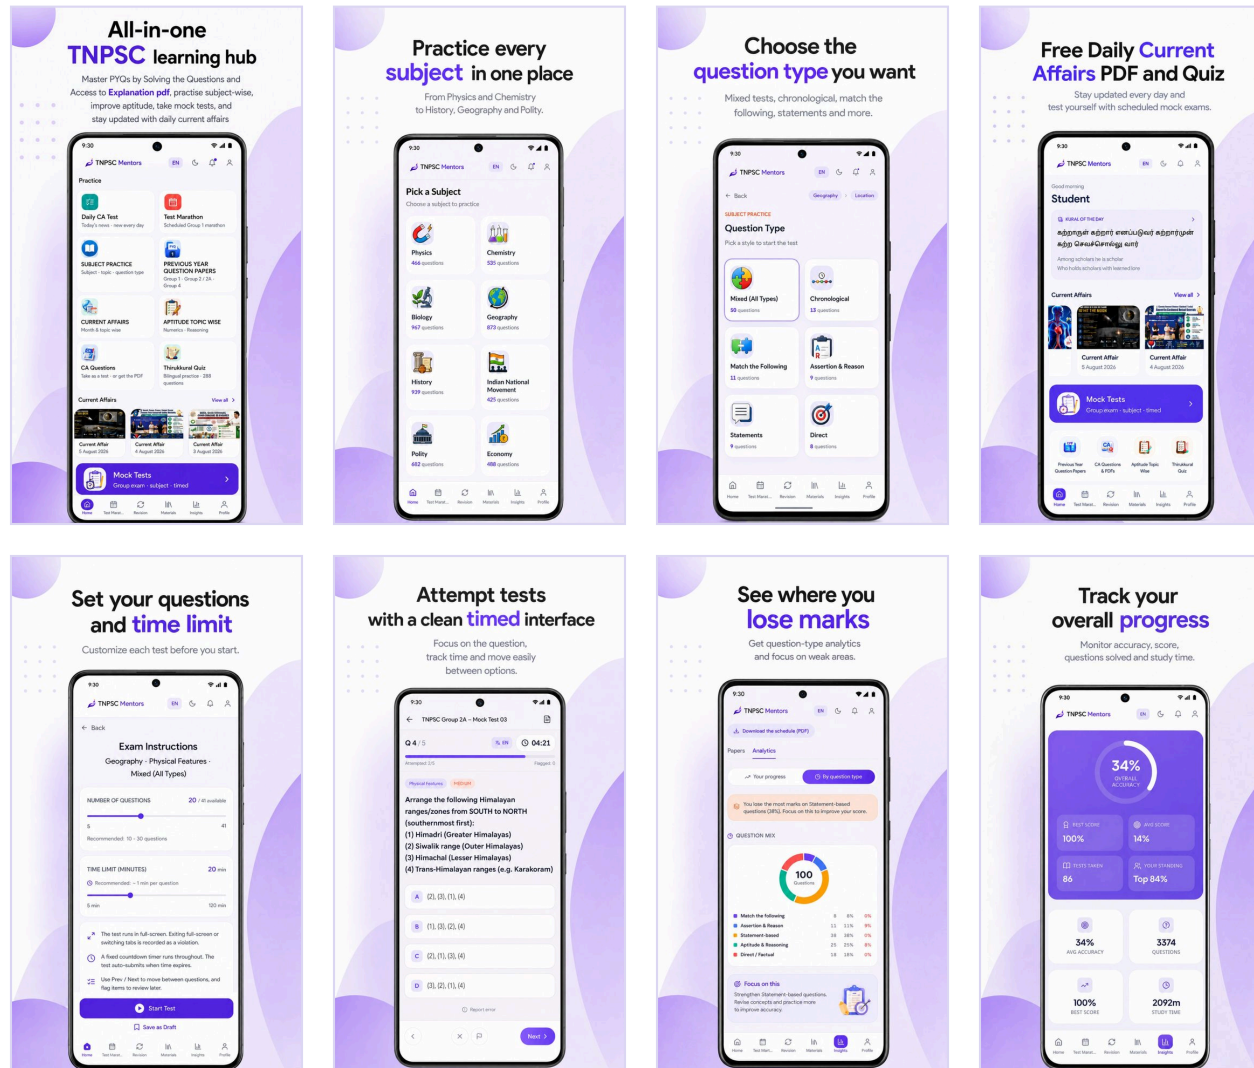

199	Which one of the following statement(s) is not correct about the Indus Valley People? (i) The Indus Valley People worshipped trees and animals (ii) The principal deity of Indus Valley People was Krishna (iii) The Indus Valley People worshipped fire and water (iv) The principal deity of Indus Valley People was mother goddess	B) (ii) only	Unit III - History, Culture of India, and Indian National Movement	Archaeological evidence (seals, figurines) from Indus Valley sites shows that its people worshipped trees, animals (including the humped bull and a composite "proto-Shiva" figure surrounded by animals), and fire and water, and that their principal, most widely attested deity was a Mother Goddess, reflected in the large numbers of terracotta female figurines recovered from these sites - making statements (i), (iii) and (iv) correct; there is, however, no evidence connecting Indus Valley religion to Krishna, a much later Vedic-Puranic deity, making statement (ii) alone incorrect. This is covered in the Class 11 History and Class 6 Social Science History chapters on the Indus Valley (Harappan) Civilisation.
200	Who said, Delegated legislation and administrative tribunals are the manifestation of "New despotism"?	C) Lord Heward	Unit IV - Indian Polity	Gordon Hewart, 1st Viscount Hewart, Lord Chief Justice of England, coined this description in his influential 1929 book "The New Despotism", warning that the unchecked growth of delegated legislation (law-making power handed by Parliament to the executive) and administrative tribunals threatened to subordinate Parliament, evade the ordinary courts, and place unfettered power in the hands of the executive - a critique that prompted the UK's Donoughmore Committee inquiry into ministerial powers; the option

				spelling "Lord Heward" is a phonetic variant of Hewart's actual name.
